Born to Run Harper Collins

The A-904 and A-727, debuting in 1960 and 1962, respectively, are 3-speed automatic Chrysler TorqueFlite Transmissions. In Mopar circles, they have become synonymous with strength, durability, and performance. In fact, 43 years after its first application, A-904s were still found in the Jeep lineup! TorqueFlites are known for their dependability, but many have endured a tremendous amount of abuse over 50-plus years when hooked up to V-8 Mopar powerplants. There is little doubt that some of these automatics could be prone to failure, or at least need a thorough rebuild. Tom Hand shares his decades of

experience rebuilding TorqueFlite transmissions with chapters dedicated to troubleshooting, disassembly and reassembly, performance modifications, post-installation procedures, and the most thorough source guide offered in print, ever. The author walks you through the TorqueFlite rebuild with color photos showcasing step-by-step procedures with highly detailed, easy-to-follow text. This book will keep money in your pocket and add experience to your résumé, but more important, it will help you get your Mopar back on the road!

Now there's another way to get more

horsepower: boring and stroking your Mopar small-block to get more cubic inches - up to 476 cubes! The small-block Mopar is one of the easiest engines in which to increase displacement without extensive modifications or specialized machine work - the engine was practically designed for more cubes! This book shows you how to get that big-cube power, and then it shows you how to optimize the small-block's other systems - induction, heads, valvetrain, ignition, exhaust, and more to make the most of the extra cubic inches. Author Jim Szilagyi is a Performance Specialist for Dodge Motorsports and Mopar Performance Parts. In this book he covers building big-inchers from Mopar 318/340/360 -ci LA or Magnum 5.2-/5.9-liter engines, using both factory and aftermarket parts. If you want to make big power from your Mopar small-block, this is the

book for you!

Chrysler Sebring & 200 and Dodge Avenger American Mathematical Soc.
NATIONAL BESTSELLER • The astonishing and hugely entertaining story that completely changed the way we run. An epic adventure that began with one simple question: Why does my foot hurt? “Equal parts quest, physiology treatise, and running history.... The climactic race reads like a sprint.... It simply makes you

want to run.” —Outside Magazine Isolated by Mexico's deadly Copper Canyons, the blissful Tarahumara Indians have honed the ability to run hundreds of miles without rest or injury. In a riveting narrative, award-winning journalist and often-injured runner Christopher McDougall sets out to discover their secrets. In the process, he takes his readers from science labs at Harvard to the sun-baked valleys and freezing peaks across North America, where ever-growing numbers of ultra-runners are pushing their bodies to the limit, and, finally, to a climactic race in the Copper Canyons that pits America's best ultra-runners against the tribe. McDougall's incredible story will not only engage your mind but inspire your body when you realize that you, indeed all of us, were born to run.

Read James Wesley, Rawles's posts on the Penguin Blog In the vein of Sam Sheridan's The Disaster Diaries, a comprehensive guide to preparing for the apocalypse! With the recent economic crisis, formerly unimaginable scenarios have become terrifyingly real possibilities- learn how to prepare for the worst Global financial collapse, a terrorist attack, a natural catastrophe-all it takes is one event to disrupt our way of life. We could find ourselves

facing myriad serious problems from massive unemployment to a food shortage to an infrastructure failure that cuts off our power or water supply. If something terrible happens, we won't be able to rely on the government or our communities. We'll have to take care of ourselves. In *How to Survive the End of the World as We Know It*, James Rawles, founder of SurvivalBlog.com, clearly explains everything you need to know to protect yourself and your family in the event of a disaster—from radical currency devaluation to a nuclear threat to a hurricane. Rawles shares essential tactics and techniques for surviving completely on your own, including how much food is enough, how to filter rainwater, how to protect your money, which seeds to buy for your garden, why goats are a smart choice for livestock, and how to secure your home. It's the ultimate guide to total preparedness and self-reliance in a time of need.

The Enforcement of Morals Haynes Manuals N. America, Incorporated
The authors invited more than 100 journalists worldwide to use photographs, charts and essays to explore the world of big data and its growing influence on our lives and society.

Motor Auto Repair Manual. Amagi Gonzo journalist and literary roustabout Hunter S. Thompson flies with the angels—Hell's Angels, that is—in this short work of nonfiction. "California, Labor Day weekend . . . early, with ocean fog still in the streets, outlaw motorcyclists wearing chains, shades and greasy Levis roll out from damp garages, all-night diners and cast-off one-night pads in Frisco, Hollywood, Berdoo and East Oakland, heading for the Monterey peninsula, north

of Big Sur. . . The Menace is loose again.” Thus begins Hunter S. Thompson’s vivid account of his experiences with California’s most notorious motorcycle gang, the Hell’s Angels. In the mid-1960s, Thompson spent almost two years living with the controversial Angels, cycling up and down the coast, reveling in the anarchic spirit of their clan, and, as befits their name, raising hell. His book successfully captures a singular moment in American history, when the biker lifestyle was first defined, and when such countercultural movements were electrifying and horrifying America. Thompson, the creator of Gonzo journalism, writes with his usual bravado, energy, and brutal honesty, and with a nuanced and incisive eye; as The New

Yorker pointed out, “For all its uninhibited and sardonic humor, Thompson’s book is a thoughtful piece of work.” As illuminating now as when originally published in 1967, Hell’s Angels is a gripping portrait, and the best account we have of the truth behind an American legend.

Dodge Challenger & Charger Sterling Publishing (NY)

This is a compilation of more than 50 restoration and maintenance projects for Mustangs built from 1964 through 1973, the most popular collectible Mustangs. The Survival of a Mathematician paladin
Press

Alec Soth's *Sleeping by The Mississippi* is one of the defining publications of the photo-book era. First published in 2004, it was Soth's first book and sold through three editions, establishing him as a leading light of contemporary photographic practice. Evolving from a series of road trips along the Mississippi river, America's iconic yet oft-neglected 'third coast', Soth's richly descriptive, large-format colour photographs present an eclectic mix of individuals, landscapes, and interiors. Sensuous in detail and raw in subject, the work elicits a consistent mood of loneliness, longing, and reverie. This

MACK edition includes two photographs not published in the prior versions.

Arc of Justice CarTech Inc

Through revised text, new photos, specialised illustrations, updated charts and additional information sidebars, *The Ultimate Sniper* once again thoroughly details the three great skill areas of sniping; marksmanship, fieldcraft and tactics.

The Ultimate Sniper Haynes Manuals
N. America, Incorporated

A triumphant tale of a young woman and her difficult childhood, *The Glass Castle* is a remarkable memoir of resilience, redemption, and a revelatory look into a family at once deeply dysfunctional and wonderfully vibrant. Jeannette Walls was the second of four

children raised by anti-institutional parents in a household of extremes.

Field Guide to Aftermarket Parts, 1946-1948 Dodge Haynes Manuals N. America, Incorporated

How to Rebuild the Small-Block Mopar is the most comprehensive book on small-block Mopar engines ever released, covering 273, 318, 340, and 360-ci LA engines and 5.2 and 5.9L Magnum V-8s. Author William Burt uses color photos and descriptive text to teach readers the complete rebuild process from removal to break-in.

An award-winning scientist offers his unorthodox approach to childrearing: “Parentology is brilliant, jaw-droppingly

funny, and full of wisdom...bound to change your thinking about parenting and its conventions” (Amy Chua, author of *Battle Hymn of the Tiger Mother*). If you’re like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional

cash transfers improved educational and latest literature on parenting—with health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley’s sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the lessons that go down easy. You’ll be laughing and learning at the same time.
