REVOLT ON A FRONTIER PLANET The corrupt Earth government is sending an army to Greenwood to remove the pioneers who discovered and settled the planet: the potential profits are too great to leave the world to scraggly ne'er-do-wells! Though the rugged individualists of Greenwood may be fractious and disinclined to agree on most things, the greedy politicians of Earth will learn a harsh lesson if they think the settlers won't join together to save their livelihoods and homes! Under Yerby Bannock, who never walked away from a drink or a fight, the Greenwood patriots will face thugs in the night, lawyers in a distant court, traitors in their own ranks¾ And, if they have to, a fortress built to shrug off the assault of a battlefleet! NEW YORK TIMES BESTSELLER • “ A fascinating look at how consumers perceive logos, ads, commercials, brands, and products. ” —Time

How much do we know about why we buy? What truly influences our decisions in today ’ s message-cluttered world? In *Buyology*, Martin Lindstrom presents the astonishing findings from his groundbreaking three-year, seven-million-dollar neuromarketing study—a cutting-edge experiment that peered inside the brains of 2,000 volunteers from all around the world as they encountered various ads, logos, commercials, brands, and products. His startling results shatter much of what we have long believed about what captures our interest—and drives us to buy. Among the questions he explores:

- Does sex actually sell?
- Does subliminal advertising still surround us?
- Can “ cool ” brands trigger our mating instincts?
- Can our other senses—smell, touch, and sound—be aroused when we see a product?

Buyology is a fascinating and shocking journey into the mind of today's consumer that will captivate anyone who's been seduced—or turned off—by marketers' relentless attempts to win our loyalty, our money, and our minds.

Portishead Radio was the world's largest long

range maritime radio communications station.

Originally located at a site in Devizes, Wiltshire in 1920, the transmitters were relocated to Portishead, near Bristol, shortly after the receiving station was moved to Highbridge, Somerset during the 1920s. The station, originally operated by the British Post Office, provided vital communication links both to and from ships at sea, using Wireless Telegraphy (Morse code), Radiotelephony, and latterly, Radiotelex. The developmental and war years are recounted in detail, as well as the rise (and eventual fall) of commercial maritime radio traffic over 80 years of service. The aeronautical and leisure markets are recalled, as well as other services provided by the station. The station closed in 2000, as satellite technology became the preferred method of ship-to-shore communication. This book gives both a technical and social history of the station; how it worked, what it was like to work there, and fondly recalls many of the stories and characters who became part of the station's charm. Using many photographs, staff memories, and with recently-found magazine and newspaper articles, the complete history of this important and much-missed station can be told for the first time.
