START-UP NATION addresses the trillion dollar question: How is it that Israel-- a country of 7.1 million, only 60 years old, surrounded by enemies, in a constant state of war since its founding, with no natural resources-- produces more start-up companies than large, peaceful, and stable nations like Japan, China, India, Korea, Canada and the UK? With the savvy of foreign policy insiders, Senor and Singer examine the lessons of the country's adversity-driven culture, which flattens hierarchy and elevates informality-- all

backed up by government policies focused on innovation. In a world where economies as diverse as Ireland, Singapore and Dubai have tried to re-create the "Israel effect", there are entrepreneurial lessons well worth noting. As America reboots its own economy and can-do spirit, there's never been a better time to look at this remarkable and resilient nation for some impressive, surprising clues.

The ideal reference for students of botany and horticulture, gardeners, and

---

naturalists. The diverse external shapes and structures that make up flowering plants can be bewildering and even daunting, as can the terminology used to describe them. An understanding of plant form—plant morphology—is essential to appreciating the wonders of the plant world and to the study of botany and horticulture at every level. In this ingeniously designed volume, the complex subject becomes both accessible and manageable. The first part of the book describes and clearly illustrates the major plant structures that can be seen with the naked eye or a hand lens. The second part focuses on how plants grow: bud development, the growth of reproductive organs, leaf arrangement, branching patterns, and the

accumulation and loss of structures. Aimed at students of botany and horticulture, enthusiastic gardeners, and amateur naturalists, it functions as an illustrated dictionary, a basic course in plant morphology, and an intriguing and enlightening book to dip into.

From the New York Times bestselling author of A Deadly Education comes the fourth volume of the Temeraire series, as the Napoleonic Wars bring Will Laurence and Temeraire to Africa in search of aid. " Temeraire is a dragon for the ages. " —Terry Brooks Tragedy has struck His Majesty's Aerial Corps, whose magnificent fleet of fighting dragons and their human captains valiantly defends England ' s shores against the encroaching armies of Napoleon Bonaparte. An epidemic of unknown origin and no known cure is decimating the noble dragons '

ranks—forcing the hopelessly stricken into quarantine. Now only Temeraire and a pack of newly recruited dragons remain uninfected—and stand as the only means of an airborne defense against France's ever bolder sorties. Bonaparte's dragons are already harrowing Britain's ships at sea. Only one recourse remains: Temeraire and his captain, Will Laurence, must take wing to Africa, whose shores may hold the cure for the mysterious and deadly contagion. On this mission there is no time to waste, and no telling what Don't miss the magic of Naomi Novik's Temeraire series: HIS MAJESTY'S DRAGON • THRONE OF JADE • BLACK POWDER WAR • EMPIRE OF IVORY • VICTORY OF EAGLES • TONGUES OF SERPENTS • CRUCIBLE OF GOLD • BLOOD OF TYRANTS • LEAGUE OF DRAGONS NFPA 20 Standard for the Installation of Stationary Pumps for Fire Protection Open Road Media NATIONAL BESTSELLER • The astonishing and hugely entertaining story that completely changed the way we run. An epic adventure that

began with one simple question: Why does my foot hurt? "Equal parts quest, physiology treatise, and running history.... The climactic race reads like a sprint.... It simply makes you want to run." —Outside Magazine Isolated by Mexico's deadly Copper Canyons, the blissful Tarahumara Indians have honed the ability to run hundreds of miles without rest or injury. In a riveting narrative, award-winning journalist and often-injured runner Christopher McDougall sets out to discover their secrets. In the process, he takes his readers from science labs at Harvard to the sun-baked valleys and freezing peaks across North America, where ever-growing numbers of ultra-runners are pushing their bodies to the limit, and, finally, to a climactic race in the Copper Canyons that pits America's best ultra-runners against the tribe. McDougall's incredible story will not only engage your mind but inspire your body when you realize that you,

indeed all of us, were born to run. effect of making Middle-earth seem plodding and flat.” —The New York Times The metropolis of New Crobuzon sprawls at the center of the world. Humans and mutants and arcane races brood in the gloom beneath its chimneys, where the river is sluggish with unnatural effluent and foundries pound into the night. For a thousand years, the Parliament and its brutal militias have ruled over a vast economy of workers and artists, spies and soldiers, magicians, crooks, and junkies. Now a stranger has arrived, with a pocketful of gold and an impossible demand. And something unthinkable is released. The city is gripped by an alien terror. The fate of millions lies with a clutch of renegades. A reckoning is due at the city ’ s heart, in the vast edifice of brick and wood and steel under the vaults of Perdido Street Station. It is too late to escape.

An award-winning scientist offers his

unorthodox approach to childrearing: “ Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions ” (Amy Chua, author of Battle Hymn of the Tiger Mother). If you ’ re like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In Parentology, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley

encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.

Principles of Management is designed to meet the scope and sequence requirements of the introductory course on management. This is a traditional approach to management using the leading, planning, organizing, and controlling approach. Management is a broad business discipline, and the Principles of Management course covers many management areas such as human resource management and strategic management, as well as behavioral

areas such as motivation. No one individual can be an expert in all areas of management, so an additional benefit of this text is that specialists in a variety of areas have authored individual chapters.

Good Strategy/Bad Strategy clarifies the muddled thinking underlying too many strategies and provides a clear way to create and implement a powerful action-oriented strategy for the real world. Developing and implementing a strategy is the central task of a leader. A good strategy is a specific and coherent response to—and approach for—overcoming the obstacles to progress. A good strategy works by harnessing and applying power where it will have the greatest effect. Yet, Rumelt shows that there has been a growing and unfortunate tendency to equate Mom-and-apple-pie values, fluffy packages of buzzwords, motivational slogans, and financial goals with “strategy.” In Good Strategy/Bad Strategy, he debunks these elements of “bad strategy” and awakens an understanding of the power of a “good strategy.” He introduces nine sources of power—ranging from using leverage to effectively

focusing on growth—that are eye-opening yet pragmatic tools that can easily be put to work on Monday morning, and uses fascinating examples from business, nonprofit, and military affairs to bring its original and pragmatic ideas to life. The detailed examples range from Apple to General Motors, from the two Iraq wars to Afghanistan, from a small local market to Wal-Mart, from Nvidia to Silicon Graphics, from the Getty Trust to the Los Angeles Unified School District, from Cisco Systems to Paccar, and from Global Crossing to the 2007–08 financial crisis. Reflecting an astonishing grasp and integration of economics, finance, technology, history, and the brilliance and foibles of the human character, Good Strategy/Bad Strategy stems from Rumelt’s decades of digging beyond the superficial to address hard questions with honesty and integrity.

Principles of Management Grand Central Publishing

Should we pay children to read books or to get good grades? Should we allow corporations to pay for the right to pollute the atmosphere? Is it ethical to pay people to test risky new drugs or to donate their organs? What about hiring mercenaries to fight our wars? Auctioning admission to elite universities? Selling citizenship to immigrants willing to pay? In What Money Can't Buy, Michael J. Sandel takes on one of the biggest ethical questions of our time: Is there something wrong with a world in which everything is for sale? If so, how can we prevent market values from reaching into spheres of life where they don't belong? What are the moral limits of markets? In recent decades, market values have crowded out nonmarket norms in almost every aspect of life—medicine, education, government, law, art, sports, even family life and personal relations. Without quite realizing it, Sandel argues, we have drifted from having a market economy to being a market society. Is this where we want to be? In his New York Times bestseller Justice, Sandel showed himself to be a

---

master at illuminating, with clarity and verve, the hard moral questions we confront in our everyday lives. Now, in *What Money Can't Buy*, he provokes an essential discussion that we, in our market-driven age, need to have: What is the proper role of markets in a democratic society—and how can we protect the moral and civic goods that markets don't honor and that money can't buy?

Guy Kawasaki's phenomenal success at Apple Computer and as a start-up entrepreneur was the result of an innovative approach to sales, marketing, and management called evangelism. Evangelism means convincing people to believe in your product or ideas as much as you do, by using fervor, zeal, guts, and cunning to mobilize your customers and staff into becoming as passionate about a cause as you are. *Selling the Dream* is a handbook and workbook for putting evangelism into action. Kawasaki charts a complete blueprint for the beginning evangelist that covers such topics as how to define a cause (whether it is a business, like Windham Hill Records or the Body Shop, or a public interest concern, like the National Audubon Society or Mothers Against Drunk

Driving), how to identify good and bad enemies, how to deliver an effective presentation, and how to find, train, and recruit new evangelists. One of the highlights of the book is a short course in developing an evangelistic business plan, illustrated by the complete, original Macintosh Product Introduction Plan. *Selling the Dream* will teach you how to become a raging, inexorable thunder lizard of an evangelist -- a leader whose words will never fall on deaf ears again.

From the acclaimed author of *Shackling Water* comes the first great race novel of the twenty-first century, an incendiary and ruthlessly funny satire about violence, pop culture, and American identity. Macon Detornay is a suburban white boy possessed and politicized by black culture, and filled with rage toward white America. After moving to New York City for college, Macon begins robbing white passengers in his taxicab, setting off a manhunt for the black man presumed to be committing the crimes. When his

true identity is revealed, Macon finds himself to be a celebrity and makes use of the spotlight to hold forth on the evils and invisibility of whiteness. Soon he launches the Race Traitor Project, a stress-addled collective that attracts guilty liberals, wannabe gangstas, and bandwagon riders from all over the country to participate in a Day of Apology—a day set aside for white people to make amends for four hundred years of oppression. The Day of Apology pushes New York City over the edge into an epic riot, forcing Macon to confront the depth of his own commitment to the struggle. Peopled with all manner of race pimps and players, *Angry Black White Boy* is a stunning breakout book from a critically acclaimed young writer and should be required reading for anyone who wants to get under the skin of the complexities of identity in America.
