[The Fair Housing Act Design Manual: A Manual to Assist Designers](#)

and Builders in Meeting the Accessibility Requirements of The Fair

Housing Act provides clear and helpful guidance about ways to

design and construct housing which complies with the Fair Housing

Act. The manual provides direct information about the accessibility

requirements of the Act, which must be incorporated into the design,

and construction of multifamily housing covered by the Act. It

carries out two statutory responsibilities: (1) to provide clear

statement of HUD's interpretation of the accessibility requirements of

the Act so that readers may know what actions on their part will

provide them with a "safe harbor"; and (2) to provide guidance in the

form of recommendations which, although not binding meet the

Department's obligation to provide technical assistance on alternative

accessibility approaches which will comply with the Act, but may

exceed its minimal requirements. The latter information allows

housing providers to choose among alternative and also provides

persons with disabilities with information on accessible design

approaches. The Manual clarifies what are requirements under the

Act and what are HUD's technical assistance recommendations. The

portions describing the requirements are clearly differentiated from

the technical assistance recommendations.

Manual J 8th Edition is the national ANSI-recognized standard

for producing HVAC equipment sizing loads for single-family

detached homes, small multi-unit structures, condominiums,

town houses, and manufactured homes. This new version

incorporates the complete Abridged Edition of Manual J. The

manual provides quick supplemental details as well as

supporting reference tables and appendices. A proper load

calculation, performed in accordance with the Manual J 8th

Edition procedure, is required by national building codes and

most state and local jurisdictions.
