Freelander 2 - 6 Speed Manual Gearbox & Differential - £ ...

The replacement gearbox sounds like it is from a later Freelander. The later Jatco doesn't have as many speed sensors as the early box. This is

why I think it's flagging a speed sensor fault. This is nothing to do with wheel sensors.

Land Rover Freelander 2 Gearbox is Multi-functional

I had a Freelander 2 internal gearbox failure at 55k. Car bought from main dealer as pre-owned vehicle and serviced at main dealer according to service interval.

I was informed that I do not meet their criteria for help with costs for repair (£ 3700) even though I

have bought two commercial Land Rovers. What are my rights or best advice to get costs met by main company?

Freelander 2 – Steering Faults. If you can hear a whine when you are steering then there are three common causes, the first to check is the reservoir, there is a gauze at the bottom which can get blocked and cause a lack of oil to the pump. Secondly if as well as the whine (which is worse on full lock) the steering is starting to feel heavier especially at low speed or when parking that can be a sign that the steering

pump is on its way out.

In Freelander 2, there is a 2.2-Litre

diesel, which is pretty reasonable with a claimed average of about 37.7mpg and there is also a petrol engine in the form of a 3.2-Litre straight-six along with 233bhp, but predictably it's a rare site, possibly something to do with its awful 25.2mpg fuel economy figure. In the start of 2009, a new stop/start version of the 2.2 diesel was revealed
