Exploring an overlooked era of Italian history roiled by domestic terrorism, political assassination, and student protests, this book shines a new light on what was a dark decade, but an unexpectedly prolific and innovative period among artists of comics intended for adults. Blurring the lines between high art and popular consumption, artists of the Italian comics scene went beyond passively documenting history and began actively shaping it through the creation of fictional worlds where history, cultural data, and pop-realism interacted freely.

Lessons in Electric Circuits: An Encyclopedic Text & Reference Guide (6 Volumes Set) University of Pennsylvania Press

When they did need to find us, our meeting place outside the school building was 'the Big Tree.' 'Wait at the Big Tree,' they told us. It's where they dropped us off and picked us up. After all these years that tree still stands at the corner of Crescent Street and Newtown Avenue in Astoria Queens. The school is gone, the nuns are gone, our parents and most of the family are now gone. There are no sounds of bells ringing, no kids lining up on the block, but that tree is still there. The only remaining vestige of my school days. It's funny and maybe a bit symbolic given the sanctity of this particular ground; that in a city a tree would out last a building and our very way of life. In the sometimes funny, sometimes heartbreaking saga of the Sirianni family of New York City, author Fran Sirianni captures the zeitgeist of a generation that was born in the 1950s, questioned things in the 1960s, and came of age in the 1970s. Fran's first person narrative tells the story of her family's arrival in the United States and how they embraced the opportunity of the America Dream to build a life of prosperity. When tragedy strikes, the family comes together to carry on, despite the uncertainty of the times in which they live. Wait at the Big Tree is a story of family, of loss, and of the inevitable change that occurs as we all come into our own.

Case Studies in Project, Program, and Organizational Project Management Faber & Faber

This is the first monograph to consider the significance of madness and irrationality in both Spanish and Spanish American literature. It considers various definitions of 'madness' and explores the often contrasting responses, both positive (figural madness as stimulus for literary creativity) and negative

(clinical madness representing spiritual confinement and sterility). The concept of national madness is explored with particular reference to Argentina: while, on the one hand, the country's vast expanses have been seen as conducive to madness, the urban population of Buenos Aires, on the other, appears to be especially dependent on psychoanalytic therapy. The book considers both the work of lesser-known writers such as Nuria Amat, whose personal life is inflected by a form of literary madness, and that of larger literary figures such as José Lezama Lima, whose poetic concepts are suffused with the irrational. The conclusion draws attention to the 'other side' of reason as a source of possible originality in a world dominated by the tenets of logic and conventionalised thinking.

Credit and debt appear to be natural, permanent facets of Americans' lives, but a debt-based economy and debt-financed lifestyles are actually recent inventions. In 1951 Diners Club issued a plastic card that enabled patrons to pay for their meals at select New York City restaurants at the end of each month. Soon other "charge cards" (as they were then known) offered the convenience for travelers throughout the United States to pay for hotels, food, and entertainment on credit. In the 1970s the advent of computers and the deregulation of banking created an explosion in credit card use—and consumer debt. With gigantic national banks and computer systems that allowed variable interest rates, consumer screening, mass mailings, and methods to discipline slow payers with penalties and fees, middle-class Americans experienced a sea change in their lives. Given the enormous profits from issuing credit, banks and chain stores used aggressive marketing to reach Americans experiencing such crises as divorce or unemployment, to help them make ends meet or to persuade them that they could live beyond their means. After banks exhausted the profits from this group of people, they moved into the market for college credit cards and student loans and then into predatory lending (through check-cashing stores and pawnshops) to the poor. In 2003, Americans owed nearly \$8 trillion in consumer debt, amounting to 130 percent of their average disposable income. The role of credit and debt in people's lives is one of the most important social and economic issues of our age. Brett Williams provides a sobering and frank investigation of the credit industry and how it came to dominate the lives of most Americans by propelling the social changes that are enacted when an economy is based on debt. Williams argues that credit and debt act to obscure, reproduce, and exacerbate other inequalities. It is in the best interest of the banks, corporations, and their shareholders to keep consumer debt at high levels. By targeting low-income and young people who would not be eligible for credit in other businesses, these companies are able quickly to gain a stranglehold on the finances of millions. Throughout, Williams provides firsthand accounts of how Americans from all socioeconomic levels use credit. These vignettes complement the history and technical issues of the credit industry, including strategies people use to manage

debt, how credit functions in their lives, how they understand their own indebtedness, and the sometimes tragic impact of massive debt on people's lives.

In the late 1950s, like tens of thousands of young men of his generation, Pierre Bourdieu, having recently passed the agrégation in philosophy, found himself immersed in the Algerian war. Motivated by an impulse that, as he himself says, ‘ was civic rather than political ’, nothing seemed more important to him than to understand the Algerian situation and provide the elements that would enable others to come to an informed judgement about it. In extremely tough conditions and along with a small group of students, Bourdieu undertook a series of studies across an Algeria that was tightly patrolled by the army, leading him to discover the shocking reality of the resettlement camps and to analyse the mechanisms of destruction of Algerian society of which they were emblematic. To achieve the objectives he had set himself, Bourdieu had to carry out a genuine intellectual conversion, acquiring an ethnographic understanding of Algerian society, learning sociological analysis at a breakneck pace and inventing new instruments - both theoretical and empirical - that would enable him to understand the relations of domination specific to colonialism. These new tools also enabled him to analyse the nature of the crisis that the war had both produced and manifested. This unique volume brings together the first texts written by Bourdieu in the midst of the Algerian conflict, as well as later writings and interviews in which he returns to the topic of Algeria and the decisive role it played in the development of his work.

This text is suitable for all introductory or general policing courses (both undergraduate and graduate levels) or as a supplemental text for community policing or police administration courses. A practical, applied approach to “ what works ” in policing Based on the author ’ s thirty-plus years of policing and academic experience, Policing America: Challenges and Best Practices, Ninth Edition, offers a problem-solving approach that emphasizes what is actually working in

the field. Throughout the book, dozens of current exhibits, additional cases studies, Career Profiles, and real-world problem-solving examples bring the “ what works ” theme alive for the reader. Each chapter encourages readers to think critically with Learn by Doing sections. Organized to flow smoothly for the instructor and student, this edition continues to provide a penetrating view of one of the most difficult and demanding occupations in America: policing! The Ninth Edition addresses head-on the most challenging aspects of policing in our age. New emphases include methods of policing a diverse society—particularly disenfranchised minorities in the “ post-Ferguson ” era and a call for re-examination of police methods—as well as the fight against terrorism and applications of new information technologies. In addition, chapters examine major issues and formidable crime problems, crime prevention, changing agency culture, evaluating problem-solving initiatives, cyberbullying and cybercrime, special populations, and the future of policing. Policing America: Challenges and Best Practices, Ninth Edition is also available via Revel™, an interactive learning environment that enables students to read, practice, and study in one continuous experience.

The System of Objects is a tour de force—a theoretical letter-in-a-bottle tossed into the ocean in 1968, which brilliantly communicates to us all the live ideas of the day. Pressing Freudian and Saussurean categories into the service of a basically Marxist perspective, The System of Objects offers a cultural critique of the commodity in consumer society. Baudrillard classifies the everyday objects of the “ new technical order ” as functional, nonfunctional and metafunctional. He contrasts “ modern ” and “ traditional ” functional objects, subjecting home furnishing and interior design to a celebrated semiological analysis. His treatment of nonfunctional or “ marginal ” objects focuses on antiques and the psychology of collecting, while the metafunctional category extends to the useless, the aberrant and even the “ schizofunctional. ” Finally, Baudrillard deals at length with the implications of credit and advertising for the commodification of everyday life. The System of Objects is a tour de force of the materialist semiotics of the early Baudrillard, who emerges in retrospect as something of a lightning rod for all the live ideas of the day: Bataille ’ s political economy of “ expenditure ” and Mauss ’ s theory of the gift; Reisman ’ s lonely crowd and the “ technological society ” of Jacques Ellul; the structuralism of Roland Barthes in The System of Fashion; Henri Lefebvre ’ s work on the social construction of space; and last, but not least, Guy Debord ’ s situationist critique of the spectacle.

The author ’ s tribute to the 18th-century New England farmhouse she called home: “ [A] tender and often poignant book by a woman of many insights ” (The New York Times Book Review). In Plant Dreaming Deep, Sarton shares an intensely personal account of transforming a house into a home. She begins with an introduction to the enchanting village of Nelson, where she first meets her house. Sarton finds she must “ dream the house alive ” inside herself before taking the major step of signing the deed. She paints the walls white in order to catch the light and searches for the precise shade of yellow for the kitchen floor. She discovers peace and beauty in solitude, whether she is toiling in the garden or writing at her desk. This is a loving, beautifully crafted memoir illuminated by themes of friendship, love, nature, and the struggles of the creative life. This ebook features an extended biography of May Sarton.

The ever expanding market need for information on how to apply project management principles and the PMBOK® contents to day-to-day business situations has been met by our case studies book by Harold Kerzner. That book was a spin-off from and ancillary to his best selling text but has gained a life of its own beyond adopters of that textbook. All indications are that the market is hungry for more cases while our own need to expand the content we control, both in-print and online would benefit from such an expansion of project management "case content". The authors propose to produce a book of cases that compliment Kerzner's book. A book that offers cases beyond the general project management areas and into PMI®'s growth areas of program management and organizational project management. The book will be structured to follow the PMBOK in coverage so that it can not only be used to supplement project management courses, but also for self study and training courses for the PMP® Exam. Now in one volume: Three exquisite meditations on nature, healing, and the pleasures of the solitary life from a New York Times – bestselling author. In a long life spent recording her personal observations, poet, novelist, and memoirist May Sarton redefined the journal as a literary form. This extraordinary volume collects three of her most beloved works. *Journal of a Solitude*: Sarton's bestselling memoir chronicles a solitary year spent at the house she bought and renovated in the quiet village of Nelson, New Hampshire. Her revealing insights are a moving and profound reflection on creativity, oneness with nature, and the courage it takes to be alone. *Plant Dreaming Deep*: Sarton's intensely personal account of how she transformed a dilapidated eighteenth-century farmhouse into a home is a loving, beautifully crafted memoir illuminated by themes of friendship, love, nature, and the struggles of the creative life. *Recovering*: In this affecting diary of one year's hardships and healing, Sarton focuses on her sixty-sixth year, which was marked by the turmoil of a mastectomy, the end of a treasured relationship, and the loneliness that visits a life of chosen solitude. By turns uplifting, cathartic, and revelatory, Sarton's journals still strike a chord in the hearts of contemporary readers. Through them, in the words of the Los Angeles Times, "we are able to see our own experiences reflected in hers and we are enriched."
