The Mixtures and Solutions Module has five investigations that engage students with the phenomena of matter and its interactions in our everyday life—mixtures, solutions, solubility, concentration, and chemical reactions. The driving question is what is matter and what happens when samples of matter interact?

Mixtures and Solutions

We then charted any mixtures that they may know: chocolate milk, fruit salad, clothes in the dryer, coffee and creamer, stew, Skittles, etc. I did not differentiate between mixtures and solutions. Students also had the opportunity to sort out pictures into either a mixture or a solution.

Resources By Investigation - FOSS

Students make mixtures of water and solid materials and separate the mixtures with screens and filters. They find that water and salt make a special kind of mixture, a solution, which cannot be separated with a filter but only through evaporation. Students are challenged with a problem: how to separate a mixture of three dry solid materials.
