Fruit Trees Planting And Care

General fruit tree planting guidelines are as follows: Plant where your fruit trees will receive at least six hours of sun a day during the growing season. Sun should not be blocked by buildings, fences or other obstacles. Plant at least three feet from sidewalks and driveways and six feet away from buildings, as roots will spread wider than the tree crown. Allow ten to fifteen feet of space between fruit trees.

Planting bare root fruit trees - Chris Bowers

Aside from full sun, proper soil drainage is the other essential condition for thriving fruit trees. The soil must not retain a lot of water, or it will cause the fruit trees' roots to rot in the ground. Check the soil drainage by digging a hole 1 foot (0.3 m) deep and filling it with water.

Plant a Bare-Root Fruit Tree - BBC Gardeners' World Magazine

Fruit trees. From apples and plums to figs and oranges, many trees produce delicious fruits in summer and autumn. Compact forms are usually available, making them suitable for even the smallest gardens. Many fruit trees also produce pretty blossom, and some offer colourful foliage in autumn too.

Fruit in containers / RHS Gardening

Planting fruit in containers. As far as the type of container, clay pots are heavy and stable; plastic is durable, light and easier to manage. For most fruit, choose pots 45-50cm (18-20in) in diameter. Fruit trees, vines and bushes can be planted in containers at any time of year.

How to plant apple trees and other fruit trees

Caring For Fruit Trees. After you have planted your tree it is important to keep it watered whenever the top two inches of the soil are dry. After the tree develops deeper root systems you won ’ t need to water as often. In order to produce an extra juicy crop, it ’ s necessary to provide a deep watering every so often.

Fruit Trees | Suttons

On the nursery we prefer to use a Loam based compost such as John Innes no 2 or a similar type, it's better than peat based compost for fruit trees in containers. Make sure you feed - and water - regularly and, with a little care your apples, pears, plums, gages, cherries, peaches - and nectarines - can stay in pots for years.

Fruit Trees Care and Planting Tips | CRJ Fruit Trees ...

A bare root fruit tree won ’ t need any watering after planting; the soil will already be moist enough at that time of year anyway. The only caution to sound is that if the first spring after planting is a dry one you might want to give your new tree [s] water as they will still be establishing.
