competitors--and
based on research in
hundreds of firms

across many sectors, this is your essential guide for rethinking how your firm competes and operates in the era of AI.

How Will You Measure Your Life? (Harvard Business Review Classics) Simon

and Schuster
This third collection of outstanding contributions from the Critical Management Studies (CMS) Division of the Academy of Management (AOM) continues to challenge business practice in ways not tackled by other

more typical business case studies. There is a critical need for business educators to expose students and managers to the multifaceted phenomena of doing business in the twenty-first century; to support critical, reflective moral development; and to reflect and understand the complexities of organizational life. Is the system broken? Is there need for more systemic change? The cases explore a number of critical issues at some of the largest industries and

companies in the world, including wealth creation and human rights in mining, the CSR approaches at Coca-Cola, the palm oil industry, and the supply chain at Apple Inc. Online Teaching Notes to accompany each chapter are available on request with the purchase of the book.

Notes from a Street-smart Executive
Harvard Business Press
In the spring of 2010, Harvard Business School's graduating class

asked HBS professor Clay Christensen to address them—but not on how to apply his principles and thinking to their post-HBS careers. The students wanted to know how to apply his wisdom to their personal lives. He shared with them a set of guidelines that have helped him find meaning in his own life, which led to this now-classic article. Although Christensen’s thinking is rooted in his deep religious faith, these are

strategies anyone can use. Since 1922, Harvard Business Review has been a leading source of breakthrough ideas in management practice. The Harvard Business Review Classics series now offers you the opportunity to make these seminal pieces a part of your permanent management library. Each highly readable volume contains a groundbreaking idea that continues to shape best

practices and inspire countless managers around the world. The Age of Surveillance Capitalism Harvard Business Review Press
LONGLISTED FOR THE FINANCIAL TIMES & MCKINSEY BUSINESS BOOK OF THE YEAR “ I often talk about the importance of trust when it comes to work: the trust of your employees and building trust with your customers. This book provides a blueprint for how to build and

maintain that trust and connection in a digital environment.” —Eric S. Yuan, founder and CEO of Zoom A Harvard Business School professor and leading expert in virtual and global work provides remote workers and leaders with the best practices necessary to perform at the highest levels in their organizations. The rapid and unprecedented changes brought on by Covid-19 have accelerated the transition to remote working,

requiring the wholesale migration of nearly entire companies to virtual work in just weeks, leaving managers and employees scrambling to adjust. This massive transition has forced companies to rapidly advance their digital footprint, using cloud, storage, cybersecurity, and device tools to accommodate their new remote workforce. Experiencing the benefits of remote working, including

nonexistent commute times, lower operational costs, and a larger pool of global job applicants—many companies, including Twitter and Google, plan to permanently incorporate remote days or give employees the option to work from home full-time. But virtual work has it challenges. Employees feel lost, isolated, out of sync, and out of sight. They want to know how to build trust, maintain connections

without in-person interactions, and a proper work/life balance. Managers want to know how to lead virtually, how to keep their teams motivated, what digital tools they 'll need, and how to keep employees productive. Providing compelling, evidence-based answers to these and other pressing issues, *Remote Work Revolution* is essential for navigating the enduring challenges teams and

managers face. Filled with specific actionable steps and interactive tools, this timely book will help team members deliver results previously out of reach. Following Neeley ' s advice, employees will be able to break through routine norms to successfully use remote work to benefit themselves, their groups, and ultimately their organizations. *Making Change Stick* Harvard Business Press *Teaching and the Case Method* delves into the special role of teacher and students in the case method

learning process. Schools that want to use the case method more effectively can use this book to teach groups of faculty how to apply case method techniques. For the first time, too, a book about case method teaching attempts to show how the method can be applied in a liberal arts setting. A liberal arts module in the book presents an innovative program for instructors who want to experiment with discussion teaching in traditional arts and science areas. The book focuses on a wide range of knotty problems faced by most instructors, experienced or new, creating an opportunity for them to learn from each other. It's main purpose is to provide a rich opportunity for

both professional school and liberal arts instructors to develop their own discussion leadership skills, and to further the process of learning for both themselves and their students. [Publishers website]

What They Teach You at Harvard Business School

Simon and Schuster Managers and supervisors will sharpen their analytical and decision-making skills with this new collection of fully reproducible case studies. Based on actual, real-life situations, these exercises prepare supervisors and team leaders for the

challenging problems they face in today's complex workplace. Each case study includes: Summary of the case; Discussion questions which evoke thought and analysis; Suggested solutions to the problems presented. Training Objectives: Improve participant's listening skills; Empower employees to negotiate; solutions fairly; Provide opportunities for participants to practice new skills in a supportive environment; Illustrate the skills needed to respond

productively to complex issues. Activities Cover: Performance appraisal; Managing effectively; Sexual harassment/discrimination; Managing disruptive employees; Coaching/counseling employees; Hiring the right person 50 Case Studies for Management & Supervisory Training HarperCollins When facing a difficult management challenge, wouldn't it be great if you could turn to a panel of experts to help guide you to the right decision?

Now you can, with books from the Judgment Calls series. Drawn from the pages of Harvard Business Review, these interactive, solutions-oriented guides allow readers to access the wisdom of leading experts as they tackle familiar and perplexing business situations. These engagingly written books will help managers improve problem-solving skills and make better judgment calls under fire. A preface provides an overview and sets the context for using these provocative case

studies as learning tools in corporate classrooms. A relevant chapter from an HBE volume introduces the topic as a refresher course. Finally, an appendix of resources such as executive summaries, guiding questions, and a list of further reading rounds out the book. Judgment Calls provide insight into a variety of real world difficulties and offer solutions that managers will find both sound and practical. Our ideal reader is the business traveler who's thinking

about this very issue, sees the book in the airport, and throws it in his or her briefcase to read on the plane. This volume, tentatively titled "Bob's Meltdown and Other Stories from the Frontlines of Management" looks at the most common issue in workplaces--employee behavior. What should you do when a star employee loses his temper in public? Worse yet, what if your protege seems to be coming unglued? All this and more!
Remote Work Revolution The Case Study Handbook,

Revised Edition
Student's Guide
A distinguished Harvard Business School professor offers a compelling reassessment and defense of purpose as a management ethos, documenting the vast performance gains and social benefits that become possible when firms manage to get purpose right. Few business topics have aroused more skepticism in recent years than the notion of corporate purpose, and for good reason. Too many companies deploy purpose, or a reason for being, as a promotional vehicle to make themselves feel virtuous and to look good to the outside world. Some have only foggy ideas about what purpose is and conflate it with strategy and other

concepts like “mission,” “vision,” and “values.” Even well-intentioned leaders don't understand purpose's full potential and engage half-heartedly and superficially with it. Outsiders spot this and become cynical about companies and the broader capitalist endeavor. Having conducted extensive field research, Ranjay Gulati reveals the fatal mistakes leaders unwittingly make when attempting to implement a reason for being. Moreover, he shows how companies can embed purpose much more deeply than they currently do, delivering impressive performance benefits that reward customers, suppliers, employees, shareholders, and communities alike. To

get purpose right, leaders must fundamentally change not only how they execute it but also how they conceive of and relate to it. They must practice what Gulati calls deep purpose, furthering each organization's reason for being more intensely, thoughtfully, and comprehensively than ever before. In this authoritative, accessible, and inspiring guide, Gulati takes readers inside some of the world's most purposeful companies to understand the secrets to their successes. He explores how leaders can pursue purpose more deeply by navigating the inevitable tradeoffs more deliberately and effectively to balance between short- and long-term value;

building purpose more systematically into every key organizational function to mobilize stakeholders and enhance performance; updating organizations to foster more autonomy and collaboration, which in turn allow individual employees to work more purposefully; using powerful storytelling to communicate a reason for being, arousing emotions and building a community of inspired and committed stakeholders; and building cultures that don't merely support purpose, but also allow employees to link the corporate purpose to their own personal reasons for being. As Gulati argues, a deeper engagement with purpose holds the key

not merely to the well-being of individual companies but also to humanity's future. With capitalism under siege and relatively low levels of trust in business, purpose can serve as a radically new operating system for the enterprise, enhancing performance while also delivering meaningful benefits to society. It's the kind of inspired thinking that businesses—and the rest of us—urgently need.

The Elite Charade of Changing the World Bantam
WITH NEW ANALYSIS OF HBS AND THE FINANCIAL CRISIS When Philip Delves Broughton abandoned his

career as a successful journalist and enrolled in Harvard Business School's prestigious MBA course, he joined 900 other would-be tycoons in a cauldron of capitalism. Two years of Excel shortcuts and five hundred of HBS's notorious business case studies lay ahead of him, but he couldn't have told you what OCRA was, other than a vegetable, or whether discount department stores make more money than airlines. He did, however, know that HBS's alumni appeared to be taking over the

world. The US president, the president of the World Bank, the US treasury secretary, the CEOs of General Electric, Goldman Sachs and Proctor & Gamble - all were bringing HBS experience to the way they ran their banks, businesses and even countries. And with the prospect of economic enlightenment before him, he decided to see for himself exactly what they teach you at Harvard Business School. Philip Delves Broughton's hilarious and enlightening

account of his experiences within Harvard Business School's hallowed walls provides an extraordinary glimpse into a world of case study conundrums, guest lectures, Apprentice-style tasks, booze lugging, burn-outs and high flyers. And with HBS alumni heading the very global governments, financial institutions and FTSE 500 companies whose reckless love of deregulation and debt got us into so much trouble, he discovers where HBS really adds

value - and where it falls disturbingly short.

Managing Oneself HarperCollins Quick, practical management advice from Harvard Business Review to help you do your job better. Drawing from HBR's popular Management Tip of the Day newsletter, this concise, handy guide is packed with easy-to-read tips on a broad range of topics, organized into three major skills every manager must master: Managing yourself Managing your team Managing your business Management Tips 2: From Harvard Business Review puts the best management practices and insights, from top thinkers in the field, right at your fingertips. In this book, you'll learn key steps for carrying out a business process improvement initiative, including how to: -Plan a business process improvement initiative -Analyze and redesign a current process that needs improvement -Obtain the resources needed to change a process

-Develop a systematic approach for creating and implementing change
How to Read, Discuss, and Write Persuasively about Cases Harvard Business Press
Case method teaching immerses students in realistic business situations--which include incomplete information, time constraints, and conflicting goals. The class discussion inherent in case teaching is well known for stimulating the development of students' critical thinking skills, yet

instructors often need guidance on managing that class discussion to maximize learning. Teaching with Cases focuses on practical advice for instructors that can be easily implemented. It covers how to plan a course, how to teach it, and how to evaluate it. The book is organized by the three elements required for a great case-based course: 1) advance planning by the instructor, including implementation of a student contract; 2) how to make leading a vibrant case discussion

easier and more systematic; and 3) planning for student evaluation after the course is complete. Teaching with Cases is ideal for anyone interested in case teaching, whether basing an entire course on cases, using cases as a supplement, or simply using discussion facilitation techniques. To learn more about the book, and to see resources available, visit teachingwithcases.hbsp.harvard.edu. Deep Purpose Harvard Business Review Press Reinvent your

organization for the hybrid age. Hybrid work is here to stay—but what will it look like at your company? Organizations that mandate rigid, prepandemic policies of five days a week at the traditional, co-located office may risk a mass exodus of talent. Leading Change
Harvard Business
Review Press

The challenges to
humanity posed by
the digital future, the
first detailed
examination of the
unprecedented form
of power called
"surveillance
capitalism," and the
quest by powerful
corporations to
predict and control
our behavior. In this
masterwork of original
thinking and research,
Shoshana Zuboff
provides startling
insights into the
phenomenon that she

has named surveillance
capitalism. The stakes
could not be higher: a
global architecture of
behavior modification
threatens human
nature in the twenty-
first century just as
industrial capitalism
disfigured the natural
world in the twentieth.
Zuboff vividly brings
to life the
consequences as
surveillance capitalism
advances from Silicon
Valley into every
economic sector. Vast
wealth and power are
accumulated in
ominous new
"behavioral futures
markets," where
predictions about our
behavior are bought
and sold, and the
production of goods
and services is
subordinated to a new
"means of behavioral
modification." The
threat has shifted from
a totalitarian Big

Brother state to a ubiquitous digital architecture: a "Big Other" operating in the interests of surveillance capital. Here is the crucible of an unprecedented form of power marked by extreme concentrations of knowledge and free from democratic oversight. Zuboff's comprehensive and moving analysis lays bare the threats to twenty-first century society: a controlled "hive" of total connection that seduces with promises of total certainty for maximum profit -- at the expense of democracy, freedom, and our human future. With little resistance from law or society, surveillance capitalism is on the verge of dominating the social order and shaping the

digital future -- if we let it.

Fat Chance

Harvard Business Press

We live in an age of unprecedented opportunity: with ambition, drive, and talent, you can rise to the top of your chosen profession regardless of where you started out.

But with opportunity comes responsibility.

Companies today aren't managing their knowledge workers careers.

Instead, you must be your own chief executive officer.

That means it's up to you to carve out your place in the

world and know when to change course. And it's up to you to keep yourself engaged and productive during a career that may span some 50 years. In *Managing Oneself*, Peter Drucker explains how to do it. The keys: Cultivate a deep understanding of yourself by identifying your most valuable strengths and most dangerous weaknesses; Articulate how you learn and work with others and what your most deeply held values are; and Describe the type of work environment where you can

make the greatest contribution. Only when you operate with a combination of your strengths and self-knowledge can you achieve true and lasting excellence.

Managing Oneself identifies the probing questions you need to ask to gain the insights essential for taking charge of your career. Peter Drucker was a writer, teacher, and consultant. His 34 books have been published in more than 70 languages. He founded the Peter F. Drucker Foundation for Nonprofit Management, and

counseled 13 governments, public services institutions, and major corporations.
