*The Car Hacker's Handbook* Bloomsbury Publishing USA

A PopSugar Best Book of the Year! Readers of Heather Morris's *The Tattooist of Auschwitz* and watchers of *The Queen's Gambit* won't want to miss this amazing debut set during World War II. A young Polish resistance worker, imprisoned in Auschwitz as a political

prisoner, plays chess in exchange for her life, and in doing so fights to bring the man who destroyed her family to justice. Maria Florkowska is many things: daughter, avid chess player, and, as a member of the Polish underground resistance in Nazi-occupied Warsaw, a young woman brave beyond her years. Captured by the Gestapo, she is imprisoned in Auschwitz, but while her family is sent to their deaths, she is spared. Realizing her ability to play chess, the sadistic camp deputy, Karl Fritzsch, decides to use her as a chess opponent to entertain the camp guards. However, once he tires of exploiting her skills, he has every intention of killing her. Befriended by a Catholic priest, Maria attempts to overcome her grief, vows to avenge the murder of her family, and plays for her life. For four grueling years, her strategy is simple: Live.

---

Fight. Survive. By cleverly provoking Fritzschn's volatile nature in front of his superiors, Maria intends to orchestrate his downfall. Only then will she have a chance to evade the fate awaiting her and see him punished for his wickedness. As she carries out her plan and the war nears its end, she challenges her former nemesis to one final game, certain to end in life or death, in failure or justice. If Maria can bear to face Fritzschn—and her past—one last time.

- Build an accurate threat model for your vehicle
- Reverse engineer the CAN bus to fake engine signals
- Exploit vulnerabilities in diagnostic and data-logging systems
- Hack the ECU and other firmware and embedded systems
- Feed exploits through infotainment and vehicle-to-vehicle communication systems
- Override factory settings with performance-tuning techniques
- Build physical and virtual test benches to try out exploits safely
