*The Boy Who Grew Dragons* Open Book Publishers

Written specifically with assembly themes in mind. Lively, relevant and great fun to sing. Opportunities are provided for part-singing, rounds and actions, etc., with anything from ballads to dance tracks. *Into the Unknown (from Frozen 2) - Piano/Vocal/Guitar Sheet Music* Knopf Books for Young Readers "Raphael makes the most of the academic setting of his immensely enjoyable....Raphael's witty prose enhances a crafty plot." Publishers Weekly starred review Years ago Nick Hoffman was given a position in the English Department at the State University of Michigan because SUM wanted to hire his partner as writer-in-residence, but now he's been unexpectedly installed by his dean as chairman of that department. It's a wildly unpopular choice, and he's suddenly the focus of more animosity from his colleagues than he's ever dealt with before. He can't seem to make anyone happy and can't get a handle on his myriad new responsibilities as an administrator, a position he never wanted. Then tragedy strikes again way too close to home: Someone seeking his help is murdered, and under the shadow of another recent murder, Nick is a prime suspect. Hounded by campus police, the local press, and social media, Nick wonders if this could finally be the end of his career—that is, if he manages to stay out of prison. In the spirit of David Lodge, Francine Prose, Richard Russo and Jane Smiley, *Department of Death*

is Lev Raphael's most blistering satire yet of the current perversity of academic life.

*The Wonky Donkey* Concord Theatricals Written for students training for careers in the helping professions, this Fourth Edition covers all the essential topics central to understanding people whether they are clients, service users, patients or pupils. Following the shape of a human life, beginning with birth and ending with death, it combines theoretical concepts and reflective learning to help your students develop an understanding of what makes us grow and change over our lives. The NEW Online Case Study Resource - *Tangled Webs* Now you and your students can explore key issues and themes raised in the book and develop the skill of linking theory to practice with free access to a new online case study resource. By following the lives of people living in the fictional London Borough of Bexford, this series of interlinked and extended case studies will allow your students to explore complex situations, much as they might do as practitioners in their working lives, and consider what ideas about Human Growth and Development might inform their thinking and practice.

*Body Language Reading Future Horizons* Simplified Signs presents a system of manual sign communication intended for special populations who have had limited success mastering spoken or full sign languages. It is the culmination of over twenty years of research and development by the authors. The Simplified Sign System has been developed and tested for ease of sign comprehension, memorization, and formation by limiting the complexity of the motor skills required to form each sign, and by ensuring that each sign visually resembles the meaning it conveys. Volume 1 outlines the research underpinning and informing the project, and places the Simplified Sign System in a wider context of sign usage, historically and by different populations. Volume 2 presents the lexicon of signs, totalling

approximately 1000 signs, each with a clear illustration and a written description of how the sign is formed, as well as a memory aid that connects the sign visually to the meaning that it conveys. While the Simplified Sign System originally was developed to meet the needs of persons with intellectual disabilities, cerebral palsy, autism, or aphasia, it may also assist the communication needs of a wider audience – such as healthcare professionals, aid workers, military personnel, travellers or parents, and children who have not yet mastered spoken language. The system also has been shown to enhance learning for individuals studying a foreign language. Lucid and comprehensive, this work constitutes a valuable resource that will enhance the communicative interactions of many different people, and will be of great interest to researchers and educators alike.

Songs for Every Occasion Cambridge University Press

"The editors have brought together a range of eminent contributors who present a range of issues throughout the life cycle. The book asserts that it hopes to 'assist readers to anticipate change and discontinuity in people's lives and think about strategies to support them' through the many challenges that they may face in their lives. In my view this book certainly does that and the editors and contributors are to be congratulated on the production of a relevant and contemporary text that I have no hesitation in both endorsing and recommending to all involved in supporting and or caring for people with learning disabilities." Professor Bob Gates, Project Leader - Learning Disabilities Workforce Development, NHS Education South Central, UK "The editors have gathered an authoritative faculty to present and discuss a range of contemporary issues; both practical and ethical. The text is well grounded in the lived experience of people with disability and draws on the evidence-base of contemporary science. Each chapter includes thought provoking exercises. This is a seminal text for students and practitioners, researchers and policy makers." Associate Professor Keith R. McVilly, Deakin University, Australia "I currently own a copy of the first edition and it has proved an invaluable resource time and time again. There is not an essay I complete that does not make reference to the book and I can consistently use it to reflect back on my practice as a student nurse and social worker. Having read several extracts from the new edition it does appear to include very high quality content covering learning disabilities over the lifespan ... if I were to personally recommend any book for budding or current learning disability professionals then this would be it." James Grainger, Student Nurse/Social

Worker, Sheffield Hallam University, UK "I like the way it has primary and secondary information from a range of sources. The exercises in the book also get you to think about the situation in question which helps us think about our values and anti-oppressive practice ... This book really does start with the basics and having a learning disability from birth and the effects, to in depth knowledge and literature ... This book would be very helpful to me as it brings in literature policies and models from both a health and social side, which is important for my course and collaborative working." Laura Jean Lowe, Student Nurse, Sheffield Hallam University, UK "It is written with a clearly conveyed in-depth knowledge and in a way that has professional lived experience within the context of the work. The authors have taken into account the emotional, client-centred approach to the modern practitioner's practice ... The book gives a true wealth of good practice scenarios that can only help practitioners be good at what they do and aspire to be." Lee Marshall, Student Nurse, Sheffield Hallam University, UK With its spread of chapters covering key issues across the life cycle this text has established itself as the foundational primer for those studying the lived experiences of people with learning disabilities and their families, and outcomes achieved through services and support systems. Recognising learning disability as a lifelong disability, this accessible book is structured around the life cycle. The second edition is refreshed and expanded to include seven new chapters, covering: Aetiology Breaking news (about disability) and early intervention Transition to adulthood The sexual lives of women Employment Personalisation People with hidden identities With contributions from respected figures from a range of disciplines, the book draws heavily upon multidisciplinary perspectives and is based on the latest research and evidence for practice. The text is informed by medical, social and legal models of learning disability, exploring how "learning disability" is produced, reproduced and understood.

Extensive use is made of real-life case studies, designed to bring theory, values, policy and practice to life. Narrative chapters describe, in the words of people with learning disabilities themselves, their lives and aspirations. They helpfully show readers the kinds of roles played by families, advocates and services in supporting people with learning disabilities. New exercises and questions have been added to encourage discussion and reflection on practice. Learning Disability is core reading for students entering health and social care professions to work with people with learning disabilities. It is a compelling reference text for practitioners as it squarely addresses the challenges facing people with learning disability, their loved ones and the people supporting them. Special Care in Dentistry E-Book Hodder Children's Books

Pie Corbett's ground-breaking Talk for Writing approach has been successfully used by thousands of schools to teach writing creatively in an engaging way that motivates children. Now Pie and Julia take this multi-sensory approach to Early Years settings introducing a simple way to inspire young children's language development through storytelling. Children learn language through memorable, meaningful repetition. The Talk for Writing approach enables children to internalise the language of story so that they can imitate it, innovate on it and create their own effective stories independently. Talk for Writing in the Early Years will show you how to put rhyme and story at the heart of your work with children and parents so that young learners language development and creativity flourishes. This multimedia resource shows you how to:

- Select a story or rhyme the children will enjoy and tell it engagingly, encouraging the children to join in
- Use a story map so they can picture what happens
- Use actions to reinforce meaning and emphasise key language patterns
- Help children build a bank of tales, developing their linguistic repertoire

The 2 OLCs contain: 1 Footage of Pie Corbett conferences with EY teachers showing Talk for Writing in action 2 Clips of nursery children engaged in the Talk for Writing approach 3 Advice on how to use the OLC and handouts to train all staff in the approach 4 Interviews with parents and nursery school teachers on the impact of Talk for Writing 5 21 stories with story maps

**Simplified Signs: A Manual Sign-Communication System for Special Populations, Volume 1.** Cambridge University Press

This book is a comprehensive guide to pediatric dental fear/anxiety (DFA) and phobia that will provide practitioners with a full understanding of the etiology, prevalence, assessment, and management of these conditions. The coping styles of children when under stress are explored, with discussion of their relevance to the assessment visit and treatment allocation. Practical treatment techniques are comprehensively covered, from non-pharmacological behavioral strategies relevant for children with no or mild DFA to those approaches more appropriate for children with severe DFA/phobia. The importance of the use of language and communication skills to build rapport and allay anxiety is explored. Relaxation and hypnosis techniques are described, with guidance on how to introduce these to patients and their parents/carers. Techniques that help children cope when receiving injections are detailed, including systematic needle desensitization; these provide practitioners with options to help

resolve DFA and phobia regarding needles. Intravenous sedation, including the challenge of cannulation, is covered comprehensively. Furthermore, cognitive behavioral therapy is presented, with suggestion of practical self-help material when appropriate. The closing chapter looks to the future, discussing the barriers to and the changes required for the creation of more child-centered DFA services.

Praise for the First Edition: "All readers will be drawn to the style of the book as well as its content. The structure will make sure that it is not just a "one-off", being read as part of a course of study, but a book which is used frequently as a source of reference - Child Abuse Review  
The Second Edition of this best-selling textbook provides students and practitioners with a broad introduction to, and critical analysis of, the complex issues involved in child protection work. Beckett unpacks these complexities in a clear and engaging way, all the time encouraging reflection and debate through such features as case examples and interactive exercises. The book is fully comprehensive, considering key topics such as: the consequences for children of abuse and neglect; the reasons why some adults abuse and neglect children; the personal challenges involved in doing child protection work; and the organizational framework within which child protection work takes place. Other key features of this thoroughly revised Second Edition include: " Fully updated content: the book has been revised to incorporate new literature, research, legal and policy developments, including the recent Working Together guidelines " Two new chapters: these comprise a chapter on domestic violence in families, and a chapter on bringing about change " Interprofessional appeal: the author addresses all the professionals involved in child protection work, ensuring relevance across a range of disciplines and professions. The new edition of this highly successful textbook will be required reading for students studying social

work and allied subjects, and an essential resource for all professionals involved in child protection work. Chris Beckett is based at the Division of Social Work and Social Policy, Anglia Ruskin University. He is the author of three best-selling SAGE textbooks: *Human Growth and Development*; *Values and Ethics in Social Work* (with Andrew Maynard); *Essential Theory for Social Work Practice*.  
**Five Little Mermaids** Elsevier Health Sciences  
A very silly (not-too-scary) story about losing a beloved toy. That summer night, the toys were left outside. . . . For the very first time, the Wonderdoll, the helpful wind-up robot, the thoughtful green dinosaur, and the rest of their plucky gang lie in the grass, gazing up at the stars. But one star seems brighter than the rest. As it grows bigger and bigger, the toys realize it may not be a star at all! Soon they're venturing into the unknown, traveling by spaceship, where they meet a lonely alien in need of help, and some friends. From ever-inventive, award-winning author-illustrator Mini Grey comes a hilarious and heartfelt new adventure: a motley group of toys left outside in the garden become true friends and brave heroes--in space!
