"This book should be a required reference on the laboratory's safety shelf as no where else is so much useful information available in a single volume." ?Inside Laboratory Management, on the Second Edition "...a portable reference on reactive substances to guide all personnel...in charge of the handling, storage, and transportation of chemical materials." ?Journal of the American Chemical Society, on the Second Edition The authoritative resource on dangerous chemical interactions now enlarged, revised, and even more useful. The term "incompatibilities" describes a wide range of chemical reactions that produce undesirable results in noncontrolled situations: the generation of toxic gases, fire, explosions, corrosive activity, polymerization, ruptured containers, creation of more dangerous compounds, and the like. A portable and easy-to-use reference on reactive substances commonly found in commerce, the Wiley Guide to Chemical Incompatibilities, Third Edition compiles hard-to-find data on over 11,000 chemical compounds, providing chemists, technicians, and engineers a thorough, lightning-quick resource to use during experimental preparation and in the event of an emergency. More than a revision of the previous edition, this Third Edition has been rewritten and expanded to broaden coverage and improve its usefulness. It contains nearly 9,000 chemical incompatibility profiles and nearly 250 new entries, covering flammability, violent and explosive binary reactions, incompatibilities, and reactions that may result from physical change. Alphabetical organization provides concise incompatibility profiles for thousands of commonly used commercial chemicals, allowing readers to look up a given substance and instantly learn whether it is incompatible with common materials, other chemical substances, structural materials, or personal protective equipment. New for the Third Edition: Chemicals that have the potential to cause disasters Chemical formulas and autoignition temperatures More flash points, as well as molecular formulas, lower and upper explosive limits, autoignition temperatures, and NFPA®-type (Red) numerical fire codes Safety reminders All entries keyed by CAS numbers to eliminate possible confusion among synonyms Spanish-, French-, and German-language entries for international use Revised glossary helps users who may not be chemists with general chemical terms

With thousands of new entries and easy-to-use organization, the Third Edition of the Wiley Guide to Chemical Incompatibilities remains a handy resource for all safety, first-response, and plant management professionals responsible for the handling, storage, and conveyance of chemical materials.

A professional introduction to the end-to-end process of digital filmmaking! The EDCF Guide to Digital Cinema Production sheds light on the ongoing and confusing transition from analog to digital technology in film production. In addition to a complete analysis of technical concerns, this text deals with a number of issues where European and Hollywood priorities differ. It adds fuel to the discussion on "Photo-Chemical Fundamentalism" and the future of traditional film-based cinematography. With special emphasis on new HD production techniques for the big cinema screen, this guide is the one and only resource available from a European perspective. The EDCF Guide to Digital Cinema Production provides film professionals and decisions-makers in European cinema with an excellent basis for discussions on how to handle the transition from analog to digital technology. Look no further for: \* Several production case studies, among them Ingmar Bergman's last film "Saraband" (2003) and Lars von Trier's "Dogville" (2003). \* Surveys of HD Systems & Cameras and "The 37 MFAQ on HD Production." \* Expert reports on Audio Recording for HD and the Digital Intermediate Process. \* Detailed European initiatives in Digital Cinema. \* An up-to-date survey of the problematic standards situation for Digital Cinema. \* A comprehensive look at archiving - the "Achilles Heel" of digital production. \* The pros and cons of producing feature films digitally - a unique and professional view of "the agony and ecstasy." Editor-in-Chief Lasse Svanberg is a founding member of EDCF. He was DoP on 14 feature films 1966-81, founded TM (Technology & Man) Magazine at the Swedish Film Institute in 1968 and was its Chief Editor until 1998 He was elected Fellow of BKSTS 1979, Fellow of SMPTE 1995 and granted Professor's title by the Swedish Government 2002. He is the author of six books on the history and possible future of film, video and television. The European Digital Cinema Forum (EDCF) was constituted in June 2001 as joint Swedish-British-French effort to establish a European forum for discussions, information exchange and industrial activities in the field of Digital Cinema. This project was initiated because digital production, digital distribution and digital exhibition of film is the most radical technical change facing the film industry since sound film was introduced. \* Perfect for the serious film professional working in Europe today \* An end-to-end guide on digital film production emphasis on high definition \* Packed with international case studies including the new Ingmar Berman film Saraband
