This book
encompasses a wide
range of mathematical
concepts relating to
regularly repeating
surface decoration
from basic principles
of symmetry to more

complex issues of graph
theory, group theory
and topology. It
presents a
comprehensive means
of classifying and
constructing patterns
and tilings. The
classification of designs
is investigated and
discussed forming a
broad basis upon
which designers may

build their own ideas. A construction of discrete wide range of original patterns and isohedral illustrative material is tilings. Designed to included. In a complex broaden the scope of area previously best surface-pattern designers by increasing understood by their knowledge in mathematicians and otherwise impenetrable crystallographers, the theory of geometry this author develops and 'designer friendly' applies mathematical book serves as a thinking to the context manual for all types of of regularly repeating surface design surface-pattern design including textiles, in a manner accessible wallpapers and to artists and designers. wrapping paper. It is Design construction is also of value to covered from first crystallographers, principles through to mathematicians and methods appropriate architects. for adaptation to large-scale screen-printing production. The book extends mathematical thinking beyond symmetry group classification. New ideas are developed involving motif orientation and positioning, including reference to a crystal structure, leading on to the classification and

1700–1950. Commissioned photographs show real homes, inspired by the past but livable. Historical and interpretive rooms are included; new construction, additions, and new kitchens and baths take their place along with restoration work. A feature on furniture appears in every issue. Product coverage is extensive. Experts offer advice for homeowners and designers on finishing, decorating, and furnishing period homes of every era.
