powerful guide for leaders in any field. He recalls the surprising history of his company, starting with its roots in his father's small construction business, which Sharp joined after getting a degree in architecture. Shifting into hotels wasn't easy, and he learned by trial and error. His breakthrough was a vision for a new kind of hotel, featuring superior design, top-quality amenities, and, above all, a deep commitment to service. Sharp realized that customers would gladly pay extra for a "home away from home" experience. But that would be possible only if everyone—from managers and supervisors to bellmen, servers, and housekeepers—was fully engaged. The front-

line staff, who have the most contact with guests, can make or break a five-star reputation. Readers will be fascinated to learn how Four Seasons does it, year after year, in more than thirty countries around the world.

In the run-up to a contentious 2020 presidential election, the much-maligned American voter may indeed be wondering, “How did we get here?” A Citizen’s Guide to the Political Psychology of Voting offers a way of thinking about how voters make

decisions that provides both hope and concern. In many ways, voters may be able to effectively process vast amounts of information in order to decide which candidates to vote for in concert with their ideas, values, and priorities. But human limitations in information processing must give us pause. While we all might think we want to be rational information processors, political psychologists recognize that most of the time we do not have the time or the motivation to do so. The question is, can voters do a “good enough” job even if they fail to account for everything during the campaign?

Evidence suggests that they can, but it isn’t easy. Here, Redlawsk and Habegger portray a wide variety of voter styles and approaches—from the most motivated and engaged to the farthest removed and disenchanting—in vignettes that connect the long tradition of voter survey research to real life voting challenges. They explore how voters search for political information and make use of it in evaluating candidates and their positions. Ultimately, they find that American voters are reasonably competent in making well-enough informed vote

choices efficiently and responsibly. For citizen voters as well as students and scholars, these results should encourage regular turnout for elections now and in the future.

The Unofficial Guide to Las Vegas 2015 Global Oriental There is no way to mistake the ubiquitous trademarked Coca-Cola bottle, or the stylish ads for Absolut Vodka with any of their competitors. How have these companies created this irresistible appeal for their brands? How have they sustained a competitive edge through aesthetics? Bernd Schmitt and Alex Simonson, two leading experts in the emerging field of identity management, offer

clear guidelines for harnessing a company's total aesthetic output -- its "look and feel" -- to provide a vital competitive advantage. Going beyond standard traditional approaches on branding, this fascinating book is the first to combine branding, identity, and image and to show how aesthetics can be managed through logos, brochures, packages, and advertisements, as well as sounds, scents, and lighting, to sell "the memorable experience." The authors explore what makes a corporate or brand identity irresistible, what styles and themes are crucial

for different contexts, and what meanings certain visual symbols convey. Any person in any organization in any industry can benefit from employing the tools of "marketing aesthetics." Schmitt and Simonson describe how a firm can use these tools strategically to create a variety of sensory experiences that will (1) ensure customer satisfaction and loyalty; (2) sustain lasting customer impressions about a brand's or organization's special personality; (3) permit premium pricing; (4) provide legal "trade dress" protection from competitive attacks; (5) lower costs and raise productivity;

and (6) most importantly, create irresistible appeal. The authors show how to manage identity globally and how to develop aesthetically pleasing retail spaces and environments. They also address the newly emergent topic of how to manage corporate and brand identity on the Internet. Supporting their thesis with numerous real-world success stories such as Absolut Vodka, Nike, the Gap, Cathay Pacific Airlines, Starbucks, the New Beetle Website, and Lego, the authors explain how actual companies have developed, refined, and maintained

distinct corporate identities that set them apart from competitors.
