Introductory Accounting, Finance and Auditing for Lawyers, Fourth Edition, continues to be packed with incisive substance on accounting and finance, and also emphasizes the role of auditing in the financial reporting process, an element given substantial new weight under the Sarbanes-Oxley Act. The Fourth Edition reflects the significant developments in the world of accounting, finance and auditing, including those generated by the major scandals such as Enron and the responses generated by Sarbanes-Oxley, from the Act itself, to the Public Company Accounting Oversight Board (PCAOB) to the SEC. The book retains the same basic architecture, narrative style, problems, and pitch to law students as in previous editions, and adds substantial new material. Additions include three entirely new Chapters, several new Sections added to existing Chapters, new Tables, and enhanced technical formatting. New Chapters include Audit Practice, an introduction to the key features of a financial audit including an Illustration and Problem concerning the leading statistical sampling techniques auditors apply in tests of internal control over financial reporting. Another new Chapter is Finance Theory, a rigorous but still introductory account of modern portfolio theory, CAPM and efficient market theory with critiques from behavioral finance inspired in part by the Enron-style accounting scandals. Previous users of the book will find all the familiar Illustrations and Problems, along with a solid dose of new materials geared toward the increasing reliance being placed on auditing, audit committees, and corporate governance in the era ushered in by Sarbanes-Oxley and PCAOB.

An Introduction to Accounting: Accountability in Organisations and Society John Wiley & Sons

Written by one of ANZ 's premier sustainability and social accounting academics, *An Introduction to Accounting: Accountability in Organisations and Society* brings today 's accounting hot topics of corporate accountability, sustainability and social responsibility to life with the only complete textbook created from the ground up for these modern accounting teaching and learning concepts. *An Introduction to Accounting: Accountability in Organisations and Society* takes a unique approach in embracing from the start the notion of accountability for the environment and sustainability in accounting; the structure, content and learning activities provide students with an understanding of accounting 's pervasive and transformative role as a social practice and organisational driver. It shows that environments, ideas and values change; the interconnectivity of society; that the planet must be respected as a resource; and that people are affected/influenced by the information they receive and the way it is presented. It is emphasised that accounting and accountability are key aspects of every person 's life and that the practice of accounting, while often being seen as very technical in nature, has many social implications. Learning accounting through the lens of sustainability and the environment embeds this perspective in students ' minds so that in their careers they will actively seek and use accounting information to make decisions that take into consideration accountability for the environment.
