Why can't we solve our problems anymore? Why do threats such as the Gulf oil spill, worldwide recession, terrorism, and global warming suddenly seem unstoppable? Are there limits to the kinds of problems humans can solve? Rebecca Costa confronts- and offers a solution to-these questions in her highly anticipated and game-changing book, The Watchman's Rattle. Costa pulls headline for today's news to demonstrate how accelerating complexity quickly outpaces that rate at which the human brain can develop new capabilities. With compelling evidenced based on research in the rise and fall of Mayan, Khmer, and Roman empires, Costa shows how t ht tendency to find a quick solutions- leads to frightening long term consequence: Society's ability to solve its most challenging, intractable problems becomes gridlocked, progress slows, and collapse ensues. A provocative new voice in the tradition of thought leaders Thomas Friedman, Jared Diamond and Malcolm Gladwell, Costa reveals how we can reverse the downward spiral. Part history, part social science, part biology, The Watchman's Rattle is sure to provoke, engage and incite change.

Thinking Our Way Out of Extinction CRC Press
There are more conflicts than ever in the world, more than 75 years after World War II. Question is: Have we really made a big effort to ban war? War has become an industry. Trillions of dollars are spent yearly on this machinery of mass destruction. The cost of destruction is massive. Whole countries are bombed to pieces in endless wars and millions of people lose their lives. We have come to justify violence as a legitimate way to intervene in conflicts. It is time to disrupt this way of thinking. We can prevent war, build peace and make an impact. That is the point of entry of this practical guide which has an ambitious goal: let us all become peacebuilders and impact leaders and create an Economy of Peace. The guide describes a methodology and approach to peacebuilding which starts with an inner journey of self-discovery and self-awareness. The peacebuilding model that has been developed revolves around four important values: trust, empathy, respect and integrity. The idea is to make business of peace and to think about peace in terms of value and social impact. With concepts borrowed from business management, an innovative perspective to peace is presented which challenges us to think about peace as the best value proposition for a better world after COVID-19. The guide is written in a comprehensive style and consists of a train the trainer program, a theoretical framework underpinning the models that are used and a toolkit with exercises. The author and her colleagues whom she collaborated with, offer a practical, easy-to-use and innovative approach built on extensive experience and having worked with hundreds of people from war-torn countries, having visited many conflict zones and lived under junta ’ s and repressive regimes herself. A peaceful world is possible. This guide is a starting point to make it happen.

New Directions in English Language Teaching: Issues,Practices, Challenges attempts to

create a comprehensive vision of critical and culturally relevant English teaching methodologies at the cusp of the 21st century. The present book is multi-voiced. It includes perspectives from classroom teachers, teacher educators and researchers in language and literacy, positioned to respond to recent changes in national conversations about literacy, learning and assessment. These vividly situated authors also recognise the rapidly changing demographics in colleges, the changing nature of teaching English in the digital age, and increasing demands for teaching pedagogies. This book is critically placed at the juncture of numerous directions in novel techniques. At all times, education is a political act, and colleges are embedded with a socio-culture reality that benefits some at the expense of others. Therefore the approach advocated through many of the chapters is one of critical literacy where English students gain reading and writing skills and proficiency with digital technologies that allow them to become more able, discerning, and empowered consumers and producers of texts.

This work proposes a theological investigation of the community of the Church as outlined by liberation theology and a possible conversation with liberation from suffering in Tibetan Buddhism. What unites both is the human process of sublimation for others, whereby liberation theologians as well as enlightened lamas give the best of themselves for the liberation of others. At this stage of discussions between inclusivists and exclusivists this work proposes that dialogue with world religions and therefore with Buddhism is not about finding possible dogmatic similarities but a common place, a common purpose through a common humanity.

This first English translation of the Asokavadana text, the Sanskrit version of the legend of King Asoka, first written in the second century A.D. Emperor of India during the third century B.C. and one of the most important rulers in the history of Buddhism. Asoka has hitherto been studied in the West primarily from his edicts and rock inscriptions in many parts of the Indian subcontinent. Through an extensive critical essay and a fluid translation, John Strong examines the importance of the Asoka of the legends for our overall understanding of Buddhism. Professor Strong contrasts the text with the Pali traditions about Kind Asoka and discusses the Buddhist view of kingship, the relationship of the state and the Buddhist community, the king s role in relating his kingdom to the person of the Buddha, and the connection between merit making, cosmology, and Buddhist doctrine. An appendix provides summaries of other stories about Asoka.

Linked Data Management presents techniques for querying and managing Linked Data that is available on today's Web. The book shows how the abundance of Linked Data can serve as fertile ground for research and commercial applications. The text focuses on aspects of managing large-scale collections of Linked Data. It offers a detailed introduction to Linked Data and related standards, including the main principles distinguishing Linked Data from standard database technology. Chapters also describe how to generate links between datasets and explain the overall architecture of data integration systems based on Linked Data. A large part of the text is devoted to query processing in different setups. After presenting methods to publish relational data as Linked Data and efficient centralized processing, the book explores lookup-based, distributed, and parallel solutions. It then addresses advanced topics, such as reasoning, and discusses work related to read-write Linked Data for system interoperation. Despite the publication of many papers since Tim Berners-Lee developed the Linked Data principles in 2006, the field lacks a comprehensive, unified overview of the state of the art. Suitable for both researchers and practitioners, this book provides a thorough, consolidated account of the new data publishing and data

integration paradigm. While the book covers query processing extensively, the Linked Data abstraction furnishes more than a mechanism for collecting, integrating, and querying data from the open Web—the Linked Data technology stack also allows for controlled, sophisticated applications deployed in an enterprise environment.

The Legend of King A?oka FON

The Mesoamerican population who lived near the indigenous cultivation sites of the "Chocolate Tree" (Theobromo cacao) had a multitude of documented applications of chocolate as medicine, ranging from alleviating fatigue to preventing heart ailments to treating snakebite. Until recently, these applications have received little sound scientific scrutiny. Rather, it has been the reputed health claims stemming from Europe and the United States which have attracted considerable biomedical attention. This book, for the first time, describes the centuries-long quest to uncover chocolate's potential health benefits. The authors explore variations in the types of evidence used to support chocolate's use as medicine as well as note the ongoing tension over categorizing chocolate as food or medicine, and more recently, as functional food or nutraceutical. The authors, Wilson an historian of science and medicine, and Hurst an analytical chemist in the chocolate industry, bring their collective insights to bear upon the development of ideas and practices surrounding the use of chocolate as medicine. Chocolate's use in this manner is explored first among the Mesoamerican peoples, then as it is transported to Europe, and back into Colonial North America. The authors then focus upon more recent bioscience experimental undertakings which have been aimed to ascertain both long-standing and novel suggestions as to chocolate's efficacy as a medicinal and a nutritional substance. Chocolate/s reputation as the most craved food boosts this book's appeal to food and biomedical scientists, cacao researchers, ethnobotanists, historians, folklorists, and healers of all types as well as to the general reading audience.

From pre-Columbian times to the environmental justice movements of the present, women and men frequently responded to the environment and environmental issues in profoundly different ways. Although both environmental history and women's history are flourishing fields, explorations of the synergy produced by the interplay between environment and sex, sexuality, and gender are just beginning. Offering more than biographies of great women in environmental history, Beyond Nature's Housekeepers examines the intersections that shaped women's unique environmental concerns and activism and that framed the way the larger culture responded. Women featured include Native Americans, colonists, enslaved field workers, pioneers, homemakers, municipal housekeepers, immigrants, hunters, nature writers, soil conservationists, scientists, migrant laborers, nuclear protestors,

and environmental justice activists. As women, they fared, thought, and acted in ways complicated by social, political, and economic norms, as well as issues of sexuality and childbearing. Nancy C. Unger reveals how women have played a unique role, for better and sometimes for worse, in the shaping of the American environment.

Chocolate as Medicine Harper Collins

Sister to Queen Anne Boleyn, seduced by two kings, she was an intimate player in one of history’s most gripping dramas. Yet much of what we know about Mary Boleyn has been fostered through garbled gossip, romantic fiction, and the misconceptions repeated by historians. Now, in her latest book, New York Times bestselling author and noted British historian Alison Weir gives us the first ever full-scale, in-depth biography of Henry VIII’s famous mistress, in which Weir explodes much of the mythology that surrounds Mary Boleyn and uncovers the truth about one of the most misunderstood figures of the Tudor age. With the same brand of extensive forensic research she brought to her acclaimed book *The Lady in the Tower*, Weir facilitates here a new portrayal of her subjects, revealing how Mary was treated by her ambitious family and the likely nature of the relationship between the Boleyn sisters. She also posits new evidence regarding the reputation of Mary’s mother, Elizabeth Howard, who was rumored to have been an early mistress of Henry VIII. Weir unravels the truth about Mary’s much-vaunted notoriety at the French court and her relations with King François I. She offers plausible theories as to what happened to Mary during the undocumented years of her life, and shows that, far from marrying an insignificant and complacent nonentity, she made a brilliant match with a young man who was the King’s cousin and a rising star at court. Weir also explores Mary’s own position and role at the English court, and how she became Henry VIII’s mistress. She tracks the probable course of their affair and investigates Mary’s real reputation. With new and compelling evidence, Weir presents the most conclusive answer to date on the paternity of Mary’s children, long speculated to have been Henry VIII’s progeny. She also explains why there is barely a mention of Mary in historical records at the time of Anne Boleyn’s notorious fall in 1536. Alison Weir has drawn fascinating information from the original sources of the period to piece together a life steeped in mystery and misfortune, debunking centuries-old myths and disproving accepted assertions, to give us the truth about Mary Boleyn, the so-called great and infamous whore.

According to legend the Constantinian Order is the oldest chivalric institution, founded by Emperor Constantine the Great and governed by successive Byzantine Emperors and their descendants. While this chronology was supported by multiple writers even into the twentieth century, it has little historical basis. Nonetheless, the Angeli, Farnese and Bourbon families which held the Grand Mastership could legitimately claim Byzantine imperial descent, albeit in the female line, and the Order’s cross replicates that seen by Constantine in the vision recorded by both Lactantius and Eusebius, writing very soon after Maximian’s defeat at the battle of the Milvian Bridge. The Order’s emergence in the middle of the sixteenth century, when Christian Europe was under assault from a militant Ottoman empire, gained Papal support almost immediately and by the end of the seventeenth century the Order had mem-bers across the Italian peninsular, in Spain, Bavaria, Austria and Bohemia, Croatia and Poland. Today the majority of the Order’s members are found in Italy and Spain but there are also members in Portugal, France, Belgium, Great Britain and Luxembourg, with smaller groups in the Netherlands, Germany and Sweden as well as an expanding membership in the United States. This work examines the conversion of Constantine and the histories of the Angeli, Farnese and Bourbon Grand Masterships, with extensive reference to hitherto unpub-lished documents in the Vatican archives and in the Farnese and Bourbon archives in Naples. These serve to confirm the close relationship the Order had with the Church and the high regard in which it was held by successive Popes, as well as its autonomy as a subject of canon law independent from any crown or temporal sovereignty. This unique status has enabled its hereditary Grand Masters to maintain this dignity after the absorption of the former Kingdom of the Two Sicilies into a united Italy. The Order’s autonomy, coupled with the Grand Master’s close links to the Spanish Crown, has meant that Spanish and Italian citizens (as well as the citizens of several other states which have accorded the Order recognition) may obtain official permission to wear the Order’s decorations. 2018 is the three hundredth anniversary of the Papal Bull Militantis Ecclesiae which confirmed and approved the previous Papal acts concerning the Order and laid out the rights and privileges of the Order, its Grand Masters and members. In the early 20th century Pope Saint Pius X and Benedict XV conferred further privileges on the Order, ap-proving the statutes, while the then future Pope Pius XII had been admitted to the Order in 1913. Today the Order is engaged in works of charity, in conformity with the Church’s teachings, and includes among its members some thirteen Cardinals as well as some thirty members of reign-ing or former reigning families.
