SAGE has unparalleled depth in journal back lists in the field of organization studies, and publishes several of the top journals in the field, including Organization, Human Relations and Organization Studies. This four-volume set brings together over sixty of the key papers published in SAGE books and journals since the turn of the millennium, many of which are not easily available in traditional library holdings. Professor Stewart Clegg is widely recognised as a preeminent scholar of organization studies, and together with an international editorial board of ten renowned scholars in the field, has arranged this selection to help the reader better understand the developments in the field from different perspectives. Emphasis is placed on the 'history of the present' of organization studies, with articles that discuss contemporary issues and foreshadow further developments in the field, across popular theoretical perspectives such as discourse analysis, institutional theory and complexity theory.  
**The SAGE Encyclopedia of Communication Research Methods** Cengage Learning  
Communication research is evolving and changing in a world of online journals, open-access, and new ways of obtaining data and conducting experiments via the Internet. Although there are generic encyclopedias describing basic social science research methodologies in general, until now there has been no comprehensive A-to-Z reference work exploring methods specific to communication and media studies. Our entries, authored by key figures in the field, focus on special considerations when applied specifically to communication research, accompanied by engaging examples from the literature of communication, journalism, and media studies. Entries cover every step of the research process, from the creative development of research topics and questions to literature reviews, selection of best methods (whether quantitative, qualitative, or mixed) for analyzing research results and publishing research findings, whether in traditional media or via new media outlets. In addition to expected entries covering the basics of theories and methods traditionally used in communication research, other entries discuss important trends influencing the future of that research, including contemporary practical issues students will face in communication professions, the influences of globalization on research, use of new recording technologies in fieldwork, and the challenges and opportunities related to studying online multi-media environments. Email, texting, cellphone video, and blogging are shown not only as topics of research but also as means of collecting and analyzing data. Still other entries delve into considerations of accountability, copyright, confidentiality, data ownership and security, privacy, and other aspects of conducting an ethical research program. Features: 652 signed entries are contained in an authoritative work spanning four volumes available in choice of electronic or print formats. Although organized A-to-Z, front matter includes a Reader’s Guide grouping entries thematically to help students interested in a specific aspect of communication research to more easily locate directly related entries. Back matter includes a Chronology of the development of the field of communication research; a Resource Guide to classic books, journals, and associations; a Glossary introducing the terminology of the field; and a detailed Index. Entries conclude with References/Further Readings and Cross-References to related entries to guide students further in their research journeys. The Index, Reader’s Guide themes, and Cross-References combine to provide robust search-and-browse in the e-version.

'For any criminologist looking to make sense of recent developments in the field, this is the go-to book. In essays by leading specialists, it provides the latest updates on traditional theories whilst charting new directions. It also offers intepretive frameworks for criminology's current flux and fragmentation and closely examines relationships among theory, policy, and criminal justice practice. Invaluable and indispensible!' - Nicole Rafter, Professor, Northeastern University  
The SAGE Handbook of Criminological Theory re-centres theory in the boldest, most thought-provoking form possible within the criminological enterprise. Written by a team of internationally respected specialists, it provides readers with a clear overview of criminological theory, enabling them to reflect critically upon the variety of theoretical positions - traditional, emergent and desirable - that are constitutive of the discipline at the beginning of the twenty-first century. Each chapter has been specially commissioned to include the following: " A brief historical overview of the theoretical perspective " Core ideas and key associated concepts " A critical review of the contemporary status of the perspective " Reflections on future developments  
In addition the Handbook features a substantive introduction by the editors, providing a review of the development of criminological theory, the state of contemporary criminological theory and emergent issues and debates. The SAGE Handbook of Criminological Theory is an indispensable international resource for libraries and scholars of all levels studying the rapidly developing, interdisciplinary field of criminology.

The design and evaluation of questionnaires—and of other written and oral materials—is a challenging endeavor, fraught with potential pitfalls. Cognitive Interviewing: A Tool for Improving Questionnaire Design describes a means of systematically developing survey questions through investigations that intensively probe the thought processes of individuals who are presented with those inquiries. The work provides general guidance about questionnaire design, development, and pre-testing sequence, with an emphasis on the cognitive interview. In particular, the book gives detailed instructions about the use of verbal probing techniques, and how one can elicit additional information from subjects about their thinking and about the manner in which they react to tested questions. These tools help researchers discover how well their questions are working, where they are failing, and determine what they can do to rectify the wide variety of problems that may surface while working with questionnaires.

Educational psychology is a broad field characterized by the study of individuals in educational settings and how they develop and learn. It incorporates information from such sub-disciplines such as developmental psychology, human development across the life span, curriculum and instruction, motivation, and measurement and assessment. Neil Salkind has mined the rich and extensive backlist of SAGE education and psychology journals to pull together a collection of almost 100 articles to be the definitive research resource on education psychology. Section One: Human Growth and Development focuses on the processes involved in human growth and development including ages and stages of development, different theoretical perspectives and the role and effectiveness of early intervention among other topics. Section Two: Cognition, Learning and Instruction concentrates on the mechanisms, through which individuals learn and retain information. Section Three: Motivation explores why individuals seek out goals and what the mechanisms are that characterize this search as it relates to learning. Section Four: Measurement, Assessment and Statistics looks at the topics that are critical to understanding individual differences, the growth in the use of computers as assessment tools, qualitative and quantitative methods, statistical techniques and evaluation.

This volume contains the papers presented at RECOMB 2010: the 14th Annual International Conference on Research in Computational Molecular Biology held in Lisbon, Portugal, during April 25–28, 2010. The RECOMB conference series was started in 1997 by Sorin Istrail, Pavel Pevzner, and Michael Waterman. RECOMB 2010 was hosted by INESC-ID and Instituto Superior Tecnico, or- nized by a committee chaired by Arlindo Oliveira and took place at the Int- national Fair of Lisbon Meeting Centre. This year, 36 papers were accepted for presentation out of 176 submissions. The papers presented were selected by the Program Committee (PC) assisted by a number of external reviewers. Each paper was reviewed by three members of the PC, or by external reviewers, and there was an extensive Web-based discussion over a period of two weeks, leading to the ?nal decisions. RECOMB 2010 also introduced a Highlights Track, in which six additional presentations by senior authors were chosen from papers published in 2009. The RECOMB conferenceseriesiscloselyassociatedwiththeJou rnalofComputational Biology, which traditionally publishes special issues devoted to presenting full versions of selected conference papers.

The scholarship of management teaching and learning has established itself as a field in its own right and this benchmark handbook is the first to provide an account of the discipline. Original chapters from leading international academics identify the key issues and map out where the discipline is going. Each chapter provides a comprehensive and critical overview of the given topic area, highlights current debates and reviews the emerging research agenda. Chapters embrace the study of organizations as a whole, the concepts of individual and collective learning, the delivery of formal management education and the facilitation of management development. Through consideration of these themes the Handbook analyzes, promotes and critiques the contribution of management learning, education and development to management understanding. It will be an invaluable point of reference for all students and researchers interested in broadening their understanding of this exciting and dynamic new field.

For more than 40 years, SAGE has been one of the leading international publishers of works on quantitative research methods in the social sciences. This new collection provides readers with a representative sample of the best articles in quantitative methods that have appeared in SAGE journals as chosen by W. Paul Vogt, editor of other successful major reference collections such as Selecting Research Methods (2008) and Data Collection (2010). The volumes and articles are organized by theme rather than by discipline. Although there are some discipline-specific methods, most often quantitative research methods cut across disciplinary boundaries. Volume One: Fundamental Issues in Quantitative Research Volume Two: Measurement for Causal and

Statistical Inference Volume Three: Alternatives to Hypothesis

Testing Volume Four: Complex Designs for a Complex World

Quantitative methodology is a highly specialized field, and as with any highly specialized field, working through idiosyncratic language can be very difficult made even more so when concepts are conveyed in the language of mathematics and statistics. The Sage Handbook of Quantitative Methodology for the Social Sciences was conceived as a way of introducing applied statisticians, empirical researchers, and graduate students to the broad array of state-of-the-art quantitative methodologies in the social sciences. The contributing authors of the Handbook were asked to write about their areas of expertise in a way that would convey to the reader the utility of their respective methodologies. Relevance to real-world problems in the social sciences is an essential ingredient of each chapter. The Handbook consists of six sections comprising twenty-five chapters, from topics in scaling and measurement, to advances in statistical modelling methodologies, and finally to broad philosophical themes that transcend many of the quantitative methodologies covered in this handbook.

Conceived in an era of rapid post–Cold War economic liberalization, the North American Free Trade Agreement (NAFTA), signed in 1994, brought together Canada, Mexico, and the United States with the aim of creating a regional trade bloc that eliminated the friction and costs of trade between the three nations. Without an overarching institutional framework, NAFTA never sought to attain the levels of integration achieved by the European Union – for many it was a missed opportunity – and never quite fulfilled its potential as a single market. And under Donald Trump's administration a trilateral trade agreement has become increasingly precarious. Freeing Trade in North America explains the theory behind the politics and economics of trade in North America, offering an accessible and concise analysis of the key provisions, shortcomings, and past revision efforts of the governments involved. At a time of increasing protectionism and heightened awareness of trading relationships, the book highlights the lessons to be learned from the fraught history of one of the largest trade blocs in the world.
