C++ is the language of choice for thousands of applications and millions of lines of code. With C++/CLI, developers can integrate existing C++ code into the .NET platform without rewriting their applications. This book explores the C++/CLI syntax, teaches how to mix native C++ and managed .NET code, and shows how to

integrate C++ with Windows Forms, WPF (Avalon), and WCF (Indigo). Imagine taking a C++-based program you've been using for a decade and giving it a snazzy new interface using Windows Presentation Foundation. How about making your old business applications talk to your new ones using Windows Communication Foundation. C++/CLI makes this--and more--possible. C++/CLI in Action shows you how to bridge the gap between your existing C++ code and the .NET platform. C++/CLI in Action will help you if: You're hesitant to migrate to .NET because it means rewriting code in C# or VB. You have significant C++ expertise that you want to leverage in the .NET. You only need to use pieces of the .NET framework, such as Windows Forms or web services. There's no fluff here. Designed for readers who already know C++, this book starts by teaching the unique aspects of the C++/CLI language. After a quick tour through the basics, readers work through examples of integrating standard C++ into the .NET-based applications and building programs that mix C++ and .NET code for maximum performance and efficiency. Author: Im Still Here: A New Philosophy of Alzheimers Care
A global support missing for many people living with dementia is integration into their life-long religious communities. Meanwhile, among powerful emotional connections alive in the brains of persons with dementia are those linked to their spiritual, often religious, life. This holds for the music, arts, prayers, chants, and rituals of all faiths
Christianity, Islam, Judaism, Buddhism and Hinduism among them. Religious rituals are learned and remembered through the brains procedural learning system
a brain capacity that is healthy long into the condition of dementia.
Molly Henning in her detailed and carefully structured Cords of Grace: A faith-based support group guide for those with memory loss and their care partners applies significant lessons of secular dementia theorists such as Tom Kitwood, Peter Whitehouse, Naomi Feil, and my own Im Still Here approach to create a support group curriculum for Christ-

centered denominations
Anglican, Methodists, Roman Catholics, Presbyterians among them. Her title drawn from scripture: I led them with cords of human kindness, with ties of love refers to universal spiritual characteristics of empathy and compassion a profound message of all religions. Henning goes beyond structuring a particular religious basis for dementia support, in all persons, regardless of religious faith. Henning points out that these activities raise the levels of neurotransmitters in the brain that make us all feel good chemicals of well-being [that] persist in the brain whether we remember why or not enduring physical benefit to these activities that enhances quality of life. The structure of this intriguing book serves as a model for other religious groups
monthly themes and exercises to engage persons with dementia through spiritual texts, songs, prayers, poems, paintings, sculpture, meditations, and illustrative photographs all powerful magnets for still strong emotional procedural memories. The Rev. Jack Gabig, Ph.D., Assoc. Professor of Practical Theology, Trinity School for Ministry, Ambridge, PA This is a tool

that is biblical, practical and very pastoral, to help care for those whose needs often go unnoticed or misunderstood. It will be useful not only to those under our pastoral charge but also may help the church reach out to those who need support and may not know where to look.

Philanthropy – the use of private resources for public purposes – is undergoing a transformation, both in practice and as an emerging field of study. Expectations of what philanthropy can achieve have risen significantly in recent years, reflecting a substantial, but uneven, increase in global wealth and the rolling back of state services in anticipation that philanthropy will fill the void. In addition to this, experiments with entrepreneurial and venture philanthropy are producing novel intersections of the public, non-profit and private spheres, accompanied by new kinds of partnerships and hybrid organisational forms. The Routledge Companion to Philanthropy examines these changes and other challenges that philanthropists and philanthropic organisations face. With contributions from

an international team of leading contemporary thinkers on philanthropy, this Companion provides an introduction to, and critical exploration of, philanthropy; discussing current theories, research and the diverse professional practices within the field from a variety of disciplinary perspectives. The Routledge Companion to Philanthropy is a rich and valuable resource for students, researchers, practitioners and policymakers working in or interested in philanthropy.

Implementing Cisco IP Routing (ROUTE) Foundation Learning Guide is a Cisco authorized, self-paced learning tool for CCNP preparation. This book teaches readers how to design, configure, maintain, and scale routed networks that are growing in size and complexity. The book covers all routing principles covered in the CCNP Implementing Cisco IP Routing course. As part of the Cisco Press Self-Study series, Implementing Cisco IP Routing (ROUTE) Foundation Learning Guide provides comprehensive foundation learning for the CCNP ROUTE exam. This revision to the popular Foundation Learning Guide format for Advanced Routing at the Professional level is fully updated to include complete coverage of all routing topics covered in the new Implementing Cisco IP Routing (ROUTE) course. The proposed book is an intermediate-level text, which assumes that readers have been exposed to beginner-level networking concepts

contained in the CCNA (ICND1 and ICND2) certification curriculum. No previous exposure to the CCNP level subject matter is required, so the book provides a great deal of detail on the topics covered. Each chapter opens with a list of objectives to help focus the reader's study. Configuration exercises at the end of each chapter and a master lab exercise that ties all the topics together in the last chapter help illuminate theoretical concepts. Key terms will be highlighted and defined throughout. Each chapter will conclude with a summary to help review key concepts, as well as review questions to reinforce the reader's understanding of what was covered.

[Expert Visual C++/CLI Foundations of C++/CLI](#) Saving the world's flora and fauna, especially high-profile examples such as chimpanzees, whales and the tropical rain forests, is big

business. Individuals and companies channel their resources to the preservation of nature through various ways, one of which is the funding of environmental non-governmental organizations (ENGOS) and community-based organizations (CBOs). This book is the first to comprehensively address this issue and focus on a dominant theme in environmental philanthropy, the links between ENGOS and CBOs and their sponsors, especially the private sector. It has been argued that donor support is based on recipient's perceived expertise and needs, with no favouritism of flagship environmental organizations as recipients of donor funds. A counterview holds that the private sector prefers to fund mainstream ENGOS for environmental research and policy reforms congenial to industrial capital. The authors show that the debate about these arguments, together with the empirical evidence on which they are based, may shed light on certain aspects of the nature of environmental philanthropy. The book evaluates practical examples of environmental philanthropy from Africa and elsewhere against philosophical questions about the material and geographical expressions of philanthropy, and the North-South connections among philanthropists and ENGOS and CBOs.
