NAMED A BEST BOOK OF THE YEAR BY BOOKPAGE AND LIBRARY JOURNAL The Crimson Petal and the White meets Fight Club: A page-turning novel set in the world of female pugilists and their patrons in late eighteenth-century England. Moving from a filthy brothel to a fine manor house, from the world of street fighters to the world of champions, The Fair Fight is a vivid, propulsive historical novel announcing the arrival of a dynamic new talent. Born in a brothel, Ruth doesn't expect much for herself beyond abuse. While her sister's beauty affords a certain degree of comfort, Ruth's harsh looks set her on a path of drudgery. That is until she meets pugilist patron George Dryer and discovers her true calling—fighting bare knuckles in the prize rings of Bristol. Manor-

born Charlotte has a different cross to bear. Scarred by smallpox, stifled by her social and romantic options, and trapped in twisted power games with her wastrel brother, she is desperate for an escape. After a disastrous, life-changing fight sidelines Ruth, the two women meet, and it alters the perspectives of both of them. When Charlotte presents Ruth with an extraordinary proposition, Ruth pushes dainty Charlotte to enter the ring herself and learn the power of her own strength. A gripping, page-turning story about people struggling to transcend the circumstances into which they were born and fighting for their own places in society, The Fair Fight is a raucous, intoxicating tale of courage, reinvention, and fighting one's way to the top.

The three concepts mentioned in the title of this volume imply the contact between two or more literary phenomena; they are based on similarities that are related to a form of 'travelling' and imitation or adaptation of entire texts, genres, forms or contents. Transfer comprises all sorts of 'travelling', with translation as a major instrument of transferring literature across linguistic and cultural barriers. Transfer aims at the process of communication, starting with the source product and its cultural context and then highlighting the mediation by certain agents and institutions to end up with inclusion in the target culture. Reception lays its focus on the receiving culture, especially on criticism, reading, and interpretation. Translation, therefore, forms a major factor in reception with the general aim of reception studies being to reveal the wide spectrum of interpretations each text offers. Moreover, translations are the prime instrument in the distribution of literature across linguistic and cultural borders; thus, they paved the way for gaining prestige in the world of literature. The thirty-eight papers included in

this volume and dedicated to research in this area were previously read at the ICLA conference 2016 in Vienna. They are ample proof that the field remains at the center of interest in Comparative Literature.

Alan Watts – noted author and respected authority on Far Eastern thought – studied Taoism extensively, and in his final years moved to a quiet cabin in the mountains and dedicated himself almost exclusively to meditating and writing on the Tao. This new book gives us an opportunity to not only understand the concept of the Tao but to experience the Tao as a personal practice of liberation from the limitations imposed by the common beliefs within our culture. The philosophy of the Tao offers a way to understand the value of ourselves as free-willed individuals enfolded within the ever-changing patterns of nature. The path of the Tao is perhaps the most puzzling way of

liberation to come to us from the Far East in the last century. It is both practical and esoteric, and it has a surprisingly comfortable quality of thought that is often overlooked by Western readers who never venture beyond the unfamiliar quality of the word Tao (pronounced "dow"). But those who do soon discover a way of understanding and living with the world that has profound implications for us today in so-called modern societies. The word Tao means the Way – in the sense of a path, a way to go – but it also means nature, in the sense of one's true nature, and the nature of the universe. Often described as the philosophy of nature, we find the origins of Taoism in the shamanic world of pre-Dynastic China. Living close to the earth, one sees the wisdom of not interfering, and letting things go their way. It is the wisdom of swimming with the current, splitting wood along the grain, and seeking to understand human nature instead of changing it. Every creature finds it's way according to the laws of nature, and each of us has our own inner path – or Tao.

This book explores two strands of Audiovisual Translation referred to as «research» and «use». As their points of convergence as well as divergence are brought to light, the contributors show that the two tend to overlap and cross-pollinate. The volume's inquiries of linguistic, cultural, sociological, computational, educational and historical nature give a comprehensive up-to-date account of AVT as an expanding and heterogeneous, yet internally coherent, field of scientific and professional endeavour. «The book offers a good balance of chapters dealing with new topics and chapters dealing with more established AVT topics from new angles. It is a must read for TS students and academics but also for practitioners and for translators from other domains, given the increased prominence and diversity of AVT modes both in TS research and translation practice.» (Professor Aline Remael University of

Antwerp Chair of the Department of Applied Linguistics, Translators and Interpreters)
