In 2006, the U.S. Marines officially became part of the U.S. Special Operations Command (SOCOM) with the creation of the Marine Special Operations Command (MARSOC). Drawn from the ranks of the Force Recon companies, these highly skilled and combat-proven Leathernecks would take the war to al Qaeda and the Taliban in America's global war on terrorism. MARSOC is steeped in the heritage of the Marine Raiders of World War II, Force Reconnaissance companies of Vietnam, and Detachment-One, which stood up after the attacks on 9/11. Their mission is to win wars before they begin, taking the warfare beyond the front line. When America wants to display its might, the Commander in Chief will send in the Marines. With the creation of MARSOC, chances are they are already there.

" Michael Walling has honored the American men and women who served in Operation Enduring Freedom by helping them tell their own stories. This is the war in Afghanistan as experienced by the people who fought it. " General Tommy R. Franks, Ret. The war in Afghanistan has seen men and women thrown into America's longest sustained combat operation. For over 13 years, US military personnel have been embroiled in a conflict unlike any other, in a hostile country where danger and death lurk at every turn. The nature of the fighting has transformed not only the entire structure of the US military, but the lives of every soldier, sailor, marine, coast guardsman, and airman who served there. There have been many tales told of this most recent Afghan war, but until now no single work has combined the strategic view of high-level commanders with the perspective of soldiers on the ground. This book places the first-hand accounts of serving men and women into the context of the military operations. Drawing on

gripping oral histories from theater commanders, Special Forces troops, reconstruction teams, and everyday soldiers, Michael G. Walling analyzes operations as they were experienced by individuals, from those immediately following 9/11 through to those in 2014 as US troops prepared to withdraw. He also charts the evolution of US military structure as it was forced to adapt to cope with the non-conventional, but nonetheless deadly threats of asymmetric warfare, as well as detailing covert ops, infrastructure rebuilding, and the training of Afghan forces. Resonating across gender, age, nationality, and ethnicity, this book is not just a document of US fortunes in a far-flung conflict. It is a tribute to the determination, heroism, sacrifice, and the strength of the human spirit.

Guide for All-Hazard Emergency Operations Planning Test Prep Books

From the start of operations in Iraq in March 2003 until mid-2009, ground troops from thirty-seven countries fought at the side of U.S. forces, with many more providing indirect support and assistance.

These countries furnished significant military aid to the United States Army and performed vital missions relevant to combat, intelligence, reconstruction, and support operations. The participation of these coalition partners proved critical to the success of the overall mission.

Allied Participation in Operation Iraqi Freedom examines the achievements and contributions of the allied nations that supplied ground troops to the U.S.-led coalition in Iraq during 2003-2009. It does not cover forces deployed to Iraq under the aegis of the United Nations or the North Atlantic Treaty Organization. The U.S. military's experience in Operation IRAQI FREEDOM reconfirms the necessity of coalition building in modern warfare, even when the U.S. Army and Marine Corps ground forces shoulder the largest burden. This monograph offers separate sections on each coalition ally and presents basic information about deployed military forces and their general operational experiences in Iraq. It also provides a framework for more detailed histories to follow.

NEW YORK TIMES BESTSELLER • The unapologetic, laugh-your-ass-off military memoir both vets and civilians have been waiting for, from a five-tour Army Ranger turned YouTube phenomenon and zealous advocate for veterans Members of the military's special operations branches share a closely guarded secret: They love their jobs. They relish the opportunity to fight. They are thankful for it, even, and hopeful that maybe, possibly, they'll also get to kill a bunch of bad guys while they're at it. You don't necessarily need to thank them for their service—the pleasure is all theirs. In this hilarious and personal memoir, readers ride shotgun alongside former Army Ranger and private military contractor and current social media phenomenon Mat Best, into the action and its aftermath, both abroad and at home. From surviving a skin infection in the swampy armpit of America (aka Columbus, Georgia) to kicking down doors on the outskirts of Ramadi, from blowing up a truck full of enemy combatants to witnessing the effects of a suicide bombing right in front of your face, Thank You for My Service gives readers who love America and love the good guys fresh insight into what it's really like inside the minds of the men and women on the front lines. It's also a sobering yet steadying glimpse at life for veterans after the fighting stops, when the enemy becomes self-doubt or despair and you begin to wonder why anyone should be thanking you for anything, least of all your service. How do you keep going when something you love turns you into somebody you hate? For veterans and their friends and families, Thank You for My Service will offer comfort, in the form of a million laughs, and counsel, as a blueprint for what to do after the war ends and the real fight begins.

And for civilians, this is the insider account of military life you won't find anywhere else, told with equal amounts of heart and balls. It's Deadpool meets Captain America, except one went to business school and one went to therapy, and it's anyone's guess which is which.

The study of human body measurements on a comparative basis is known as anthropometrics. Its applicability to the design process is seen in the physical fit, or interface, between the human body and the various components of interior space. Human Dimension and Interior Space is the first major anthropometrically based reference book of design standards for use by all those involved with the physical planning and detailing of interiors, including interior designers, architects, furniture designers, builders, industrial designers, and students of design. The use of anthropometric data, although no substitute for good design or sound professional judgment should be viewed as one of the many tools required in the design process. This comprehensive overview of anthropometrics consists of three parts. The first part deals with the theory and application of anthropometrics

and includes a special section dealing with physically disabled and elderly people. It provides the designer with the fundamentals of anthropometrics and a basic understanding of how interior design standards are established. The second part contains easy-to-read, illustrated anthropometric tables, which provide the most current data available on human body size, organized by age and percentile groupings. Also included is data relative to the range of joint motion and body sizes of children. The third part contains hundreds of dimensioned drawings, illustrating in plan and section the proper anthropometrically based relationship between user and space. The types of spaces range from residential and commercial to recreational and institutional, and all dimensions include metric conversions. In the Epilogue, the authors challenge the interior design profession, the building industry, and the furniture manufacturer to seriously explore the problem of adjustability in design. They expose the fallacy of designing to accommodate the so-called average man, who, in fact, does not exist. Using government data, including studies prepared by Dr. Howard Stoudt, Dr. Albert Damon, and Dr. Ross McFarland, formerly of the Harvard School of Public Health, and Jean Roberts of the U.S. Public Health Service, Panero and Zelnik have devised a system of interior design reference standards, easily understood through a series of charts and situation drawings. With Human Dimension and Interior Space, these standards are now accessible to all designers of interior environments.
