Grammar is a borrowed concept from western language. There is no Grammar in Chinese in certain senses. The greatest truths are the simplest! In simple way, Chinese Grammar is just the sequence construction of Characters, like our LEGOO brand. In the complicated way, Chinese Grammar can drive you to

crazy! In this book, I will show you the simplest truths in my own way, if not academic way! By referring to Cambridge IGCSE Chinese, Edexcel IGCSE Chinese (another two examination board) and HSK (Chicness Proficiency Test), IB Syllabus, Chinese grammar for native students, combining our 26 years experience in Teaching and editing our own materials. Here is the "LIFE SAVING" book called by many students for their exams. It takes our years' painful effort to edit. The book gives a quick revision for your coming exam! Grab it!

You can save time and money on your college education. And you can have an unforgettable adventure along the way. Step-by-step, College, Quicker shows you how! On her first day of college, Kate Stephens had no government aid, no private scholarships, no significant savings—and no idea how she was going to pay for her education. But she graduated with zero debt in just two years. Her secret? Finding faster, less expensive ways to earn credits toward her degree. In College, Quicker, Stephens guides you to an affordable education, sharing practical tips on how to:

- Design your graduation plan. Are you still in high school? Already in college? Get the lowdown on how colleges' transfer credit policies work and sample schedules to organize your plan.
- Choose the credit-earning options that work best for you. Are you a good test taker? Do you feel cooped up in classrooms? Basics, benefits, and bottom-line financial savings help you weigh the pros and cons of each option.
- Get started now! Hit the ground running with step-by-step instructions plus insider tips, common mistakes to avoid, and bonus opportunities.

24 Money-Saving Options for ANY Kind of Student:

- AP and IB exams
- Dual enrollment
- CLEP, DSST, TECEP
- Internships
- Military transcripts
- Prior learning portfolios
- Alternative spring breaks
- And more!

**Exam Practice Workbook for Mathematics IB Diploma**  
Hodder Education

This fourth edition of Physics for the IB Diploma has been written for the IB student. It covers the entire new IB syllabus including all options at both Standard and Higher levels. It includes a chapter on the role of physics in the Theory of Knowledge along with many discussion questions for TOK with answers. There are a range of questions at the end of each chapter with answers at the back of the book. The book also

includes worked examples and answers throughout, and highlights important results, laws, definitions and formulae. Part I of the book covers the core material and the additional higher level material (AHL). Part II covers the optional subjects.

**Mathematics - Analysis and Approaches** Disha Publications

Massive changes are taking place in society surrounding the delivery of information to individuals and the way they process this information. At work, at home, and in schools, the Internet and the World Wide Web are altering the individual's work, his leisure time, her workplace, and their educational environments. All of these changes and their consequences have traditionally been investigated largely within the domain of sociology, semiotics, mass communication, and computer science. The perspective from cognitive psychology has been lacking. The purpose of this volume is to fill this gap. The focus of the book is the cognitive effects of the modern digital environment. In addition, questions are raised about what cognitive conditions must exist for adequately processing information in multimedia environments. Internet use routinely involves the exchange of factual information but also a large amount of information with an interpersonal character is communicated. A socio-psychological perspective is needed to understand both kinds of communication, also to be able to design appropriate support tools. In Cognition in a Digital World, the emphasis is on the psychological analysis of interactive and continuing communication and discourse, rather than on the technical aspects of the individual's interaction at the interface. The three main themes of this volume are: \*conditions and consequences of multimedia information processing by the individual; \*socio-psychological characteristics of information transfer over the World Wide Web; and \*analysis of computer-mediated collaborative communication. Cognition in a Digital World will be of interest to a wide audience of researchers and students in the fields of cognitive science, education, communication sciences, computer science and the arts (discourse analysis).
