Violent crime has been rising sharply in many American cities after two decades of decline. Homicides jumped nearly 17 percent in 2015 in the largest 50 cities, the biggest one-year increase since 1993. The reason is what Heather Mac Donald first identified nationally as the “ Ferguson effect ” : Since the 2014 police shooting death of Michael Brown in Ferguson, Missouri, officers have been backing off of proactive policing, and criminals are becoming emboldened. This book expands on Mac Donald ’ s groundbreaking and controversial reporting on the Ferguson effect and the criminal-justice system. It deconstructs the central narrative of the Black Lives Matter movement: that racist cops are the greatest threat to young black males. On the contrary, it is criminals and gangbangers who are

responsible for the high black homicide death rate. The War on Cops exposes the truth about officer use of force and explodes the conceit of “ mass incarceration. ” A rigorous analysis of data shows that crime, not race, drives police actions and prison rates. The growth of proactive policing in the 1990s, along with lengthened sentences for violent crime, saved thousands of minority lives. In fact, Mac Donald argues, no government agency is more dedicated to the proposition that “ black lives matter ” than today ’ s data-driven, accountable police department. Mac Donald gives voice to the many residents of high-crime neighborhoods who want proactive policing. She warns that race-based attacks on the criminal-justice system, from the White House on down, are eroding the authority of law and putting lives at risk. This book is a call for a more honest and informed debate about policing, crime, and race.

you Love, Laughter, and Good Cheer! Mistletoe Madness What Eve wanted for Christmas was a dancing naked Santa. What she got was her best friend falling in love with her. Radio talk show host, Eve Kingston, would have said her neighbor down the street was one of her best friends in the world. After a simple kiss under the mistletoe, Sam now says he wants to sleep with her. Eve thinks maybe she wants to see Sam dancing naked in a Santa hat. Madness has obviously taken over both of them. Will either of them get their crazy wish for Christmas? Saving Santa Her Marine training hadn't quite prepared her for saving St. Nick Like all bad deeds, her nickname for Nicolas North had finally come back to bite her on the butt. The too nice man she admired was determined to play Santa for the local Christmas parade while some shooting stalker was out there after him. For a

geek, the man could nearly kiss the hard-ass Marine right out of her. Only she couldn't let him. At least not until she'd managed to save Santa. No ELFing Way What's on Dasher Sleigh's list for the holidays? Fixing his blunder with Vixen Dunder. Single dad and widower, Dasher Sleigh, is hoping for a much better Christmas this year. He'd have one too, if he could just talk Vixen and her daughter into spending it with him and Nicky. Playing Bad Santa to Vixen's Sexy Elf is a lot of fun. Next he'd like to see Vixen in his lap and both their children playing under his tree. Vixen says there's no elfing way she's going to let a Bad Santa like him break her heart a second time. Having learned the hard way how short and precious life is, Dash can't handle the thought of missing his second chance. *McDonald's and the Culture of Power* Simon and Schuster
The movie *The Founder*, starring

Michael Keaton, focused the spotlight on Ray Kroc, the man who amassed a fortune as the chairman of McDonald's. But what about his wife Joan, the woman who became famous for giving away his fortune? Lisa Napoli tells the fascinating story behind the historic couple. Ray & Joan is a quintessentially American tale of corporate intrigue and private passion: a struggling Mad Men-era salesman with a vision for a fast-food franchise that would become one of the world's most enduring brands, and a beautiful woman willing to risk her marriage and her reputation to promote controversial causes that touched her deeply. Ray Kroc was peddling franchises around the country for a fledgling hamburger stand in the 1950s—McDonald's, it was called—when he entered a St. Paul supper club and encountered a beautiful young piano player who would change his life forever. The attraction between Ray and Joan was instantaneous and instantly problematic. Yet even the fact that both were married to other people couldn't derail their roller coaster of a romance. To

the outside world, Ray and Joan were happy, enormously rich, and giving. But privately, Joan was growing troubled over Ray's temper and dark secret, something she was reluctant to publicly reveal. Those close to them compared their relationship to that of Elizabeth Taylor and Richard Burton. And yet, this volatility paved the way for Joan's transformation into one of the greatest philanthropists of our time. A force in the peace movement, she produced activist films, books, and music and ultimately gave away billions of dollars, including landmark gifts to the Salvation Army and NPR. Together, the two stories form a compelling portrait of the twentieth century: a story of big business, big love, and big giving. The Sign of the Burger John Wiley & Sons Elements of Fluid Dynamics is intended to be a basic textbook, useful for undergraduate and graduate students in different fields of engineering, as well as in physics and applied mathematics. The main objective of the book is to provide an

introduction to fluid dynamics in a simultaneously rigorous and accessible way, and its approach follows the idea that both the generation mechanisms and the main features of the fluid dynamic loads can be satisfactorily understood only after the equations of fluid motion and all their physical and mathematical implications have been thoroughly assimilated. Therefore, the complete equations of motion of a compressible viscous fluid are first derived and their physical and mathematical aspects are thoroughly discussed. Subsequently, the necessity of simplified treatments is highlighted, and a detailed analysis is made of the assumptions and range of applicability of the incompressible flow model, which is then adopted for most of the rest of the book. Furthermore, the role of the generation and dynamics of vorticity on the development of different flows is emphasized, as well as its influence on the characteristics, magnitude and predictability of the fluid dynamic loads acting on

moving bodies. The book is divided into two parts which differ in target and method of utilization. The first part contains the fundamentals of fluid dynamics that are essential for any student new to the subject. This part of the book is organized in a strictly sequential way, i.e. each chapter is assumed to be carefully read and studied before the next one is tackled, and its aim is to lead the reader in understanding the origin of the fluid dynamic forces on different types of bodies. The second part of the book is devoted to selected topics that may be of more specific interest to different students. In particular, some theoretical aspects of incompressible flows are first analysed and classical applications of fluid dynamics such as the aerodynamics of airfoils, wings and bluff bodies are then described. The one-dimensional treatment of compressible flows is finally considered, together with its application to the study of the motion in ducts. Sample Chapter(s)

The War on Cops Routledge
Creating an environment in which children in the United States grow up healthy should be a high priority for the nation. Yet the prevailing pattern of food and beverage marketing to children in America represents, at best, a missed opportunity, and at worst, a direct threat to the health prospects of the next generation. Children's dietary and related health patterns are shaped by the interplay of many factors—their biologic affinities, their culture and values, their economic status, their physical and social environments, and their commercial media environments—all of which, apart from their genetic predispositions, have undergone significant transformations during the past three decades. Among these environments, none have more rapidly assumed central socializing roles among

children and youth than the media. With the growth in the variety and the penetration of the media have come a parallel growth with their use for marketing, including the marketing of food and beverage products. What impact has food and beverage marketing had on the dietary patterns and health status of American children? The answer to this question has the potential to shape a generation and is the focus of *Food Marketing to Children and Youth*. This book will be of interest to parents, federal and state government agencies, educators and schools, health care professionals, industry companies, industry trade groups, media, and those involved in community and consumer advocacy.

What happens when media and politics become forms of entertainment? As our world begins to look more and more like Orwell's 1984, Neil's Postman's essential guide to the modern media is more relevant than ever. "It's unlikely that Trump has ever read *Amusing Ourselves to Death*, but his ascent would not have surprised Postman." -CNN
Originally published in 1985, Neil Postman's groundbreaking

polemic about the corrosive effects of television on our politics and public discourse has been hailed as a twenty-first-century book published in the twentieth century. Now, with television joined by more sophisticated electronic media—from the Internet to cell phones to DVDs—it has taken on even greater significance. Amusing Ourselves to Death is a prophetic look at what happens when politics, journalism, education, and even religion become subject to the demands of entertainment. It is also a blueprint for regaining control of our media, so that they can serve our highest goals. "A brilliant, powerful, and important book. This is an indictment that Postman has laid down and, so far as I can see, an irrefutable one."

All false, says this provocative book. Neil Rackham and his team studied more than 35,000 sales calls made by 10,000 sales people in 23 countries over 12 years. Their findings revealed that many of the methods developed for selling low-value goods just don't work for major sales. Rackham went on to introduce his SPIN-Selling method. During the mid-1990s, the O.J. Simpson murder trial dominated the media in the United States and were circulated throughout the world via global communications networks. The case became a spectacle of race, gender, class and violence, bringing in elements of domestic melodrama, crime drama and legal drama. According to this fascinating new book, the Simpson case was just one example of what the author calls 'media spectacle' - a form of media culture that puts contemporary dreams, nightmares, fantasies and values on display. Through the analysis of several such media spectacles - including Elvis, The X Files, Michael Jordan, and the Bill Clinton sex scandals - Doug Kellner draws out important insights into

media, journalism, the public sphere and politics in an era of new technologies. In this excellent follow up to his best selling Media Culture, Kellner's fascinating new volume delivers an informative read for students of sociology, culture and media.

Children in today's world are inundated with information about who to be, what to do and how to live. But what if there was a way to teach children how to manage priorities, focus on goals and be a positive influence on the world around them? The Leader in Me is that programme. It's based on a hugely successful initiative carried out at the A.B. Combs Elementary School in North Carolina. To hear the parents of A. B Combs talk about the school is to be amazed. In 1999, the school debuted a programme that taught The 7 Habits of Highly Effective

People to a pilot group of students. The parents reported an incredible change in their children, who blossomed under the programme. By the end of the following year the average end-of-grade scores had leapt from 84 to 94. This book will launch the message onto a much larger platform. Stephen R. Covey takes the 7 Habits, that have already changed the lives of millions of people, and shows how children can use them as they develop. Those habits -- be proactive, begin with the end in mind, put first things first, think win-win, seek to understand and then to be understood, synergize, and sharpen the saw -- are critical skills to learn at a young age and bring incredible results, proving that it's never too early to teach someone how to live well.
