I talked my sister into letting me help her write this book because I knew it would take a lot of work to get it the way she wanted it. There are quotes here from people whose dogs were acting out and driving them loony. These desperate owners called Eileen because she is well known in these parts or because their veterinarian or a friend recommended her. She jumps in her blue jeep and drives to their house. She evaluates the dog and the owner. It's usually the owner's fault I've discovered. She tells them, "This is a very cool dog. He's awesome. We can get him straightened around in no time." The relief they feel is huge. I've seen Eileen turn out of control dogs into angels in seconds. After some basic obedience training the dogs and the owners often attend an "agility" or "therapy dog" class taught by Eileen. The dogs are excited and happy to be there with the other dogs. It's like camp or a festival. The owners fall in love with their dogs again. The dogs, of course, always love their owners, no matter what. Amazing creatures. Everyone should read this book. You should especially read it before you get a dog so you know exactly what's involved. I'm not only talking to the adults I'm talking to the kids too. Mickey McGovern has worked in the Hollywood film industry for fifteen years as a writer and a visual effects producer. But more importantly she's Eileen Tonick's sister.

In the increasingly multi-racial and multi-ethnic American landscape of the present, understanding and bridging dynamic cross-cultural conversations about social and political concerns becomes a complicated humanistic project. How do everyday embodied experiences transform from being anecdotal to having social and political significance? What can the experience of corporeality offer social and political discourse? And, how does that discourse change when those bodies belong to Arab Americans and African Americans? Ther í A. Pickens discusses a range of literary, cultural, and archival material where narratives emphasize embodied experience to examine how these experiences constitute Arab Americans and African Americans as social and political subjects. Pickens argues that Arab American and African American narratives rely on the body's fragility, rather than its exceptional strength or emotion, to create urgent social and political critiques. The creators of these narratives find potential in mundane experiences such as breathing, touch, illness, pain, and death. Each chapter in this book focuses on one of these everyday embodied experiences and examines how authors mobilize that fragility to create social and political commentary. Pickens discusses how the authors' focus on quotidian experiences complicates their critiques of the nation state, domestic and international politics, exile, cultural mores, and the medical establishment. *New Body Politics* participates in a vibrant interdisciplinary conversation about cross-ethnic studies, American literature, and Arab American literature. Using intercultural analysis, Pickens explores issues of the body and representation that will be relevant to fields as varied as Political Science, African American Studies, Arab American Studies, and Disability Studies.

"The Seven Laws of Love is insightful, compelling, inspiring, grounded, and immeasurably practical. We love this book! Everyone needs to read it. Don't miss out on its powerful message." —Drs. Les & Leslie Parrott, authors of *Saving Your Marriage Before It Starts* In our fast-paced, success-obsessed culture, we're constantly tempted to chase after things that don't matter. We've been conditioned to value possessions over people, status over relationships, and ourselves over God. But the reality is this: God created love to be the centerpiece of our lives. In *The Seven Laws of Love*, Dave Willis makes the case for a love revival and proves that in returning to a life of love we have no greater model than the one who is love himself. In Dave's humorous, touching, down-to-earth style, *The Seven Laws of Love* takes you on a journey through the ins and outs of everyday relationships—with your spouse, your children, your friends, and your coworkers—using practical, applicable examples and guiding principles that demonstrate what a life of love actually looks like. There is no higher calling on earth than to love and be loved. It's time to learn *The Seven Laws of Love*, and to make loving a priority over all other pursuits. Anything else isn't really living.

Traditionally, medicine has involved therapies chosen according to clinical guidelines, often arrived at through clinical trials which categorized patients into patient groups. Such clinical guidelines would dictate that all patients within a specific group should be treated in exactly the same way. More recently, the paradigm has shifted towards personalized medicine, and in future, individual treatment plans will depend more on the specific characteristics of individual patients, including genomic data. This book presents the proceedings of the 9th scientific eHealth conference, the eHealth Summit Austria, held in Vienna, Austria, in June 2015. Among the main topics addressed at the conference were: active and ambient assisted living (AAL); eHealth education; electronic patient and health records; ethical legal and economic aspects of eHealth; ICT for integrated treatment, research and personalized medicine; patient portals and personal health records; semantic interoperability of information systems; and visualization of clinical or epidemiological data. One of the first fields of application for personalized medicine has been oncology, with current diagnostic tools including molecular risk factors, biomarkers and individual genomes. The next step in personalized medicine will be to extend these to a more general, personalized health approach. Such individual risk assessment and preventive strategies promise to have a huge impact on our healthcare systems, and this book will be of interest to all those involved in healthcare research, provision and practice.

Mark: A Theological Commentary for Preachers engages hermeneutics for preaching, employing theological exegesis that enables the preacher to utilize all the narrative units of Mark to craft effective sermons. This commentary unpacks the crucial link between Scripture and application: the theology of each preaching text. The Gospel of Mark is therefore divided into twenty-five narrative units, with the theological focus of each clearly delineated. The specificity of these theological ideas for their respective texts makes possible a sequential homiletical movement through each pericope of the book, progressively developing the theological trajectory of Mark’s theme of discipleship, and enabling the expositor to discover valid application for sermons. While the primary goal of the commentary is to take the preacher from text to theology, it also aids in the advance from theology to sermon by providing tips for preaching and two possible sermon outlines for each of the twenty-five units of the Gospel. The unique approach of this work results in a theology-for-preaching commentary that promises to be useful for anyone teaching through Mark’s Gospel with an emphasis on application.
