This is NOT your father's home repair book! And it's not your husband's, your brother's, your boyfriend's, or the guy's next door. Dare to Repair is a do-it-herself book for every woman who would rather be self-reliant than rely on a super or contractor. No matter the depth of your pockets or the size of your home, a toilet will get clogged, a circuit breaker will trip, and a smoke detector will stop working. It's up to you how you'll deal with them -- live in denial, pay the piper, or get real and do it yourself. Dare to Repair demystifies these home repairs by providing information that other books leave out. In Dare to Repair, you'll learn how to: Take the plunge -- from fixing a leaky faucet to cleaning the gutters. Lighten up -- from removing a broken light bulb to installing a dimmer switch. Keep your cool -- from maintaining a refrigerator's gasket to changing the rotation of a ceiling fan. Get a handle on it -- from replacing a doorknob to repairing a broken window. Play it safe -- from planning a fire escape route to installing a smoke detector. Filled with detailed illustrations, Dare to Repair provides even the most repair-challenged woman

with the ability to successfully fix things around the home. Once you start, you won't want to stop.

Make a good income as a self-employed mobile mechanic. If you already know how to fix a car, you're way ahead of most people. All you need now is the business knowledge and expertise to turn your skill and talent into money. This book has that information, all in a simple, direct, easy-to-follow format. This book is a complete, step-by-step guide to making extra money for yourself as a self-employed, mobile mechanic. I take you through it step-by-step. I even include a list of car parts vendors I use for my own car repair business, and sample forms for a work order and a mechanic's lien. What's the best way to advertise? How to show customers that you're a professional? How to decode a car's VIN number? Do you need to set up a corporation? Should you accept credit cards? How can you get customers coming back? I answer all these questions, and much more, in this informative book. Work when you want, how you want. Do what you enjoy doing anyway, working on cars, and make \$100 here, \$500 there... does that sound like the kind of money that you could use? My name is Steve Sorensen. I was a high-level business strategy consultant who left the corporate world to start and run a chain of car repair shops. I know business, I know car repair, and I want you to succeed. I have counseled many of my friends, and even my employees, on starting their own self-employed mechanic businesses, and now I'm sharing that knowledge with you. Everything in this book is original information I wrote myself just for this book. There's no ghost writer. I don't outsource anything. I wrote it myself. This information is not published or available anywhere else. There is no copy-and-paste here, and no meaningless diagrams or screenshots. Everything is pure instructoins on how to go from being someone who can fix a car to someone who is making real money, every day, from fixing cars.
