Popular Science Island Press

There is a wealth of research and literature explaining suburban sprawl and the urgent need to retrofit suburbia. However, until now there has been no single guide that directly explains how to repair typical sprawl elements. The Sprawl Repair Manual demonstrates a step-by-step design process for the re-balancing and re-urbanization of suburbia into more sustainable, economical, energy- and resource-efficient patterns, from the region and the community to the block and the individual building. As Galina Tachieva asserts in this exceptionally useful book, sprawl repair will require a proactive and aggressive approach, focused on design, regulation and incentives. The Sprawl Repair Manual is a much-needed, single-volume reference for fixing sprawl, incorporating changes into the

regulatory system, and implementing repairs through incentives and permitting strategies. This manual specifies the expertise that's needed and details the techniques and algorithms of sprawl repair within the context of reducing the financial and ecological footprint of urban growth. The Sprawl Repair Manual draws on more than two decades of practical experience in the field of repairing and building communities to analyze the current pattern of sprawl development, disassemble it into its elemental components, and present a process for transforming them into human-scale, sustainable elements. The techniques are illustrated both two- and three-dimensionally, providing users with clear methodologies for the sprawl repair interventions, some of which are radical, but all of which will produce positive results.

Lists citations with abstracts for aerospace related reports obtained from world wide sources and announces documents that have recently been entered into the NASA Scientific and Technical Information Database.

Operator's and Organizational Maintenance Manual

This biography recounts one of the most significant yet unsung military careers of the twentieth century: "a major contribution to the history of World War II" (Foreign Affairs). General Walter Bedell Smith began

his public service career of more than forty years at age sixteen, when he joined the Indiana National Guard. His bulldog tenacity earned him an opportunity to work with General George C. Marshall in 1941, playing an essential role in formation of the Combined and Joint Chiefs of Staff. After his appointment as chief of staff to Dwight D. Eisenhower in 1942, Smith took a central part in planning the major Allied operations of World War II in Europe. Among his many duties, Smith negotiated the surrenders of the Italian and German armed forces in 1945. Smith's postwar career included service as the US ambassador to the Soviet Union, director of the Central Intelligence Agency, and undersecretary of state. In *Beetle*, D. K. R. Crosswell offers the first full-length biography of the general, including insights into his close relationships with Marshall and Eisenhower. Meticulously researched and long overdue, *Beetle* sheds new light on Eisenhower as supreme commander, as well as the WWII campaigns in North Africa, Italy, and Europe.
