Witnessing Whiteness invites readers to consider what it means to be white, describes and critiques strategies used to avoid race issues, and identifies the detrimental effect of avoiding race on cross-race collaborations. The author illustrates how racial discomfort leads white people toward poor relationships with people of color. Questioning the implications our history has for personal lives and social institutions, the book considers political, economic, socio-cultural, and legal histories that shaped the meanings associated with whiteness. Drawing on dialogue with well-known figures within education, race, and multicultural work, the book offers intimate, personal stories of cross-race friendships that address both how a deep understanding of whiteness supports cross-race collaboration and the long-term nature of the work of excising racism from the deep psyche. Concluding chapters offer practical information on building knowledge, skills, capacities, and communities that support anti-racism practices, a hopeful look at our collective future, and a discussion of how to create a culture of witnesses who support allies for social and racial justice. There are many books available covering the Training Within Industry (TWI) programs, but few include any unique material on adaptation or modification — This dearth of new has caused practitioners to alter the programs without understanding the underlying principles. These changes have made the programs less effective. One must, however, maintain the principles used in the programs when changing the delivery of the programs to suit the culture. The purpose of *The TWI Facilitator's Guide: How to Use the TWI Programs Successfully* is to prevent the TWI programs from falling into misuse and disuse. This book will explain the main principles of the TWI programs and what they can accomplish, but it will also stress what they are not. This book reviews what the programs are and then explains how to use them. It tells why we do certain aspects of each program. When we know why we do something, we won't stop doing it for the wrong reason.

The outbreak of the Coronavirus in early 2020 resulted in unprecedented changes to health professions education. The pervasive stay-at-home orders resulted in faculty, who were trained for preparing the next generation of health professionals in a traditional learning environment, throwing out their lesson plans and starting anew. New approaches to teaching and learning were created quickly, and without the typical extensive planning, which introduced several challenges. However, lessons learned from these approaches have also resulted in increased technology adoption, innovative assessment strategies, and increased creativity in the learning environment. *The Handbook of Research on Updating and Innovating Health Professions Education: Post-Pandemic Perspectives* explores the various teaching and learning strategies utilized during the pandemic and the innovative approaches implemented to evaluate student learning outcomes and best practices in non-traditional academic situations and environments. The chapters focus specifically on lessons learned and best practices in health professions education and the innovative and exciting changes that occurred particularly with the adoption and implementation of technology. It provides resources and strategies that can be implemented into the current educational environments and into the future. This book is ideal for inservice and preservice teachers, administrators, teacher educators, practitioners, medical trainers, medical professionals, researchers, academicians, and students interested in curriculum, course design, development of policies and procedures within academic programs, and the identification of best practices in health professions education.

"Hosts of all kinds, this is a must-read!" --Chris Anderson, owner and curator of TED From the host of the New York Times podcast Together Apart, an exciting new approach to how we gather that will transform the ways we spend our time together—at home, at work, in our communities, and beyond. In The Art of Gathering, Priya Parker argues that the gatherings in our lives are lackluster and unproductive--which they don't have to be. We rely too much on routine and the conventions of gatherings when we should focus on distinctiveness and the people involved. At a time when coming together is more important than ever, Parker sets forth a human-centered approach to gathering that will help everyone create meaningful, memorable experiences, large and small, for work and for play. Drawing on her expertise as a facilitator of high-powered gatherings around the world, Parker takes us inside events of all kinds to show what works, what doesn't, and why. She investigates a wide array of gatherings--conferences, meetings, a courtroom, a flash-mob party, an Arab-Israeli summer camp--and explains how simple, specific changes can invigorate any group experience. The result is a book that's both journey and guide, full of exciting ideas with real-world applications. The Art of Gathering will forever alter the way you look at your next meeting, industry conference, dinner party, and backyard barbecue--and how you host and attend them.

NATIONAL BESTSELLER • Provocative and illuminating essays from women at the forefront of the climate movement who are harnessing truth, courage, and solutions to lead humanity forward.

"A powerful read that fills one with, dare I say . . . hope?" —The New York Times NAMED ONE OF THE BEST BOOKS OF THE YEAR BY SMITHSONIAN MAGAZINE There is a renaissance blooming in the climate movement: leadership that is more characteristically feminine and more faithfully feminist, rooted in compassion, connection, creativity, and collaboration. While it's clear that women and girls are vital voices and agents of change for this planet, they are too often missing from the proverbial table. More than a problem of bias, it's a dynamic that sets us up for failure. To change everything, we need everyone. All We Can Save illuminates the expertise and insights of dozens of diverse women leading on climate in the United States—scientists, journalists, farmers, lawyers, teachers, activists, innovators, wonks, and designers, across generations, geographies, and race—and aims to advance a more representative, nuanced, and solution-oriented public conversation on the climate crisis. These women offer a spectrum of ideas and insights for how we can rapidly, radically reshape society. Intermixing essays with poetry and art, this book is both a balm and a guide for knowing and holding what has been done to the world, while bolstering our resolve never to give up on one another or our collective future. We must summon truth, courage, and solutions to turn away from the brink and toward life-giving possibility.
