A Cross-disciplinary Perspective
Guilford Press

In *Hearing Ourselves Think*, cognitive process research moves from the laboratory to the college classroom, where its rich research tradition continues and an important new set of instructional approaches emerges. Each chapter moves from research results to classroom action, providing a direct and important link between research, theory, and practice. The book develops the concept of the research-based classroom in which students actively examine the processes and contexts of reading and writing and then turn their observations into principles for practice. *Hearing Ourselves Think* contributes to a lively new tradition of socio-cognitive research in writing and reading, exploring the dynamics of cognitive processes as they interact with dimensions of the academic context.

A Cultural and Social Approach
Jones & Bartlett Learning

While most children learn to read fairly well, there remain many young Americans whose futures are imperiled because they do not read well enough to meet the demands of our competitive, technology-driven society. This book explores the problem within the context of social, historical, cultural, and biological factors. Recommendations address the identification of groups of children at risk, effective instruction for the preschool and early grades, effective approaches to dialects and bilingualism, the importance of these findings for the professional development of teachers, and gaps that remain in our understanding of how children learn to read.

Implications for parents, teachers, schools, communities, the media, and government at all levels are discussed. The book examines the epidemiology of reading

problems and introduces the concepts used by experts in the field. In a clear and readable narrative, word identification, comprehension, and other processes in normal reading development are discussed. Against the background of normal progress, Preventing Reading Difficulties in Young Children examines factors that put children at risk of poor reading. It explores in detail how literacy can be fostered from birth through kindergarten and the primary grades, including evaluation of philosophies, systems, and materials commonly used to teach reading.

This new volume is the first to focus entirely on automated essay scoring and

evaluation. It is intended to provide a comprehensive overview of the evolution and state-of-the-art of automated essay scoring and evaluation technology across several disciplines, including education, testing and measurement, cognitive science, computer science, and computational linguistics. The development of this technology has led to many questions and concerns. Automated Essay Scoring attempts to address some of these questions including: *How can automated scoring and evaluation supplement classroom instruction? *How does the technology actually work? *Can it improve students' writing? *How reliable is the technology? *How can these computing methods be used to develop

evaluation tools? *What are the state-of-the-art essay evaluation technologies and automated scoring systems? Divided into four parts, the first part reviews the teaching of writing and how computers can contribute to it. Part II analyzes actual automated essay scorers including e-rater™, Intellimetric, and the Intelligent Essay Assessor. The third part analyzes related psychometric issues, and the final part reviews innovations in the field. This book is ideal for researchers and advanced students interested in automated essay scoring from the fields of testing and measurement, education, cognitive science, language, and computational linguistics. **Grade 4** Xlibris

Corporation Trends and Prospects in Metacognition presents a collection of chapters dealing principally with independent areas of empirical Metacognition research. These research foci, such as animal metacognition, neuropsychology of metacognition, implicit learning, metacognitive experiences, metamemory, young children's Metacognition, theory of mind, metacognitive knowledge, decision making, and interventions for the enhancement of metacognition, have all emerged as trends in the field of metacognition. Yet, the resulting research has not converged, precluding an integration of concepts and findings. Presenting a new theoretical framework, Trends and Prospects in Metacognition extends the classical definitions offered by Flavell and Nelson to carry the prospect of more integrated work into the future. By opening the possibility to cross the boundaries posed by traditionally independent research areas, this volume

provides a foundation for the integration of research paradigms and concepts and builds on the relationship between metacognition and consciousness, while integrating basic with applied research. (A Project of the National Council of Teachers of Mathematics) Springer Nature Becoming a Teacher through Action Research, Third Edition skillfully interweaves the stories of pre-service teaching with the process of action research. This engaging text focuses specifically on the needs of pre-service teachers by providing assistance for all stages of the research experience, including guidance on how to select an area of focus, design a culturally-proficient study, collect and interpret data, and communicate findings. With an updated introduction and two new chapters, this revised edition fully develops a convincing response to the framing question of the book, "Why pre-service teacher

action research?" The new edition continues to focus on elements of trustworthy pre-service teacher action research, and provides a more robust overview of research methodology. Using additional activities, charts, and examples, this book offers support during the steps of writing a critical question, data collection, data analysis and the use of analytic memos. New Features in the Third Edition include: New chapters on ongoing data analysis and final data interpretation, which include practice scenarios and examples to give readers a deeper understanding of doing the work of action research processes; An expanded chapter on action research methodology, which includes scaffolds for making methodological decisions, additional practice scenarios, and a revised action research design template; New end-of-chapter Content and

Process Questions to encourage deeper understanding; New examples throughout, expanded additional glossary terms, enhanced literature review guidance, and updated templates to support action research projects; An updated companion website with downloadable templates and additional instructor resources; A revised interior text design to increase the accessibility of the text. This one-of-a-kind guide continues to offer invaluable support for teacher-education students during a critical phase of their professional-and personal-lives.

How Language and Literacy Come

Together, K-2 Oxford University Press on Demand Understanding, Evaluating, and Conducting Second Language Writing Research speaks to the rapidly growing area of second language writing by providing a uniquely balanced approach to L2 writing research. While other books favor either a qualitative or quantitative approach to second language acquisition (SLA) research, this text is comprehensive in scope and does not privilege one approach over the other, illuminating the strengths of each and the ways in which they might complement each other. It also provides equal weight to the cognitive and socio-cultural approaches to SLA. Containing an array of focal studies and suggestions for further reading, this text is the ideal resource for students beginning to conduct L2 writing research as well as for more experienced researchers who wish to expand their approach to conducting research.

Praxis Elementary Education For Dummies with Online Practice Kumon Pub North America Limited
Among the welter of books on critical pedagogy, this volume will be especially valued for its direct focus on early years and elementary educators. Benefiting from the considered views of two veteran teachers of critical pedagogy, the volume is far more than a knowledge-rich resource, offering as it does vital support in applying the tenets of critical pedagogy to classroom practice. Alongside specific examples of teachers engaging in critical pedagogy in elementary and early-childhood classrooms, the material features close analysis and guidance that will help ease teachers into reflective practice in critical pedagogy that is based on praxis—the point at which theory and practice meet and interact. Indeed, the authors move readers even further than this, showing how students as well as teachers can transform their experience of education through critical reflection. After surveying the field of critical pedagogy, the authors discuss the core precepts that inform the classroom practice of critical pedagogues. They move on to discuss how vital these early and elementary years are in forging children's nascent identities. Other topics covered include discrimination, gender issues, the development of social justice projects, and the social transformations that critical pedagogy can manifest in the classroom. Finally, this resource explains how teachers can move forward in their classroom

practice to enhance equity, justice and social responsibility. This book is essential reading for classroom practitioners in early and elementary education, whether neophytes or veterans, who are interested in deploying this powerful educational paradigm in their work.
