How Boston radio station WBCN became the hub of the rock-and-roll, antiwar, psychedelic solar system. While San Francisco was celebrating a psychedelic Summer of Love in 1967, Boston stayed buttoned up and battened down. But that changed the following year, when a Harvard Law School

graduate student named Ray Riepen founded a radio station that played music that young people, including the hundreds of thousands at Boston-area colleges, actually wanted to hear. WBCN-FM featured album cuts by such artists as the Mothers of Invention, Aretha Franklin, and Cream, played by announcers who felt free to express their opinions on subjects that ranged from recreational drugs to the war in Vietnam. In this engaging and generously illustrated chronicle, Peabody Award-winning journalist and one-time WBCN announcer Bill Lichtenstein tells the story of how a radio station became part of a revolution in youth culture. At WBCN, creativity and countercultural politics ruled: there were no set playlists; news segments anticipated the satire of *The Daily Show*; on-air interviewees ranged from John and Yoko to Noam Chomsky;

a telephone "Listener Line" fielded questions on any subject, day and night. From 1968 to Watergate, Boston's WBCN was the hub of the rock-and-roll, antiwar, psychedelic solar system. A cornucopia of images in color and black and white includes concert posters, news clippings, photographs of performers in action, and scenes of joyousness on Boston Common. Interwoven through the narrative are excerpts from interviews with WBCN pioneers, including Charles Laquidara, the "news dissector" Danny Schechter, Marsha Steinberg, and Mitchell Kertzman. Lichtenstein's documentary *WBCN and the American Revolution* is available as a DVD sold separately. *A Brilliant Death Profile* Books Twelve Steps to recovery. Doing well with money isn't necessarily about what you know. It's about how you behave. And behavior is hard to teach, even to really smart people. Money—investing, personal finance, and business decisions—is typically taught as a math-based field, where data and formulas tell us exactly what to do. But in the real world people don't make financial decisions on a spreadsheet. They make them at the dinner table, or in a meeting room, where personal history, your own unique view of the world, ego, pride, marketing, and odd incentives are scrambled together. In

The Psychology of Money, award-winning author Morgan Housel shares 19 short stories exploring the strange ways people think about money and teaches you how to make better sense of one of life's most important topics.

A most untraditional love story, this is the celebrated tale of Henry DeTamble, a dashing, adventuresome librarian who inadvertently travels through time, and Clare Abshire, an artist whose life takes a natural sequential course. Henry and Clare's passionate affair endures across a sea of time and captures them in an impossibly romantic trap that tests the strength of fate and basks in the bonds of love. "Niffenegger's

inventive and poignant writing is well worth a trip" (Entertainment Weekly).

Crime and Justice

offers a comprehensive introduction to the U.S criminal justice system through fifteen historical and contemporary case studies. The third edition has been revised and streamlined throughout, featuring new material on race, the war on drugs, police violence, "stand your ground" laws and gun laws, and more. Each chapter opens with an engaging case study followed by an explanatory chapter that teaches core concepts, key terms, and critical

issues. The cases serve multiple learning objectives: illustrating concepts applied in real life; exploring sociological issues of race, class, gender, and power; and teaching students the law and processes of the justice system. Crime and Justice is excellent for any course that introduces students to the criminal justice system. A complimentary Instructor's Manual and Test Bank are available, as well as an open-access Companion Website for students that

includes interactive flashcards, links to online video and media, and other learning material. Visit <http://textbooks.rowman.com/boys-watson3e> or email textbooks@rowman.com for more information.

Nutritive Value of Indian Foods O'Reilly Media

When Richard Rumelt's Good Strategy/Bad Strategy was published in 2011, it immediately struck a chord, calling out as bad strategy the mish-mash of pop culture, motivational slogans and business buzz speak so often and misleadingly masquerading as the real thing. Since then, his original and pragmatic ideas have

won fans around the world and continue to help readers to recognise and avoid the elements of bad strategy and adopt good, action-oriented strategies that honestly acknowledge the challenges being faced and offer straightforward approaches to overcoming them.

Strategy should not be equated with ambition, leadership, vision or planning; rather, it is coherent action backed by an argument. For Rumelt, the heart of good strategy is insight into the hidden power in any situation, and into an appropriate response - whether launching a new product, fighting a war or putting a man on the moon. Drawing on examples of the good and the bad from across all sectors and

all ages, he shows how this insight can be cultivated with a wide variety of tools that lead to better thinking and better strategy, strategy that cuts through the hype and gets results.

Backpacker ABC-CLIO INTERNATIONAL BESTSELLER "For

anyone who wants to understand capitalism not as economists or politicians have pictured it but as it actually operates, this book will be invaluable. "-Observer (UK) If you've wondered how we did not see the economic collapse coming, Ha-Joon Chang knows the answer: We didn't ask what they didn't tell us about capitalism. This is a lighthearted book with a serious purpose: to question the assumptions behind the dogma and sheer hype that the dominant school of

neoliberal economists—the apostles of the freemarket—have spun since the Age of Reagan. Chang, the author of the international bestseller *Bad Samaritans*, is one of the world's most respected economists, a voice of sanity—and wit—in the tradition of John Kenneth Galbraith and Joseph Stiglitz. 23 *Things They Don't Tell You About Capitalism* equips readers with an understanding of how global capitalism works—and doesn't. In his final chapter, "How to Rebuild the

World," Chang offers a vision of how we can shape capitalism to humane ends, instead of becoming slaves of the market.

Popular Science Signal Meet a genuine American folk hero cut from the homespun cloth of America's heartland: Sam Walton, who parlayed a single dime store in a hardscrabble cotton town into Wal-Mart, the largest retailer in the world. The undisputed merchant king of the late twentieth century, Sam never lost the common touch. Here, finally, inimitable words. Genuinely modest, but always sure of his ambitions and achievements. Sam shares his thinking in

a candid, straight-from-the-shoulder style. In a story rich with anecdotes and the "rules of the road" of both Main Street and Wall Street, Sam Walton chronicles the inspiration, heart, and optimism that propelled him to lasso the American Dream.

From a Pulitzer

Prize-winning
investigative
reporter at The New
York Times comes
the troubling story
of the rise of the
processed food
industry -- and how
it used salt,
sugar, and fat to
addict us. Salt
Sugar Fat is a
journey into the
highly secretive
world of the
processed food
giants, and the
story of how they
have deployed these
three essential
ingredients, over
the past five
decades, to
dominate the North
American diet. This
is an eye-opening
book that
demonstrates how

the makers of these foods have chosen, time and again, to double down on their efforts to increase consumption and profits, gambling that consumers and regulators would never figure them out. With meticulous original reporting, access to confidential files and memos, and numerous sources from deep inside the industry, it shows how these companies have pushed ahead, despite their own misgivings (never aired publicly). Salt Sugar Fat is the story of how we got here, and it

will hold the food giants accountable for the social costs that keep climbing even as some of the industry's own say, "Enough already."
