Robert F. Williams and the Roots of Black Power Edward Elgar Publishing

"The side that knows when to fight and when not will take the victory. There are roadways not to be traveled, armies not to be attacked, walled cities not to be assaulted." —Sun-Tzu We live in dangerous times, when a new kind of leadership is required. Visionary and ruthlessly strategic, Warrior Politics extracts the best of the wisdom of the ages for modern leaders who are faced with the complex life-and-death challenges of today's world—and determined to win. Sun-Tzu urges leaders to "plan and calculate like a hungry man." Machiavelli defines a policy not by its excellence but by its outcome. Churchill derives his greatness from his imagination of history. Livy shows that the vigor to face down adversaries must ultimately come from pride in our own past achievements. "Never mind if they call your caution timidity, your wisdom sloth, your generosity weakness," he writes. "It is better that a wise enemy should fear you than that foolish friends should praise." "Men often oppose a thing merely because they have no agency in planning it," Alexander Hamilton says, "or because it may have been planned by those whom they dislike." Replete with maxims, warnings, examples from history, and shrewd recommendations, Warrior Politics wrests from the past the lessons we need to arm ourselves for the present. It offers an invaluable template for any decision-maker—in foreign policy or in business—faced with high stakes and inadequate knowledge of a mine-filled terrain. As we gear ourselves up for a new kind of war, no book is more prescient, more shrewd, or more essential.

**Sustaining Real Collaboration and Partnership at Work** Harvard Business Press

In this book, some of the world's leading scholars come together to describe their thinking and research on the topic of the psychology of leadership. Most of the chapters were originally presented as papers at a research conference held in 2001 at the Kellogg School of Management of Northwestern University. The contributions span traditional social psychological areas, as well as organizational theory; examining leadership as a psychological process and as afforded by organizational constraints and opportunities. The editors' goal was not to focus the chapters on a single approach to the study and conceptualization of leadership but rather to display the diversity of issues that surround the topic. Leadership scholars have identified a host of approaches to the study of leadership. What are the personal characteristics of leaders? What is the nature of the relation between leaders and followers? Why do we perceive some people to be better leaders than others? What are the circumstances that evoke leadership qualities in people? Can leadership be taught? And so on. The contributions to this book examine these important questions and fall into three categories: conceptions of leadership, factors that influence the effectiveness of leadership, and the consequences and effects of leadership on the leader. All in all, the chapters of this volume display part of a broad spectrum of novel and important approaches to the study of the psychology of leadership. We hope that they are equally useful to those who are or would be leaders and to those who study the topic. As recent events have served to remind us, it is too important a topic to be ignored by psychologists.

**The Habits to Achieve Remarkable Success** Disha Publications

An important feature of Ghanaian tertiary education is the foundational African Studies Programme which was initiated in the early 1960s. Unfortunately hardly any readers exist which bring together a body of knowledge on the themes, issues and debates which inform and animate research and teaching in African Studies particularly on the African continent. This becomes even more important when we consider the need for knowledge on Africa that is not Eurocentric or sensationalised, but driven from internal understandings of life and prospects in Africa. Dominant representations and perceptions of Africa usually depict a continent in crisis. Rather than buying into external representations of Africa, with its 'lacks' and aspirations for Western modernities, we insist that African scholars in particular should be in the forefront of promoting understanding of the pluri-lingual, overlapping, and dense reality of life and developments on the continent, to produce relevant and usable knowledge. Continuing and renewed interest in Africa's resources, including the land mass, economy, minerals, visual arts and performance cultures, as well as bio-medical knowledge and products, by old and new geopolitical players, obliges African scholars to transcend disciplinary boundaries and to work with each other to advance knowledge and uses of those resources in the interests of Africa's people.

How can you become a more successful manager, a stronger team leader and a motivator who gets the best results from a group? Ken Blanchard's inspiring new book provides the answer. In a beguiling, sometimes humorous fashion, THE LEADERSHIP PILL conjures up a tantalizing possibility: What if there was a pill that could stimulate the natural powers of the mind and body to provide leadership? In the story, an amazing new pill heightens one leader's powers, but contains the wrong ingredients, stimulating him in a short-sighted direction. He is coercive, obsessed with immediate results and drives his team relentlessly until, after a brief spike in performance, they suffer early burnout. In contrast, the 'Effective Leader', working without a pill, inspires and supports his team. He supplies the right ingredients, earning the respect and trust of his team with a blend of integrity, partnership and affirmation. Ultimately it is recognised that there is more to effective leadership than a wonder 'pill'. Destined to be a transforming experience for thousands of readers, THE LEADERSHIP PILL shows how to apply the right techniques, no matter how pressured a business situation.

"This book charts the period before Taiwan's post-war economic miracle took hold (1949-1965) and proffers that it was the Kuomintang Government's endorsement of property rights reform and institutional change that enabled Taiwan to transform from an impoverished command economy to a market-based economy, which in turn led to Taiwan becoming one of the fastest growing economies in the world. Using first-hand interview material with key government officials from the period, and analysis of hitherto unused Chinese-language archives, this book is empirically very rich. It also gives the reader insights into Taiwan's developmental experience and the direction in which, under different circumstances, China's post-war development might have proceeded. Taiwan's Economic Transition will be an invaluable resource for anyone interested in the economic and political history and development of Taiwan. More broadly it will also appeal to scholars and students of China's historical

and contemporary development"--

Winner of the University of San Diego Outstanding Leadership Book Award

2012! Shortlisted for the British Psychological Society Book Award 2011!

Shortlisted for the CMI (Chartered Management Institute) Management Book of

the Year Award 2011 – 2012! According to John Adair, the most important word

in the leader's vocabulary is "we" and the least important word is "I". But if this

is true, it raises one important question: why do psychological analyses of

leadership always focus on the leader as an individual – as the great "I"? One

answer is that theorists and practitioners have never properly understood the

psychology of "we-ness". This book fills this gap by presenting a new

psychology of leadership that is the result of two decades of research inspired

by social identity and self-categorization theories. The book argues that to

succeed, leaders need to create, champion, and embed a group identity in order

to cultivate an understanding of 'us' of which they themselves are

representative. It also shows how, by doing this, they can make a material

difference to the groups, organizations, and societies that they lead. Written in

an accessible and engaging style, the book examines a range of central

theoretical and practical issues, including the nature of group identity, the basis

of authority and legitimacy, the dynamics of justice and fairness, the

determinants of followership and charisma, and the practice and politics of

leadership. The book will appeal to academics, practitioners and students in

social and organizational psychology, sociology, political science and anyone

interested in leadership, influence and power.
