First published in 1989 as

Tuning New Generation

Engines, this best-selling

book has been fully updated

to include the latest

developments in four-stroke
engine technology in the era

of pollution controls,

unleaded and low-lead

petrol, and electronic

management systems. It

explains in non-technical

language how modern

engines can be modified for

road and club competition

use, with the emphasis on

power and economy, and

how electronic management

systems and emission

controls work.
