It's often declared smugly by people who believe they are sharing one of the indisputable truths of life that "it takes money to make money." That bit of "everybody knows" conventional wisdom is absolutely not true, and often cripples potential entrepreneurs before they even attempt acting upon what could be a winning idea. Not only can you start a business with zero dollars, I have documented success helping my clients make money even before they have a finished product or before they have spent a single penny launching their business or marketing their product! There are only two proven strategies for business success: (1) earn more, (2) spend less. Many business advisers will spend an inordinate amount of time focusing on how to generate more and more sales while ignoring the complementary strategy of spending less! In the internet age, I can assure you that just about everything--every product or service imaginable--that has a price tag attached to it, also has a zero-cost option. What I offer my clients are the most cost effective (i.e., cheapest) options available for entrepreneurs who don't have a lot of money to spend, or who are simply chronically cheap, like me! In this report, I'm going to share with you the tools of my trade: the resources, websites, services and software that allow me to write, design and publish my books, design and code websites, succeed at SEO, and generate sales--all for \$0

or very close to it! (Except where footnoted, I never suggest anything I've not personally tested, tried or benefited from)
