The consequences of drug use, whether illicit or prescribed. Consequences that can be enduring, lifelong, even carry through generations. Yet few of us have the time to consider them as we live in the heat of our own daily lives. I have seen this in action, watched events while they happened, seen it unfold, lived through the results, and unfortunately am observing the ongoing calamities of it all, still today. It is not fun to watch but not mine to fix. I was and am an observer, a recorder, merely that, out of the action, incapable of altering the results. My wife made a great point on this novels subject. Drug use she said is a leveler. It brings people down the lowest common denominator. What a concept! How right on is that statement! Drugs affect the rich, the poor, the famous, and the infamous in every country and nationality on this earth. If you are on the upscale end drugs keep you there. The users life contribution to humanity is likely to be nothing, but the cost to the user, their family and friends in physical, emotional, and fiscal terms expensive and of course dangerous, because it may also kill you. I have put these observations into this novel hoping that readers can identify with the characters, watch them grow and suffer through the consequences of their actions unaware of the effect of their lives and on others.

Public relations and the media are in a time of major change. The rise of social media, altered media platforms, evolving legislative environments and new models of communication have altered not only the working environments of public relations and the news and entertainment media, but also many aspects of how these industries work together. Media Relations provides a practical and thorough introduction to media work in this changing environment. Based on a solid understanding of media culture and theory, Jane Johnston shows how to steer a path between the technical and human elements of media relations. She drills down into the different types of media, analysing their applications, strengths and weaknesses, and shows how to target your message to the right media outlets, whether national television, community radio, celebrity magazines or influential blogs. This second edition has been revised throughout and includes new case studies, and new chapters on digital and social media, media campaigns, and legal and ethical considerations. 'Media Relations: Issues and Strategies is written in an engaging, easy to understand style. It provides excellent examples and cases of media relations.' - Global Media Journal

While a number of gases are implicated in global warming, carbon dioxide is the most important contributor, and in one sense the entire phenomena can be seen as a human-induced perturbation of the carbon cycle. The Global Carbon Cycle offers a scientific assessment of the state of current knowledge of the carbon cycle by the world's leading scientists sponsored by SCOPE and the Global Carbon Project, and other international partners. It gives an introductory over-view of the carbon cycle, with multidisciplinary contributions covering biological, physical, and social science aspects. Included are 29 chapters covering topics including: an assessment of carbon-climate-human interactions; a portfolio of carbon management options; spatial and temporal distribution of sources and sinks of carbon dioxide; socio-economic driving forces of emissions scenarios. Throughout,

contributors emphasize that all parts of the carbon cycle are interrelated, and only by developing a framework that considers the full set of feedbacks will we be able to achieve a thorough understanding and develop effective management strategies. The Global Carbon Cycle edited by Christopher B. Field and Michael R. Raupach is part of the Rapid Assessment Publication series produced by the Scientific Committee on Problems of the Environment (SCOPE), in an effort to quickly disseminate the collective knowledge of the world's leading experts on topics of pressing environmental concern.
