This book is available as open access through the Bloomsbury Open Access programme and is available on www.bloomsburycollections.com. Why are civil authorities in so-called liberal democracies affronted by public nudity and the Islamic full-face 'veil'? Why is law and civil order so closely associated with robes, gowns, suits, wigs and uniforms? Why is law so concerned with the 'evident' and the need for justice to be 'seen' to be done? Why do we dress and obey dress codes at all? In this, the first ever study devoted to the many deep cultural connections between dress and law, the author addresses these questions and more. His responses flow from the radical thesis that 'law is dress and dress is law'. Engaging with sources from The Epic of Gilgamesh to Shakespeare, Carlyle, Dickens and Damien Hirst, Professor Watt draws a revealing history of dress and civil order and offers challenging conclusions about the nature of truth and the potential for individuals to fit within the forms of civil life.

Group Work with Populations at Risk, Fourth Edition is a fundamental resource for practitioners in health and mental health settings and a comprehensive guidebook of group work skills. Geared toward students and professionals gaining a beginning understanding of groups, this volume describes how to work with vulnerable populations. The first chapters, new additions to this edition and written by a new co-editor, provide overarching skills and techniques that apply across group work settings and populations. These skills, along with case examples, provide a template for practice with groups. The vulnerable populations that are addressed include returning war veterans, immigrants, the aging and their caregivers, children and adults who have been abused, and people struggling with substance abuse issues, cancer, and chronic mental illness. New chapters have been added for survivors of sex trafficking, children in need of social skills training, people who experienced intimate partner violence, parents who are homeless, and fathers who are incarcerated. Each chapter (designed to stand alone for easy reference) describes the population and reviews the relevant literature, identifies themes and practice principles, presents case illustrations, provides evaluation guidance, and refers readers to key references and web resources.

While industries such as music, newspapers, film and publishing have seen radical changes in their business models and practices as a direct result of new technologies, higher education has so far resisted the wholesale changes we have seen elsewhere. However, a gradual and fundamental shift in the practice of academics is taking place. Every aspect of scholarly practice is seeing changes effected by the adoption and possibilities of new technologies. This book will explore these changes, their implications for higher education, the possibilities for new forms of scholarly practice and what lessons can be drawn from other sectors.

This new fifth edition of Information Resources in Toxicology offers a consolidated entry portal for the study, research, and practice of toxicology. Both volumes represents a unique, wide-ranging, curated, international, annotated bibliography, and directory of major resources in toxicology and allied fields such as environmental and occupational health, chemical safety, and risk assessment. The editors and authors are among the leaders of the profession sharing their cumulative wisdom in toxicology's subdisciplines. This edition keeps pace with the digital world in directing and linking readers to relevant websites and other online tools. Due to the increasing size of the hardcopy publication, the current edition has been divided into two volumes to make it easier to handle and consult. Volume 1: Background, Resources, and Tools, arranged in 5 parts, begins with chapters on the science of toxicology, its history, and informatics framework in Part 1. Part 2 continues with chapters organized by more specific subject such as cancer, clinical toxicology, genetic toxicology, etc. The categorization of chapters by resource format, for example, journals and newsletters, technical reports, organizations constitutes Part 3. Part 4 further considers toxicology's presence via the Internet, databases, and software tools. Among the miscellaneous topics in the concluding Part 5 are laws and regulations, professional education, grants and funding, and patents. Volume 2: The Global Arena offers contributed chapters focusing on the toxicology contributions of over 40 countries, followed by a glossary of toxicological terms and an appendix of popular quotations related to the field. The book, offered in both print and electronic formats, is carefully structured, indexed, and cross-referenced to enable users to easily find answers to their questions or serendipitously locate useful knowledge they were not originally aware they needed. Among the many timely topics receiving increased emphasis are disaster preparedness, nanotechnology, -omics, risk assessment, societal implications such as ethics and the precautionary principle, climate change, and children's environmental health. Introductory chapters provide a backdrop to the science of toxicology, its history, the origin and status of toxicoinformatics, and starting points for identifying resources. Offers an extensive array of

chapters organized by subject, each highlighting resources such as journals, databases, organizations, and review articles. Includes chapters with an emphasis on format such as government reports, general interest publications, blogs, and audiovisuals. Explores recent internet trends, web-based databases, and software tools in a section on the online environment. Concludes with a miscellany of special topics such as laws and regulations, chemical hazard communication resources, careers and professional education, K-12 resources, funding, poison control centers, and patents. Paired with Volume Two, which focuses on global resources, this set offers the most comprehensive compendium of print, digital, and organizational resources in the toxicological sciences with over 120 chapters contributions by experts and leaders in the field.

Women Online focuses on the problems of investigating interdisciplinary topics in women's studies, working with controlled vocabularies and inconsistent indexing, and locating feminist scholarship. The authoritative contributors to the book not only analyze these problems in general terms but also suggest practical strategies for making online research more effective and productive. The sixteen chapters in this much-needed book are organized into three broad categories covering disciplines, such as humanities and social sciences; format of the material covered, such as non-bibliographic and cited reference databases; and specific topics, such as lesbian studies and women of color. Chapter authors employ a variety of useful methods to analyze issues of coverage and

content. They compare the results of controlled vocabulary and free-text or full-text searching and make use of search examples, cited reference and multi-file searching, and bibliometric techniques, including analysis of recall, precision, overlap, relevancy, uniqueness, and trends in file growth. The Database Matrix provides an alphabetical listing of files discussed in the book and serves as a directory for online research in women's studies. Women Online will be useful to librarians, scholars, and students who search databases, as well as to producers who design and market them.

Over the past five decades, both peace education and human rights education have emerged distinctly and separately as global fields of scholarship and practice. Promoted through multiple efforts (the United Nations, civil society, grassroots educators), both of these fields consider content, processes, and educational structures that seek to dismantle various forms of violence, as well as move towards cultures of peace, justice and human rights. Educating for Peace and Human Rights Education introduces students and educators to the challenges and possibilities of implementing peace and human rights education in diverse global sites. The book untangles the core concepts that define both fields, unpacking their histories and conceptual foundations, and presents models and key research findings to help consider their intersections, convergences, and divergences. Including an annotated bibliography, the book sets forth a comprehensive research agenda, allowing emerging and seasoned scholars the opportunity to situate their research in conversation with the global fields of peace and human rights education.
