Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was

later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. This glamorous and sexy photographic expos raises the curtain on the international world of haute couture, offering an insider's view from one of today's hottest fashion photographers. 90 duotone photos. 30 color illustrations.

Timewyrm Penguin Putnam Yosemite National Park and the High Sierra were the places closest to Ansel Adams' heart, and this magnificent new collection

presents the finest selection of his photographs and writings yet published on this "vast edifice of stone and space." Inspired by their grandeur, their wildness, and their primeval mystery, Adams' photos came to represent America's National Parks. During his lifetime Adams published seven books of images from this region; this new book brings the best of these early volumes together into a single work. His writings - alive with anecdote and insight - provide a backdrop for these stirring images, and an introduction by John Szarkowski, the most distinguished photography critic and curator of his time,

provides testimony to the enduring impact of Adams' Yosemite vision. Yosemite and the High Sierra represents Adams' legacy at its most distilled and timeless.
