In 1930, Bob Brown predicted that the printed book was bound for obsolescence. The time has come, he insisted, to rid the reader of the cumbersome book. He

invented a machine that would allow one to read books and any text extremely fast and in a hyper abbreviated form. He called these abbreviated texts, with em dashes replacing words: readies. He envisioned sending the condensed texts through wireless networks. The Readies, describes these eponymously named abbreviated texts and his plans for a reading machine, but since he printed only 150 copies, the volume is practically unknown outside of a small circle of scholars. With this new edition, Craig Saper hopes to introduce Bob Brown's Roving Eye Press books to a new generation of readers.

Very nice. But you didn't write to keep it for you. You should publish it. The problem is that the publishers charge high prices for some authors pockets, and do it objectively, due to the high cost of printing. But you allowed that luxury, and now you have a printed book, with you as the author. You can keep hundreds or thousands of volumes in your personal library and give it

as a gift to your friends in special occasions, or try to distribute in various libraries. You managed to distribute it, the book is beautifully placed in shelves. In time, dust is spread on covers. After a while, the book is withdrawn. It remains to use it as decoration at home, or support for various household items. But lucky for you, there is an alternative, cheaper and more effective, in selling your book: e-Books! e-Book and online publishing market has evolved rapidly in recent years, and a lot of companies have entered this market, as publishers, online bookstores, or promoting e-books. TRAVANCORE STATE MANUAL was written in the closing years of the 1800s. It is a fascinating book in that the perspective of historical events that took place in the region known as the Indian Peninsula is

markedly different from what is being taught in current day schools and colleges. There is need to bring this book out in a very readable form. That is what has been attempted here. VED from VICTORIA INSTITUTIONS has written a foreword, which aims to elucidate the various differences in perspective, and also tries to focus on varying issues which are nowadays, hidden away from public knowledge. What ultimately comes out as background of unvarying strength is the fact that the English rule, especially that by the English EAST INDIA COMPANY was really of benign qualities, towards the common man of this area. This book contains the story of an independent kingdom at the southern most end of the Indian Peninsula, which lost its independence in 1947, in the wake of a fool coming to power in England.
