#### Formulation in Pharmacy Practice PYRIMETHAMINE

The formulation prepared 10mL, but the question asks us to prepare 600mL of medicine. As before, we find the relevant factor. In this case, the difference is 60 - that is to say, we need to create 60 times the listed formulation to make 600mL of medicine. For example: 300mg becomes 18g of light magnesium carbonate.
