Deafness is a "low incidence" disability and, therefore not studied or understood in the same way as other disabilities. Historically, research in deafness has been conducted by a small group of individuals who communicated mainly with each other. That is not to say that we did not sometimes publish in the mainstream or attempt to communicate outside our small circle. Nonetheless, most research appeared in deafness-related publications where it was not likely to be seen or valued by psychologists. Those researchers did not understand what they could learn from the study of deaf people or how their knowledge of individual differences and abilities applied to that population. In *Deafness, Deprivation, and Intelligence*, Jeffrey Braden pulls together two often unrelated fields: studies of intelligence and deafness. The book includes the largest single compilation of data describing deaf people's intelligence that exists. Here is a careful, well-documented, and very thorough analysis of virtually all the research available. Those who have studied human intelligence have long noted that deafness provides a "natural experiment." This book makes evident two contrary results: on the one hand, some research points to the impact deafness has on intelligence; on the other hand, the research supports the fact that deafness has very little, if any, impact on nonverbal measures of intelligence.

The BNVR Test is a unique non-linguistic approach for identifying whether a cognitive (problem-solving) deficit as well as a linguistic deficit exists in individuals with acquired aphasia. Recognising cognitive deficits in terms of problem-solving may be a key factor in understanding why some individuals overcome their communication difficulties better than others. Failure to recognise problem-solving difficulties may lead to unrealistic expectations of therapeutic intervention and thus inappropriate management and goal setting. The BNVR requires the client to solve 10 everyday problems, presented in full-colour photographic format. It is short, requires minimal linguistic input, contains real-life situations and is likely to be suitable for non-English speaking individuals. It will be useful to speech language therapists, occupational therapists and psychologists who need to ascertain whether problem-solving skills are affected and to assist in multi-disciplinary team decision-making in acute and rehabilitation settings.

Volume 2, Measurement and Assessment of The Wiley Encyclopedia of Personality and Individual Differences The Encyclopedia of Personality and Individual Differences (EPID) is organized into four volumes that look at the many likenesses and differences between individuals. Each of these four volumes focuses on a major content area in the study of personality psychology and individuals' differences. The first

volume, Models and Theories, surveys the significant classic and contemporary viewpoints, perspectives, models, and theoretical approaches to the study of personality and individuals' differences (PID). The second volume on Measurement and Assessment examines key classic and modern methods and techniques of assessment in the study of PID. Volume III, titled Personality Processes and Individuals Differences, covers the important traditional and current dimensions, constructs, and traits in the study of PID. The final volume discusses three major categories: clinical contributions, applied research, and cross-cultural considerations, and touches on topics such as culture and identity, multicultural identities, cross-cultural examinations of trait structures and personality processes, and more. Each volume contains approximately 100 entries on personality and individual differences written by a diverse international panel of leading psychologists. Covers significant classic and contemporary personality psychology models and theories, measurement and assessment techniques, personality processes and individuals differences, and research. Provides a comprehensive and in-depth overview of the field of personality psychology. The Encyclopedia of Personality and Individual Differences is an important resource for all psychology students and professionals engaging in the study and research of personality.
