[Leadership in the Construction Industry](#) Sub-Saharan Publishers Current Topics in Management is an annual scholarly journal and this volume is divided into four major sections: Managing Conflict and Justice; Leadership, Social

Capital, and Personality; Entrepreneurship and Small Business Management; and Ethics, Learning, and Change. These contributions seek an integration of theory, research, and practice, which is the essential goal of Current Topics in Management. The first section contains two empirical studies on organizational conflict and a theoretical work that addresses the application of organizational justice theory to consumer behavior. The second section contains three empirical studies relating to the leadership language used by senators Hillary Clinton and Barack Obama during the last presidential election, building social capital through leader-member exchanges, and the big-five personality and financial performance of fund managers. Section three contains an essay on revising Phelan's model on entrepreneurship and a case study on a small business organization. The fourth section contains three contributions, two theoretical papers and an empirical study of the administration of state governments. The contributions

included are "The Moderating Role of Social Attitudes on the Relationship between Diversity and Conflict" "The Effects of Geographic Dispersion and Team Tenure" "Fairness and Consumer Behavior" "Obama vs. Clinton: Exploring the Impact of Leadership Language" "Social Capital Via Leader" "Financial Performance of Fund Managers" "A Conceptual Framework Linking Entrepreneurs to International New Venture Competitiveness" and "BSL Printing Company: A Case Study." An important feature of Ghanaian tertiary education is the foundational African Studies Programme which was initiated in the early 1960s. Unfortunately hardly any readers exist which bring together a body of knowledge on the themes, issues and debates which inform and animate research and teaching in African Studies particularly on the African continent. This becomes even more important when we consider the need for knowledge on Africa that is not Eurocentric or sensationalised, but driven from internal understandings of life and prospects in Africa. Dominant representations and perceptions of Africa usually depict a continent in crisis. Rather than buying into external representations of Africa, with its 'lacks' and aspirations for Western modernities, we insist that African scholars in particular should be

in the forefront of promoting understanding of the pluri-lingual, overlapping, and dense reality of life and developments on the continent, to produce relevant and usable knowledge. Continuing and renewed interest in Africa's resources, including the land mass, economy, minerals, visual arts and performance cultures, as well as bio-medical knowledge and products, by old and new geopolitical players, obliges African scholars to transcend disciplinary boundaries and to work with each other to advance knowledge and uses of those resources in the interests of Africa's people.

Cut through the "mush" to sustain and improve the quality of your partnerships at work. Gervase R. Bushe named one of HR Magazine's Most Influential Thinkers 2016
What happened to that win-win partnership with your boss, colleague, or direct report that suddenly dissolved into mistrust and suspicion? Despite your best intentions, how did hidden agendas, unresolved conflicts, and miscommunication get in the way? With new research, fresh insight, and up-to-date examples of what it takes to collaboratively organize and sustain healthy relationships at work, this newly revised edition of Clear Leadership tackles these issues head-on. Building on the powerful concepts that made the first edition such a success, Gervase Bushe explains why even the most promising

partnerships get derailed and what you can do about it.

Making the Most of The Leadership Challenge and the Leadership Practices Inventory (LPI)

“ The side that knows when to fight and when not will take the victory. There are roadways not to be traveled, armies not to be attacked, walled cities not to be assaulted. ” —Sun-Tzu

We live in dangerous times, when a new kind of leadership is required. Visionary and ruthlessly strategic, *Warrior Politics* extracts the best of the wisdom of the ages for modern leaders who are faced with the complex life-and-death challenges of today ’ s world—and determined to win. Sun-Tzu urges leaders to “ plan and calculate like a hungry man. ”

Machiavelli defines a policy not by its excellence but by its outcome. Churchill derives his greatness from his imagination of history. Livy shows that the vigor to face down adversaries must ultimately come from pride in our own past achievements. “ Never mind if they call your caution timidity, your wisdom sloth, your generosity weakness, ” he writes.

“ It is better that a wise enemy should fear you than that foolish friends should praise. ”

“ Men often oppose a thing merely because they have no agency in planning it, ”

Alexander Hamilton says, “ or because it may

have been planned by those whom they dislike. ” Replete with maxims, warnings, examples from history, and shrewd recommendations, *Warrior Politics* wrests from the past the lessons we need to arm ourselves for the present. It offers an invaluable template for any decision-maker—in foreign policy or in business—faced with high stakes and inadequate knowledge of a mine-filled terrain. As we gear ourselves up for a new kind of war, no book is more prescient, more shrewd, or more essential.

A New Look at Old Leadership Questions
Pickle Partners Publishing

The purpose of this book series is to promote research on educational leadership for social justice. Specifically, we seek edited volumes, textbooks, and full-length studies focused on research that explores the ways educational leadership preparation and practice can be a means of addressing equity concerns throughout P-20 education. Within this book *Leadership for Social Justice: Promoting Equity and Excellence Through Inquiry and Reflective Practice* the contributors provide a variety of rich perspectives to the social justice phenomenon from the lens of empirical, historical, narrative, and conceptual designs. These designs reiterate the importance of bridging theory and practice while

simultaneously producing significant research and scholarship in the field. Collectively, the authors seek to give voice to empowering, social justice-focused research—an area that continues to garner much interest in the areas of educational leadership research, teaching, and learning. In conjunction with the “ theme ” of this issue, the chapters offer research from an American perspective and offer suggestions, and implications for the field of educational leadership on both a national and international level. The collection contributes to research, theory and practice in educational and community settings.

[The 5 Levels of Leadership](#) Princeton University Press

This book presents a new framework for leadership in the construction industry which draws from the authentic leadership construct. The framework has three major themes: self-leadership, self-transcendent leadership, and sustainable leadership. Despite its significance, leadership has

not been given due importance in the construction industry as focus is placed on managerial functionalism. At the project level, even with the technological advances in the industry in recent years, construction is realized in the form of people undertaking distinct interdependent activities which require effective leadership. The industry faces many challenges including: demanding client requirements and project parameters; more stringent regulations, codes and systems; intense competition in the industry; and threats from disruptive enterprise. In such a complex environment, technology-driven and tool-based project and corporate management is insufficient. It must be complemented by a strategic, genuine, stakeholder-focused and ethical leadership. Leadership in the Construction Industry is based on a study on authentic leadership and its development in Singapore. Leadership theories and concepts are reviewed; the importance of leadership in the construction industry is discussed; and the grounded theory approach which was applied in the study is explained. Many eminent construction professionals in Singapore were interviewed in the field study. Emerging from the experiences of the leaders documented in this book are three major themes: (1) self-leadership: how leaders engage in various self-related processes such as self-awareness, self-regulation, and role modeling. (2) self-transcendent leadership: how leaders go beyond leading themselves to leading others through servant leadership, shared leadership, spiritual leadership, and socially-

responsible leadership; and, finally, (3) sustainable leadership or the strategies leaders employ to make the impact of their leadership lasting. A synthesis of these themes and their implications for leadership development is presented before the book concludes with some recommendations for current and aspiring leaders about how they can engage with them. This book is essential reading for all construction practitioners from all backgrounds; and researchers on leadership and management in construction.

[Proven Steps to Maximize Your Potential](#) Harvard Business Press

This collection of essays examines various aspects of leadership from several disciplinary perspectives. An Ancient Guide to Wise Leadership General Services Administration

Use this helpful book to learn about the leadership tools to fuel success, grow your team, and become the visionary you were meant to be. True leadership isn't a matter of having a certain job or title. In fact, being chosen for a position is only the first of the five levels every effective leader achieves. To become more than "the boss" people follow only because they are required to, you have to master the ability to invest in people and inspire them. To grow further in your role, you must achieve results and build a team that produces. You need to help people to develop their skills to become leaders in their own right. And if you have the skill and dedication, you can reach the pinnacle of leadership—where experience will allow you to extend your influence beyond your

immediate reach and time for the benefit of others. The 5 Levels of Leadership are: 1. Position—People follow because they have to. 2. Permission—People follow because they want to. 3. Production—People follow because of what you have done for the organization. 4. People Development—People follow because of what you have done for them personally. 5. Pinnacle—People follow because of who you are and what you represent. Through humor, in-depth insight, and examples, internationally recognized leadership expert John C. Maxwell describes each of these stages of leadership. He shows you how to master each level and rise up to the next to become a more influential, respected, and successful leader.

Thoughts and Essays about Leadership and Life Disha Publications

This book tells the remarkable story of Robert F. Williams--one of the most influential black activists of the generation that toppled Jim Crow and forever altered the arc of American history. In the late 1950s, as president of the Monroe, North Carolina, branch of the NAACP, Williams and his followers used machine guns, dynamite, and Molotov cocktails to confront Klan terrorists. Advocating "armed self-reliance" by blacks, Williams challenged not only white supremacists but also Martin Luther King Jr. and the civil rights establishment. Forced to flee during the 1960s to Cuba--where he

broadcast "Radio Free Dixie," a program of black politics and music that could be heard as far away as Los Angeles and New York City--and then China, Williams remained a controversial figure for the rest of his life. Historians have customarily portrayed the civil rights movement as a nonviolent call on America's conscience--and the subsequent rise of Black Power as a violent repudiation of the civil rights dream. But Radio Free Dixie reveals that both movements grew out of the same soil, confronted the same predicaments, and reflected the same quest for African American freedom. As Robert Williams's story demonstrates, independent black political action, black cultural pride, and armed self-reliance operated in the South in tension and in tandem with legal efforts and nonviolent protest.

How to Be a Leader John Wiley & Sons

"This book charts the period before Taiwan's post-war economic miracle took hold (1949-1965) and proffers that it was the Kuomintang Government's endorsement of property rights reform and institutional change that enabled Taiwan to transform from an impoverished command economy to a market-based economy, which in turn led to Taiwan becoming one

of the fastest growing economies in the world. Using first-hand interview material with key government officials from the period, and analysis of hitherto unused Chinese-language archives, this book is empirically very rich. It also gives the reader insights into Taiwan's developmental experience and the direction in which, under different circumstances, China's post-war development might have proceeded. Taiwan's Economic Transition will be an invaluable resource for anyone interested in the economic and political history and development of Taiwan. More broadly it will also appeal to scholars and students of China's historical and contemporary development"--

Essays on Leadership Ethics Simon and Schuster Books about leadership abound, often generalizing from a heroic leader's own experiences or reflecting the latest incremental advances in scholarly theorizing. Rethinking Leadership is different in that Ladkin questions the key questions of leadership thinking and thus arrives at a radically different conception of leadership. It is a welcome conception that recognizes the embodied, sensual, felt nature of leadership as an ongoing process involving leaders and followers within a particular context. For the complex and challenging times we live in, we need complex and

challenging conceptions of leadership and Donna Ladkin has given us an excellent starting place. Steve Taylor, Worcester Polytechnic Institute, US Beautifully written, insightful and novel, this book departs nicely from mainstream views on leadership and can be strongly recommended to anyone wanting a new look on the complexities, meanings and dynamics of leadership and workplace relations. Mats Alvesson, Lund University, Sweden Donna Ladkin's inspiring and informed book breaks new ground in leadership studies. Writing lucidly, warmly and accessibly, Ladkin makes philosophy to bear on some key themes of leadership. Picking up concepts from philosophy's all-time greats, she enriches the existing leadership discourse powerfully. Questions of charisma, vision, indeed the nature of leadership itself, are cast in fresh settings, and they become alive. Skilfully avoiding becoming overtly abstract, with a keen eye to examples, Donna Ladkin delivers a delightful, elevating and original contribution to the rethinking of leadership. Esa Saarinen, Helsinki University of Technology, Finland Adopting a post-positivist phenomenological perspective inspired by the writings of Husserl and Heidegger among others, Donna Ladkin crafts a series of philosophical questions that prompt the reader to deconstruct and reposition many habitually held views of leaders and leadership. Through her deep questioning, Ladkin reminds us that wisdom, the virtue of practical circumspection is central to the ethical and aesthetic moment of leading. Rethinking Leadership is a refreshing and much-

needed re-evaluation of the field, which should be read by anyone with a serious interest in the subject. Peter Case, University of the West of England, UK Writing anything new about leadership might seem like a difficult task these days. Writing anything new and interesting about leadership might seem beyond most of us. Writing anything new, interesting and provocative about leadership is restricted to only a few very talented scholars. Ladkin is one of these very talented scholars she has done all three in a groundbreaking review of the nature of leadership and the questions we should be asking about this phenomenon. Keith Grint, University of Warwick, UK A must-read for serious leadership studies scholars, Rethinking Leadership offers a radical reconceptualisation of leadership as a contextually embedded, physically embodied phenomenon. The book arrives at original and surprising answers to perennial questions such as What is leadership? and How do leaders lead change?, by addressing them from a philosophical, rather than psychological or sociological standpoint. Beautifully written, Ladkin makes complex ideas accessible by illustrating them with practical examples drawn from her wide experience as a leadership academic and management consultant across a range of commercial, political and not-for-profit organisations. A fresh voice amongst the crowded field of leadership studies, Rethinking Leadership delivers not just new answers, but an entirely new way of thinking about leadership and its role in contemporary society.

Promoting Equity and Excellence Through Inquiry and Reflective Practice Routledge "Containing the public messages, speeches, and statements of the President", 1956-1992. Leadership, Property Rights and Institutional Change 1949-1965 Harvard Business Press Organizational Behavior and Public Management reveals how organizational behavior enables managers to direct resources that advance the programs and policies of public and government. This edition offers a public sector perspective of core topics, such as communication, decision-making, leadership, management ethics, motivation, organizational change, participation and performance appraisal. Contemporary Psychology called this book "skillful and comprehensive... There is a need for a text like this... the device of juxtaposing theory and application is a sound one." The authors discuss such topics as communication, decision making, worker participation and total quality management, organizational change, management systems, information, computers and organization theory in public management.

Why Leadership Demands a Pagan Ethos Psychology Press
In this book, some of the world's leading scholars come together to describe their thinking and research on the topic of the psychology of leadership. Most of the chapters were originally presented as papers at a research conference held in 2001 at the Kellogg School of Management of Northwestern University. The contributions span traditional social psychological areas, as well as organizational theory; examining leadership as a psychological process and as afforded by organizational constraints and opportunities. The editors' goal was not to focus the chapters on a single approach to the study and conceptualization of leadership but rather to display the diversity of issues that surround the topic.

Leadership scholars have identified a host of approaches to the study of leadership. What are the personal characteristics of leaders? What is the nature of the relation between leaders and followers? Why do we perceive some people to be better leaders

than others? What are the circumstances that evoke leadership qualities in people? Can leadership be taught? And so on. The contributions to this book examine these important questions and fall into three categories: conceptions of leadership, factors that influence the effectiveness of leadership, and the consequences and effects of leadership on the leader. All in all, the chapters of this volume display part of a broad spectrum of novel and important approaches to the study of the psychology of leadership. We hope that they are equally useful to those who are or would be leaders and to those who study the topic. As recent events have served to remind us, it is too important a topic to be ignored by psychologists.
