There Once Was a Show from

Nantucket (hardback) Chris Mason Television corrupts our children, induces us to spend needlessly, and stimulates hostility and violence. Or does it? Jib Fowles sees television as a "grandly therapeutic force," that television is indeed good for you. He examines why nearly every American regularly watches television and why viewing is beneficial. Updated and jargon-free, Why Viewers Watch describes the overall effect of programming on the population. What do viewers get from television? What does it do for them? Why do academics negatively judge television? Using recent research reports, overlooked past studies, and fresh

---

survey data to substantiate this positive role, Fowles first reviews the history of television and programming. After discussing what people expect from television, he explores how different types of programs satisfy different needs. Fowles also debunks many of the myths propagated by media scholars and "television prigs." With an easy-to-read style that is both entertaining and informative, *Why Viewers Watch* suits both the scholar and the student, the specialist and nonspecialist alike. As such, it is the perfect companion volume for courses in communication, journalism, sociology, and psychology. "The author does present another side to the

complex effects debate--a side of which we should all be aware." --Et cetera from the First Edition: "An interesting--and challenging--book about television. So good it is surprising it has not received more attention. . . . There aren't many really good books about television, and [this] is one of the best." --Peter Farrell, *The Sunday Oregonian* "I would recommend this book to interested television viewers, media scholars, and professionals. Fowles' arguments are thought-provoking and sometimes compelling. The book is very readable and easily accessible to lower-division students. For those of us who spent our childhoods glued to the screen and believe we

still turned out all right, this book will help alleviate our nagging guilt when we watch television. The book should help scholars reexamine our views on the impact of television's content and our suggested changes. Media professionals should find the book a testament to the positive aspects of their medium." --*The Southern Speech Communication Journal*

This book won the Ohio Professional Writer's, Inc. 2014 Communication Competition Award Now in its second edition, *The Televiewing Audience* is a user's guide for the only household appliance that

doesn't come with one. Watching television seems relatively effortless - it is, after all, a major form of entertainment in the U.S. and overseas - yet this book argues that there is nothing simple about watching television; it is a learned activity which is in a constant state of revision and upgrading. Now more than ever, televiewing requires the generation and application of critical thinking to guide program selection, inform appreciation, generate

---

greater pleasure, and inspire dialogue after consumption. This book is about becoming a more thoughtful and informed consumer, designed to shatter the anonymity of the viewer, and to create a sense of community, for we rarely think of ourselves as instrumental in the viewing experience or think of the experience as a shared event. Designed for courses related to broadcasting, media effects, media literacy, and

audience studies, this book provides a comprehensive overview of the ways in which television influences the way we think about ourselves and our culture. It places us center-stage in the extremely complicated, competitive, creative, and costly endeavor that is television. **The TV Guide Book of Lists** Routledge
