The Rough Guide to the Energy Crisis is a comprehensive guide to the workings of today's energy world, explaining the seductive nature of fossil fuels and the reasons why international climate change negotiations are proving so difficult. If you're interested in escaping the trap of fossil fuels and moving to a low carbon world, this is the guide for you. Realistically looking at the pitfalls, pressures and prospects for renewable energy, The Rough Guide to the Energy Crisis also shows that there is hope in new energy conservation techniques, made possible by smart grids and smart metering. You'll also discover energy security issues and future tensions that could occur, like the possibility of the lights going out, jeopardising public support for a world of cleaner energy.

Car and Driver Dundurn

Phil Edmonston, Canada's automotive "Dr. Phil," pulls no punches. He says there's never been a better time to buy a new car or truck, thanks to a stronger Canadian dollar and an auto industry offering reduced prices, more cash rebates, low financing rates, bargain leases, and free auto maintenance programs. In this all-new guide he says: Audis are beautiful to behold but hell to own (biodegradable transmissions, "rodent snack" wiring, and mind-boggling depreciation) Many 2011-12 automobiles have "chin-to-chest head restraints, blinding dash reflections, and dash gauges that can't be seen in sunlight, not to mention painful wind-tunnel roar if the rear windows are opened while underway Ethanol and hybrid fuel-saving claims have more in common with Harry Potter than the Society of Automotive Engineers GM's 2012 Volt electric car is a mixture of hype and hypocrisy from the car company that "killed" its own electric car more than a decade ago You can save \$2,000 by cutting freight fees and "administrative" charges Diesel annual urea fill-up scams can cost you \$300, including an \$80 "handling" charge for \$25 worth of urea Lemon-Aid's 2011-12 Endangered Species List: the Chinese Volvo, the Indian Jaguar and Land Rover, the Mercedes-Benz Smart Car, Mitsubishi, and Suzuki English Mechanic and Mirror of Science and Art Dundurn Recently appointed as the new U. S. Poet Laureate, Ted Kooser has been writing and publishing poetry for more than forty years. In the pages of The Poetry Home Repair Manual, Kooser brings those decades of experience to bear. Here are tools and insights, the instructions (and warnings against instructions) that poets—aspiring or practicing—can use to hone their craft, perhaps into art. Using examples from his own rich literary oeuvre and from the work of a number of successful contemporary poets, the author schools us in the critical relationship between poet and reader, which is fundamental to what Kooser believes is poetry's ultimate purpose: to reach other people and touch their hearts. Much more than a guidebook to writing and revising poems, this manual has all the comforts and merits of a long and enlightening conversation with a wise and patient old friend—a friend who is willing to share everything he's learned about the art he's spent a lifetime learning to execute so well.

With 18 years of research on the Pontiac Grand Prix, Don Keefe takes the reader on a voyage that covers nearly a half century, from the earliest design sketches of the late 1950s, bringing the concept to market, all production figures to date, to the exciting Grand Prix of today. Not simply a rosy depiction of the Grand Prix's history, the author also deals frankly with the darkest days of the 1970s and 1980s, leading to its rebirth as an exciting front-drive sport coupe. Also covered are experimental, showcar, and specialty versions of the Grand Prix.
