The G9 is Panasonic's first top of the line
camera specifically designed for stills
rather than being a stills/ video hybrid.
With 60fps burst shooting, class leading
stabilization, a user configurable menu
system, 80Mp High Resolution mode and
many other high end features it is of
necessity a complex camera. As with any
digital camera the heart of the machine is
the menu system, consisting of around

180 entries, many with their own sub
menus offering many hundred of options.
It is no surprise then that even
experienced users can find themselves
scratching their heads as they wade
through the mass of options.. This book
goes through each and every every menu
choice and explains what it does and why
you might want to do it. It doesn't try to
teach you photography. You wouldn't have
chosen a G9 if you didn't already have
some expertise. What my books aims to
do is to familiarise yourself with the G9
and learn to tailor it to your own taste and
needs. Having done that, you I think you
will find using the G9 not only a pleasure
but inspiring as well.
