University of Chicago Press Step back in time with this memoir as a Rhode Island woman chronicles her childhood spent on a small island in Narragansett Bay in the 1950s. A memoir of reconnecting to long-forgotten childhood bonds and memories, Debbie Kaiman Tillinghast's *The Ferry Home* embraces joyful moments with humor and more troubling emotions with compassion. If you have ever faced emotional challenges within your family

or had a sibling relationship with both squabbles and shared mischief, if you have found peace in one memorable place, or if you have ever longed for any of these, then this book is for you.

Experience the rhythm of life on Prudence Island, the ebb and flow of changing tides and seasons, and the patterns and relationships that emerge. It is a place where independence is fostered, but friends are always there when needed. As Debbie's vivid accounts unfold, you will feel like you too have just stepped off the ferry and been embraced by the tiny Prudence Island community. *The Herman Miller Collection* HVAC Training 101 is a site visited by over 100,000 enthusiasts monthly, who are interested in becoming HVAC technicians. The site initially began as the passion project of

a retired HVAC technician. The site quickly gained popularity, building a strong community of aspiring HVAC technicians. Currently, it is managed by a team of ex-HVAC technicians with decades of experience in the industry. Head over to HVACTraining101.Com to learn more. We began by writing about how to become certified as an HVAC technician. With rules and certifications varying for each state, it was a challenging task. We had a few friends in other states help us out, but for some states, we had to dig really deep to find the information needed. Our audience at the time was very happy with the information we provided. At this point, we started getting many questions about EPA 608 certification. Once you get the education and experience needed to become a technician, prospective employers will ask for certification to handle refrigerants. When we started

writing about how to become certified, viewers again requested we write a study guide to help them prepare for the 608 exams. The study guides out there were dense and had much more information than was needed to pass the test. This inspired us to embark on a journey to write the simplest study guide for the EPA 608 exam, which would still cover all the necessary information. We hope we have achieved our intended objective. The journey to becoming an HVAC technician can be long and arduous. We congratulate you on taking this path and wish you the best in cracking the EPA 608 exam. *Practical Guide to Digital Manufacturing* "A textbook with design data based on the 2013 ASHRAE handbook of fundamentals"-- [The Ferry Home](#) This book covers the subject of digital manufacturing. Frigidaire Installation and Service Manual ...

American spirituality—with its focus on individual meaning, experience, and exploration—is usually thought to be a product of the postmodern era. But, as *The New Metaphysicals* makes clear, contemporary American spirituality has historic roots in the nineteenth century and a great deal in common with traditional religious movements. To explore this world, Courtney Bender combines research into the history of the movement with fieldwork in Cambridge, Massachusetts—a key site of alternative religious inquiry from Emerson and William James to today. Through her ethnographic analysis, Bender discovers that a focus on the new, on progress, and on the way spiritual beliefs

intersect with science obscures the historical roots of spirituality from its practitioners and those who study it alike—and shape an enduring set of modern religious possibilities in the process.
