Focus Mode - fujifilm-dsc.com
One of my two cameras is the Fujifilm X100F, which offers manual focus, and has some "Focus Assist" features which are really useful. First, you want to set the camera to use both auto and manual focus. Go to the AF MF Menu and turn AF+MF On. This means that the camera will use auto-focus when you press the shutter halfway.

To zoom in on the current focus frame for precise focus, press the center of the command dial. Press the dial again to cancel zoom. In focus mode [S], focus check is available when [AREA] is selected for [AUTOFOCUS SETTING] > [AF MODE] in the shooting menu. Focus check is not available when [ON] is selected for [AUTOFOCUS SETTING] > [PRE-AF] in focus mode [C]. **Manten|Photography — How To Zone-Focus With A Fujifilm X100S**
TRICK: In Manual Focus, unlike autofocus, the Fuji X100 focuses seamlessly throughout its entire range! Therefore, instead of screwing with the macro mode menus, simply slide the focus mode switch to MF, and hold the AFL AEL button to focus. Press the rear control lever to enlarge the central focus area. **Fujifilm X100S Review: Digital Photography Review**

Back focusing relies on the single point focus and not on the zone focus. And I noticed that the focusing system is far more accurate with the zone system. So I prefer to stay in a mode where I can use the zone focus, that is either single AF or continuous AF and not manual anymore. Single AF and continuous AF with zone focus are real quick.

Fuji X100s Manual Focusing
And it makes sense to be familiar with the manual focus options on your camera. Anyway, here is why I think the way that they implemented manual focus on the Fuji cameras are so good – using the Fuji X100s (B&H / Amazon) to explain: Accessing the Manual Focus mode works the way it does with most cameras – a slider switch on the side of the camera. *FUJIFILM OVF | FOCUSING WITH THE X-PRO 1 AND X100S*
BOX 1: Represents the focus frame at infinity – This is where the OVF will naturally perceives focus to be. BOX 2: Represents the focus frame at the OVF's minimum focus distance – the closest the OVF can focus before it hits the macro range. (This is about 2.6ft for the X-Pro 1 and about 1.6ft for the X100s) **Fujifilm X100 V User's Guide - Ken Rockwell**

How I configure my Fujifilm X100T for everything I ...
First, set your camera to manual mode by pushing the small button on the left side of the camera all the way up to M. Then go into the camera menu and ensure that the AEL/AFL button is programmed to set focus every time it is being pushed and then keep the achieved focus until you push the button again. **Definitive Review of the Fuji X100s - Brutally Simple ...**
Manual focusing is a pleasure as well. The X100s includes two focus-assist modes for manual focusing, a "peaking" mode, which outlines areas in focus with a white highlight, as well as a digital "split image" mode, which is reminiscent of the old split-image focusing screens used in film SLRs. *Fuji cameras manual focus mode - Tangents*
The Fujifilm X100S is the latest in a recent rush of cameras to include phase-detection elements on its imaging sensor, giving an AF system that is a hybrid of contrast and phase-detection methods. However, Fujifilm also uses this system to provide a unique and incredibly clever manual focus aid - which could finally allow digital cameras to offer the speed and convenience enjoyed by manual ... *Fuji X100 User's Guide - Ken Rockwell*
This the AF mode to use when back-button focusing, which is pressing the AE/AF button while the camera is set to manual auto-focus. AF Mode: Area. ... TCL-X100 tele converter lens. *Fujifilm X100S Digital Split Image focus - how it works ...*
The AF Lock (AEL/AFL) button is ignored in either AFS or AFC modes. To lock focus, slide the AF mode switch to M (Manual). In Manual focus mode, the AFL/AFL button is a spot-focus button: tap

it and the X100V will autofocus once and lock! Just tap and the X100V does its thing; you don't have to hold the AEL/AFL button. *A simple way to zone focus with the Fuji X100F • Laurence ...*

Frame the picture with your subject in the center of the display and press the shutter button halfway to focus. R If the subject is poorly lit, the AF-assist illuminator may light (78). If the camera is able to focus, it will beep twice and focus area will glow green. Focus and exposure will lock while the shutter button is pressed halfway.
