Incorporated

One of the most complete nursing  
education learning systems available,  
Virtual Clinical Excursions is an online  
program that guides you through a  
virtual hospital where the patients are  
real and their conditions are constantly  
changing. By immersing students in a  
realistic, yet safe, nursing environment,  
VCE simulates the average clinical  
rotation by allowing users to conduct a  
complete assessment of a patient and  
set priorities for care, collect  
information, analyze and interpret data,  
prepare and administer medications,  
and reach conclusions about complex  
problems. Each lesson has a textbook  
reading assignment and activities based  
on "visiting" the patients in the hospital -  
providing a perfect environment to  
"practice" what you are learning. Online  
workbook includes a set of lessons to  
prepare and guide you through a variety  
of patient scenarios, which are all  
connected to your textbook. Physical  
examination interactions include unique
