The basic structure of the EOS Rebel T8i/850D camera is similar to that of its predecessor model EOS Rebel T6i. This camera has a 24 Megapixel APS-C sensor. The new generation

---

sensor with a dual-chip can capture very good images in high-contrast conditions. Due to the presence of the Dual-Chip CMOS AF sensor, it is much faster and has a much larger coverage area. It is possible to make some good photos by using the Dual-Chip CMOS AF sensor. It helps in improved AF and AF-C performance as compared to the EOS Rebel T6i. Furthermore, the user can use this camera in low-light situations. In the photos captured in low

light, it is possible to see a very bright bokeh effect. Also, it has better autofocus ability than the EOS Rebel T6i. The maximum ISO can be set up to 16000 and the range of ISO 100-32000. Its electronic shutter is faster than the EOS Rebel T6i. It has a new AF algorithm that makes it possible to track the subject with very little user effort. The camera can also shoot videos in 4K resolution at 30 frames per second. The previous model EOS

Rebel T6i can shoot videos only in HD resolution. This camera features a Live View Finder, which can display what is in the viewfinder on the screen. The screen can be tilted up and down from the right side of the camera. The built-in pop-up flash can be attached to the camera to allow users to click portraits with no flash. The viewfinder and the rear LCD are always shown on the top plate and the sensitivity can be adjusted. This is the

Canon EOS Rebel T5/1200D For Dummies

Independently Published

The Canon EOS Rebel T8i (also known as the EOS 850D or Kiss X10i in some markets) is a 24MP DSLR camera that is compatible with the company's EF and

---

EF-S mount lenses. It has an optical viewfinder, but it also has a usable and responsive touchscreen interface and lives view experience that's a match for the company's mirrorless camera options. For much of the world, shifting consumer preferences towards mirrorless cameras have left DSLRs looking like relics of history, though Europe and the Americas remain

holdouts. Last year, Europeans still bought about 1.4 DSLRs for every mirrorless camera sold, while in the Americas the ratio was even higher at 1.7:1. So why might you consider a DSLR in our increasingly mirrorless world? Some photographers still prefer DSLRs for their crisp, lag-free through-the-lens viewfinders, and there's a much wider array of lenses available to DSLR

shooters without the need for adapters. The guide discussed in detail all of the basic settings in the latest camera that are essential for professional photographers and individuals who just want to get more out of their pictures by using advanced cameras like the Canon camera [The Canon EOS Digital Rebel XS/1000D Companion](#) John Wiley & Sons
