Springer Tracing how codes arose when they did, and how they were adapted over time, the authors examine the increasing influence of regulatory codes over urban design and planning in the past century. Field & Stream Routledge In *Reproductive Justice*, sociologist Barbara Gurr provides the first analysis of Native American women's reproductive healthcare and offers a sustained consideration of the movement for reproductive justice in the United States. The book examines the reproductive

healthcare experiences on Pine Ridge Reservation, home of the Oglala Lakota Nation in South Dakota—where Gurr herself lived for more than a year. Gurr paints an insightful portrait of the Indian Health Service (IHS)—the federal agency tasked with providing culturally appropriate, adequate healthcare to Native Americans—shedding much-needed light on Native American women’s efforts to obtain prenatal care, access to contraception, abortion services, and access to care after sexual assault. Reproductive Justice

goes beyond this local story to look more broadly at how race, gender, sex, sexuality, class, and nation inform the ways in which the government understands reproductive healthcare and organizes the delivery of this care. It reveals why the basic experience of reproductive healthcare for most Americans is so different—and better—than for Native American women in general, and women in reservation communities particularly. Finally, Gurr outlines the strengths that these communities can bring to the creation

of their own reproductive justice, and considers the role of IHS in fostering these strengths as it moves forward in partnership with Native nations. Reproductive Justice offers a respectful and informed analysis of the stories Native American women have to tell about their bodies, their lives, and their communities. "Phantoms is gruesome and unrelenting...It's well realized, intelligent, and humane." —Stephen King
They found the town silent, apparently abandoned. Then they found the first body, strangely

swollen and still warm. One hundred fifty were dead, 350 missing. But the terror had only begun in the tiny mountain town of Snowfield, California. At first they thought it was the work of a maniac. Or terrorists. Or toxic contamination. Or a bizarre new disease. But then they found the truth. And they saw it in the flesh. And it was worse than anything any of them had ever imagined...
