A comprehensive guide to creating, recording, editing, and sharing music and other audio John Wiley & Sons This Palgrave Pivot uses modeling from microeconomic theory and industrial organization to demonstrate how consumers and producers have responded to major changes in the music industry. Byun examines the important role of technology in changing its structure, particularly as new methods of creating and accessing music prove to be a double-edged sword for creators and producers. An underlying theme in the project is the question of how the business of music affects creativity, and how artists continue to produce creative output in the face of business pressures, the erosion of copyright enforcement, and rampant online piracy. In addition to being a useful resource for economists interested in the music industry, this approachable Pivot is also ideal for business and music majors studying the effect

of technology on their chosen fields.

Computer Basics Absolute Beginner's Guide, Windows 8.1 Edition Gulf Professional Publishing In general, communications is considered a glamor industry because of the creativity involved so competition is fierce, even for people with advanced degrees. I've known several people with journalism degrees who couldn't find a job so they ended up as high

school teachers or something like that. It's all about your ability with words. Newscasts have to be written everyday. They have to have fresh, new, exciting, crisp stories. It takes a certain pragmatic skill to write good news copy quickly. If you can get a story, summarize it down into your own words very quickly, edit news footage to go with it to create a quick story on the nightly newscast, you will easily be in demand because these skills are rather rare. People who do these jobs often get tired of the stress involved and quit. On the other hand, I heard of one talk show host who had two jobs in different cities. He did his morning talk show, took a plane to the other city 150 miles away, did his evening show

Web Radio Que Publishing So, you think you have what it takes to be a DJ and broadcaster? Awesome news for you! And guess what? This is very lucky news for you because in today's technology, it allows anyone who wants to do what was once a limited to a very small percentage of people. But, now you can become an online / internet DJ and / or broadcaster! You can actually be the DJ, the station manager and even the program director who decides what to play on the station, because it's all on the internet! There are several ways and approaches you can take in creating a streaming Internet radio station. Which one you decide to choose depends on what your goals are and what type of ways you wish to go about doing them in. If you are really motivated and inspired to start an Internet-based radio station that operates for the sole purpose of profit and revenue generation, your direction and approach will be different than from the individual who just wants to set up an Internet radio station for the only purpose of simply sharing his or her favorite

opinions, information or music with friends or people with the same interests as their own. There are many excellent options for the beginner that of which require very little technical knowledge. If you know how to create or put together MP3 format files, upload them onto a server and then choose some options, you can reach a world-wide audience! If this really interests you, keep on reading because you're about to enter the world of online radio.
