There are
many things
you can do
with paper but

what can paper do for you? Discover paper's true potential with this book full of exciting projects that enable you to discover new paper arts, such as pop ups, papercuts and 3-D shapes. Learn how paper can be used to communicate ideas, how it can be photographed and lit to great effect and even how it can be animated. Develop skills in construction, tessellation,

model making and scene creating, while also working with scale and moving parts. Paper has never been more fun and more intriguing. Projects include: animal masks, ice creams, shadow puppets, tropical island, Ferris wheel, 3-D pig, car, lantern, geometric mobile, paper food, pop-up greetings card, paper theatre, giant pencil, and many more.

With over 250,000 followers it has taken on cult status in the international craft community,

and that is purely down to Kates fresh, contemporary and beautifully explained and executed craft projects. With a book for children already under her belt, this publication focuses more on adults with 33 pieces including paper gems, an origami lampshade, macrame hangings, pop-up pixel cards, hama bead candle holders, and tie-dyed furoshiki cloths. The ideas range in complexity from the simple to the advanced, but each one is totally unique and has never before been

published. The look of the book will reflect the immaculate, Japanese-inflected minimalism of the MiniEco website, with some high-end production finishes including a die-cut, dust-jacketed paperback binding and boldly pared-back photography. QR codes will link to animated gifs of the craft being made. Say It With Paper Transform Your Home Into a Blooming Garden That Lasts Forever
Chantal Larocque 's paper flower designs have garnered international attention—you can

find her blooms in Madison Avenue storefronts, on fashion designer clothing lines, in wedding magazines around the world and at soirees hosted by celebrities such as Lauren Conrad and Ali Larter. With this book, Chantal reveals her coveted secrets so you can easily and affordably create the same dazzling blooms for your home, office, wedding or other special event.

Chantal 's unique use of cardstock not only makes the flowers easy to craft, but it also gives them her signature bold and full look that makes a statement wherever the blooms are displayed. You 'll learn to make popular flowers such as the peony, rose, dahlia, daisy and succulent, plus Chantal 's imaginative designs

and large-scale backdrop flowers. Step-by-step photos and templates for every flower and leaf ensure that you can follow along smoothly and enjoy the creative process. Within the pages of **Bold & Beautiful Paper Flowers**, discover a colorful new craft and the joy of creating these delightful works of art for yourself and loved ones.

 A wonderfully entertaining and instructive compilation of 3D paper crafts.
 Art and Craft with Paper (Arts and Crafts for Kids - 3D Paper Cars)
 An investigation of

the computational turn in visual culture, centered on the entangled politics and pleasures of data and images. If the twentieth century was tyrannized by images, then the twenty-first is ruled by data. In Technologies of Vision, Steve Anderson argues that visual culture and the methods developed to study it have much to teach us about today's digital culture; but first we must examine the historically entangled relationship between data and images. Anderson

starts from the supposition that there is no great divide separating pre- and post-digital culture. Rather than creating an insular field of new and inaccessible discourse, he argues, it is more productive to imagine that studying “ the digital ” is coextensive with critical models—especially the politics of seeing and knowing—developed for understanding “ the visual. ” Anderson's investigation takes on an eclectic array of examples ranging

from virtual reality, culture analytics, and software art to technologies for computer vision, face recognition, and photogrammetry. Mixing media archaeology with software studies, Anderson mines the history of technology for insight into both the politics of data and the pleasures of algorithms. He proposes a taxonomy of modes that describe the functional relationship between data and images in the domains of space, surveillance and data visualization.

At stake in all three are tensions between the totalizing logic of data and the unruly chaos of images.
