An award-winning
scientist offers his
unorthodox approach to

childrearing: “ Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions ” (Amy Chua, author of Battle Hymn of the Tiger Mother). If you ’ re like many parents, you might ask family and friends for advice when faced with important choices about

how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley’s sassy kids show him the limits of his profession. *Parentology* teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You’ll be laughing and learning at the same time.

JHU Press

Interest in sustainable, green building practices is greater than ever. Whether concerned about allergies, energy costs,

old-growth forests, or durability and long-term value, homeowners and builders are looking for ways to ensure that their homes are healthy, safe, beautiful and efficient. In these pages are descriptions and manufacturer contact information for more than 1,400 environmentally preferable products and materials. All phases of residential construction, from sitework to flooring to renewable energy, are covered. Products are grouped by function, and each chapter begins with a discussion of key environmental considerations, and what to look for in a green product. Over 40% revised, this updated edition includes over 120 new products. Categories

of products include:

- Sitework and landscaping
- Outdoor structures
- Decking Foundations, footers and slabs

A one-of-a-kind guide to
organizing your
fridge--including practical tips
for meal prep and storage, plus
more than 100 recipes--that
makes it easier to eat better,
save money, and get the most
out of your food Practicing
"fridge love" is a roadmap to
eating healthier, saving

money, and reducing food
waste while enjoying a
beautiful and harder-working
fridge. This book--part
organizational guide and part
food-prep handbook--is your
guide. Author Kristen Hong
adopted a nutrient-dense, plant-
based diet in an effort to lose
weight and improve her health.
But amidst the demands of day-
to-day life and a busy family,
she found it impossible to stick
to. The solution? A smarter,
better-organized fridge that
served her real-life needs. In
this invaluable resource, you
will discover how a beautifully
organized fridge can make
your life--including healthy
eating for the whole
family--easier. It covers
general fridge organization (for
all models and configurations)
as well as shopping tips,
storage guidelines, the best
meal-prep containers, and
more than 100 easy plant-
based recipes made for meal
prepping.
