"Architect Tom Kundig is known worldwide for the originality of his work. This paperback edition of Tom Kundig: Houses, first published in 2006, collects five of his most prominent early residential projects, which remain touchstones for him today. In a new preface written for this edition, Kundig reflects on the influence that these designs continue to have on his current thinking. Each house, presented from conceptual sketches through meticulously realized details, is the product of a sustained and active collaborative process among designer, builder, and client. The work of the Seattle-based architect has been called both raw and refined--disparate characteristics that produce extraordinarily inventive designs inspired by both the industrial structures ubiquitous to his upbringing in the Pacific Northwest and the vibrant craft cultures that are fostered there." --

Watch a video introduction here. Statistics Through Applications (STA) is the only text written specifically for high school statistics course. Designed to be read, the book takes a data analysis approach that emphasizes conceptual understanding over computation, while recognizing that some computation is necessary. The focus is on the statistical thinking behind data gathering and interpretation. The high school statistics course is often the first applied math course students take. STA engages students in learning how statisticians contribute to our understanding of the world and helps students to become more discerning consumers of the statistics they encounter in ads, economic reports, political campaigns, and elsewhere. New and improved! STA 2e features expanded coverage of probability, a reorganized presentation of data analysis, a new color design and much more. Please see the posted sample chapter or request a copy today to see for yourself.

Offering a unique and powerful way to introduce the principles of statistical reasoning, Statistical Reasoning in Sports features engaging examples and a student-friendly approach. Starting from the very first chapter, students are able to ask questions, collect and analyze data, and draw conclusions using randomization tests. Is it harder to shoot free throws with distractions? We explore this question by designing an experiment, collecting the data, and using a hands-on simulation to analyze results. Completely covering the Common Core Standards for Probability and Statistics, Statistical Reasoning in Sports is an accessible and fun way to learn about statistics!

How did one long and expensive party change a city forever? World Expo 88 was the largest, longest, and loudest of Australia's bicentennial events. A shiny 1980s amalgam of cultural precinct, shopping mall, theme park, travelogue, and rock concert, Expo 88 is commonly credited as the catalyst for Brisbane's 'coming of age'. So how did an elaborate and expensive party change a city forever? We'll Show the World explores the shifting social and political environment of Expo 88, shaped as much by Queensland's controversial premier Sir Joh Bjelke-Petersen as it was by those who reacted against him. It shows how something initially greeted with outrage, scepticism, and indifference came to mean so much to so many, how a state better known for eliciting insults enchanted much of the nation, and how, to Brisbane, Expo was personal.

Ladybugs, snails, and butterflies! Oh my! This charming introduction to ten garden bugs, paired with friendly text and bold, basic patterns, provides a great high-contrast experience for young developing eyes. Newborns cannot fully recognize colors, so the sharp contrast between black and white patterns and illustrations allows babies to follow along and make connections to the real world, an important building block for communication skills. Using simple greetings like "Hello, bumblebee" and "Good to see you, dragonfly" alongside black-and-white art by Julissa Mora, Hello, Garden Bugs is the perfect board book for babies just beginning to look around and learn about their world. Featured in Omnivoracious. Also available: Hello, Baby Animals and Hello, Ocean Friends. Coming soon: Hello, My World.

From the author of the popular Tea Shop Mysteries comes the first in a cozy crafting mystery series! New Orleans scrapbooking shop owner Carmela Bertrand delights her customers with her stunning arrangements of their scrapbooks. But among her clients' keepsakes she finds a tip of her own—about a murder... Business is booming and life is cozy for Carmela at her scrapbooking shop, Memory Mine. But when one of the city's elite dies during Mardi Gras, the police name Carmela's estranged husband as their number one suspect. Although Carmela hasn't forgotten how he scrapped their marriage, she doesn't think he is cut out to be a killer. And if Shamus is being framed, Carmela might be the only one who can find the pattern and solve the case in time...

First published in 1987, Professor O'Sullivan's work provides an in depth philosophical examination of the foundations of method in Economics and other human sciences. The argument is unabashedly dialectical in the great Socratic-Platonic tradition, and the reissue will be very welcome to all students of methodology, in particular those students of economic methodology seeking a refreshing alternative to yet more mathematical game playing. In an age dominated and perhaps to an extent perplexed by an ultimately non-committal postmodernism the book provides a root and branch critique of the epistemological relativism which must lie at the root of the whole post-modernist approach; and in reasserting the fundamental importance not only for the methods of science but also for European civilisation of the pursuit of truth it takes a stance which is very much against the tide of the times. A heterodox perspective is also provided and defended in detail regarding the real nature of economic methodology whereby it is shown that Economics epitomises a teleological mode of explanation which is significantly different from the efficient causal modes of explanation of the natural sciences. In fact Economics is the ultimate subjectivist/interpretative discipline in the methodological sense of Max Weber and Alfred Schutz, a fact which has only been recognised (and welcomed) in the Austrian school of Economics.

A series of high-profile events in recent years have highlighted the growing need to cover ethical issues in international business and raise awareness of the responsibilities that need to be integrated into all levels and all subjects. Utilising the knowledge from a wide selection of expert contributors and illuminated by a case study for each chapter, this comprehensive volume makes a compelling case for business ethics to become an integrated consideration across the business disciplines, rather than an afterthought in the curriculum.
